anatomy of gray script: **Codes of Modernity** Uluğ Kuzuoğlu, 2023-11-28 In the late nineteenth century, Chinese reformers and revolutionaries believed that there was something fundamentally wrong with the Chinese writing system. The Chinese characters, they argued, were too cumbersome to learn, blocking the channels of communication, obstructing mass literacy, and impeding scientific progress. What had sustained a civilization for more than two millennia was suddenly recast as the root cause of an ongoing cultural suicide. China needed a new script to survive in the modern world. *Codes of Modernity* explores the global history of Chinese script reforms—efforts to alphabetize or simplify the writing system—from the 1890s to the 1980s.

Examining the material conditions and political economy underlying attempts to modernize scripts, Uluğ Kuzuoğlu argues that these reforms were at the forefront of an emergent information age. Faced with new communications technologies and infrastructures as well as industrial, educational, and bureaucratic pressures for information management, reformers engineered scripts as tools to increase labor efficiency and create alternate political futures. Kuzuoğlu considers dozens of proposed scripts, including phonetic alphabets, syllabaries, character simplification schemes, latinization, and pinyin. Situating them in a transnational framework, he stretches the geographical boundaries of Chinese script reforms to include American behavioral psychologists, Soviet revolutionaries, and Central Asian typographers, who were all devising new scripts in pursuit of informational efficiency. *Codes of Modernity* brings these experiments together to offer new ways to understand scripts and rethink the shared experiences of a global information age.

anatomy of gray script: Steven Soderbergh Anthony Kaufman, 2015-05-01 The long and prolific career of Steven Soderbergh (b. 1963) defies easy categorization. From his breakout beginnings in 1989 with *sex, lies, and videotape* to 2013, when he retired from big-screen studio movie making to focus on other pursuits including television, the director's output resembles nothing less than an elaborate experiment. Soderbergh's Hollywood vehicles such as the *Ocean's Eleven* movies, *Contagion*, and *Magic Mike* appear just as risky and outside-the-box as low-budget exercises such as *Schizopolis*, *Bubble*, and *The Girlfriend Experience*. This updated edition details key career moments: his creative crisis surrounding his fourth film, *The Underneath*; his rejuvenation with the ultra-low-budget free-style *Schizopolis*; the mainstream achievements *Erin Brockovich*, *Traffic*, and the *Ocean's Eleven* films; and his continuing dedication to pushing his craft forward with films as diverse as conspiracy thrillers, sexy dramas, and biopics on Che Guevara and *Liberace*. Spanning twenty-five years, these conversations reveal Soderbergh to be as self-effacing and lighthearted in his later more established years as he was when just beginning to make movies. He comes across as a man undaunted by the glitz and power of Hollywood, remaining, above all, a truly independent filmmaker unafraid to get his hands dirty and pick up the camera himself.
