anatomy of fall where to watch: Death-watch and spider beetles of Wisconsin--Coleoptera: Ptinidae Rachel A. Arango, Daniel K. Young, 2012 Critical insights relating to the distribution, natural history, and abundance of Ptinidae sensu lato, in Wisconsin and North America have been overlooked in many faunistic surveys and taxonomic studies, in part due to the relative difficulty in working with the contractile nature of many species and complexity of certain taxonomic characters. Work by H.C. Fall, R.E. White, and T.K. Philips significantly aided in the understanding of this family, although numerous genera are still in need of major revision. This study is the first state-wide survey of Wisconsin Ptinidae. It provides a comprehensive list of all ptinid species documented from Wisconsin, with taxonomic keys for their identification. Profiles for each species were compiled, including a taxonomic overview, capsule description, species diagnosis, and overview of their natural history. Specimens were collected using a variety of methods during two field seasons; Lindgren funnel traps and flight intercept traps were particularly significant. Trap samples from previous faunistic surveys of other taxa and mounted specimens from private and public research collections were also examined. Seventy-eight Wisconsin pest control companies and the University of Wisconsin insect diagnostic laboratory were consulted for information regarding indoor pest species of Ptinidae. During this survey, 28 genera and 64 species of Ptinidae were documented from the state from 2,063 specimens. Of these, 14 genera and 46 species are considered new state records, a 72% increase from the number of species known previously.

Watch: Australia's Third Party Naval Defense, 1919-1942 illustrates how Australia confronted the need to base its post-World War I defense planning around the security provided by a major naval power: in the first instance, Britain, and later the United States. Spanning the period leading up to Australia's greatest security crisis—the military threat posed by Japan throughout the majority of 1942—the work takes the reader all the way up to the defeat of the Imperial Japanese Navy by the United States Navy in the Solomon Islands campaign. Angus Britts focuses on Anglo-Australian defense relations from 1919-42 when the British were Australia's primary naval protectors until they were superseded in the Pacific by the United States in May 1942 at the battle of the Coral Sea. Britts traces the process of the alignment or divergence of differing strategic interests between Australia and Britain in particular. Taking place against the backdrop of Imperial Japan's expansionism debates within Australian political and defense circles during this period, namely the nature of the most likely threat to the continent itself, what became an important subplot to the events then unfolding in the Pacific. Looking at the development of the "Singapore strategy" which utilized the British fleet at Singapore to protect Australia's interests, Britts lays out how the cornerstone for Australian defense planning was based on the continued assurances from successive British governments that they would honor their naval commitments should Australia itself eventually come under serious threat from Japanese aggression. The Australian-American defense relationship evolved at a later stage within the timeframe in this work, but the varying interactions between both nations throughout the interwar years are likewise addressed, as is the foundation of their wartime relations. Britts illustrates the difficulty in forming a defense relationship between small and great powers, where the needs of the former are not subsumed by the interests of the latter, from the interwar years to the start of World War II. In an era when the entire Pacific region was at war, the inability of a larger power to fulfill its side of a defensive pact with a smaller power shaped the future of the region itself.

anatomy of fall where to watch: *The Legacy of a Troubled Past* Bernard Cros, Mathilde Rogez, Gilles Teulie, 2022-06-07 Since the advent of democracy in 1994, South Africa has been engaged in an unprecedented exercise of national soul-searching, torn between the need to lay to rest centuries of racial conflict and the desire to come to terms with its traumatic history. This book asks whether the country has begun to turn the corner on the legacy of collective hurt. To do so it ranges in scope across 350 years of South African history, encompassing the struggle against the apartheid regime, the downfall of white supremacy, the Truth and Reconciliation Commission and the first 25 years of democracy, up to more recent movements, such as #RhodesMustFall, or the inquests into the 2012 Marikana massacre, that point to the persistence of traumatic memory in contemporary society. The authors assembled here set out to analyse the representation of such memory, how it has been woven into narratives, recorded, preserved and questioned, and how issues of individual and collective responsibility have been grafted onto it through the visual arts, literature, political discourse and public action. In focusing on memory along with its derived forms of memorialization, collective memory, nostalgia, or post-memory, our contributors pose a fundamental question: is South Africa finally coming to the end of the post-apartheid transition period? Do the decades of memory work on racial violence and repression examined here hold out hope for the nation to make peace with its past?

anatomy of fall where to watch: *Give Us This Day Devotionals, Volume 3* Charles Erlandson, 2021-12-17 Give Us This Day is a unique daily devotional commentary for the entire New Testament based on the ancient method called lectio divina. Lectio divina, or divine reading, is the method used by the early church and countless Christians through the centuries to read the Scriptures to form and transform the soul more than merely to inform the mind. Give Us This Day deals in depth with entire passages and their contexts. Rather than selecting only certain portions of the New Testament to write about, Fr. Charles has written a devotional for each and every passage of the New Testament. Fr. Charles writes for the whole person: he's not afraid to use his sense of humor, and he carefully relates the Bible not only to the individual's life but also to the life of the Church. At the end of each day's devotional, an appropriate Prayer is offered, as well as Points for Further Reflection on the day's lesson. Each devotional concludes with a suggested Resolution to put into effect what the Spirit has stirred up in the heart of the reader during the course of his reading, meditation, and prayer.

anatomy of fall where to watch: *American War Machine* Peter Dale Scott, 2010-11-16 This provocative, thoroughly researched book explores the covert aspects of U.S. foreign policy. Prominent political analyst Peter Dale Scott marshals compelling evidence to expose the extensive growth of sanctioned but illicit violence in politics and state affairs, especially when related to America's long-standing involvement with the global drug traffic. Beginning with Thailand in the 1950s, Americans have become inured to the CIA's alliances with drug traffickers (and their bankers) to install and sustain right-wing governments. The pattern has repeated itself in Laos, Vietnam, Italy, Mexico, Thailand, Nigeria, Venezuela, Colombia, Peru, Chile, Panama, Honduras, Turkey, Pakistan, and now Afghanistan—to name only those countries dealt with in this book. Scott shows that the relationship of U.S. intelligence operators and agencies to the global drug traffic, and to other international criminal networks, deserves greater attention in the debate over the U.S. presence in Afghanistan. To date, America's government and policies have done more to foster than to curtail the drug trade. The so-called war on terror, and in particular the war in Afghanistan,

constitutes only the latest chapter in this disturbing story.
