anatomy of a scandal season 2 episode 1: Abortion in Popular Culture Brenda Boudreau, Kelli Maloy, 2023-04-04 *Abortion in Popular Culture: A Call to Action* brings together scholars who examine depictions of abortion in film, television, literature, and social media. By examining texts ranging from classic television series such as *Maude* and *Roseanne* and recent films such as *Never Rarely Sometimes Always* and *Unpregnant* to dystopian novels and social-media campaigns, the essays analyze narrative styles, rhetorical strategies, and cinematic techniques, all of which shape cultural attitudes toward abortion. They also analyze cultural shifts, including the willingness or reluctance of networks, cable channels, and filmmakers to acknowledge changing trends in reproductive health such as medication abortion and the role that abortion plays in family planning. As a whole, however, the essays argue that popular culture can play a significant role in destigmatizing abortion by including a wider range of narratives and doing so with nuance and empathy. With reproductive rights under attack in the United States, each essay is a call to action for writers, producers, directors, showrunners, authors, and musicians to use their platforms to tell more positive and accurate stories about abortion.

anatomy of a scandal season 2 episode 1: Social TV Cory Barker, 2022-06-27 Winner of the 2023 SCMS Media Industries Scholarly Interest Group Outstanding Book Award sponsored by the Center for Entertainment & Media Industries On March 15, 2011, Donald Trump changed television forever. The Comedy Central Roast of Trump was the first major live broadcast to place a hashtag in the corner of the screen to encourage real-time reactions on Twitter, generating more than 25,000 tweets and making the broadcast the most-watched Roast in Comedy Central history. The #trumproast initiative personified the media and tech industries' utopian vision for a multi-screen and communal live TV experience. In *Social TV: Multi-Screen Content and Ephemeral Culture*, author Cory Barker reveals how the US television industry promised—but failed to deliver—a social media revolution in the 2010s to combat the imminent threat of on-demand streaming video. Barker examines the rise and fall of Social TV across press coverage, corporate documents, and an array of digital ephemera. He demonstrates that, despite the talk of disruption, the movement merely aimed to exploit social media to reinforce the value of live TV in the modern attention economy. Case studies from broadcast networks to tech start-ups uncover a persistent focus on community that

aimed to monetize consumer behavior in a transitional industry period. To trace these unfulfilled promises and flopped ideas, Barker draws upon a unique mix of personal Social TV experiences and curated archives of material that were intentionally marginalized amid pivots to the next big thing. Yet in placing this now-forgotten material in recent historical context, Social TV shows how the era altered how the industry pursues audiences. Multi-screen campaigns have shifted away from a focus on live TV and toward all-day “content” streams. The legacy of Social TV, then, is the further embedding of media and promotional material onto every screen and into every moment of life.

anatomy of a scandal season 2 episode 1: The New Female Antihero Sarah Hagelin, Gillian Silverman, 2022-01-25 The New Female Antihero examines the hard-edged spies, ruthless queens, and entitled slackers of twenty-first-century television. The last ten years have seen a shift in television storytelling toward increasingly complex storylines and characters. In this study, Sarah Hagelin and Gillian Silverman zoom in on a key figure in this transformation: the archetype of the female antihero. Far from the sunny, sincere, plucky persona once demanded of female characters, the new female antihero is often selfish and deeply unlikeable. In this entertaining and insightful study, Hagelin and Silverman explore the meanings of this profound change in the role of women characters. In the dramas of the new millennium, they show, the female antihero is ambitious, conniving, even murderous; in comedies, she is self-centered, self-sabotaging, and anti-aspirational. Across genres, these female protagonists eschew the part of good girl or role model. In their rejection of social responsibility, female antiheroes thus represent a more profound threat to the status quo than do their male counterparts. From the devious schemers of *Game of Thrones*, *The Americans*, *Scandal*, and *Homeland*, to the joyful failures of *Girls*, *Broad City*, *Insecure*, and *SMILF*, female antiheroes register a deep ambivalence about the promises of liberal feminism. They push back against the myth of the modern-day super-woman—she who “has it all”—and in so doing, they give us new ways of imagining women’s lives in contemporary America.

anatomy of a scandal season 2 episode 1: Small Screen, Big Feels Melissa Ames, 2020-12-02 While television has always played a role in recording and curating history, shaping cultural memory, and influencing public sentiment, the changing nature of the medium in the post-network era finds viewers experiencing and participating in this process in new ways. They skim through commercials, live tweet press conferences and award shows, and tune into reality shows to escape reality. This new era, defined by the heightened anxiety and fear ushered in by 9/11, has been documented by our media consumption, production, and reaction. In *Small Screen, Big Feels*, Melissa Ames asserts that TV has been instrumental in cultivating a shared memory of emotionally charged events unfolding in the United States since September 11, 2001. She analyzes specific shows and genres to illustrate the ways in which cultural fears are embedded into our entertainment in series such as *The Walking Dead* and *Lost* or critiqued through programs like *The Daily Show*. In the final section of the book, Ames provides three audience studies that showcase how viewers consume and circulate emotions in the post-network era: analyses of live tweets from Shonda Rhimes’s drama, *How to Get Away with Murder* (2010–2020), ABC’s reality franchises, *The Bachelor*

(2002–present) and *The Bachelorette* (2003–present), and political coverage of the 2016 Presidential Debates. Though film has been closely studied through the lens of affect theory, little research has been done to apply the same methods to television. Engaging an impressively wide range of texts, genres, media, and formats, Ames offers a trenchant analysis of how televisual programming in the United States responded to and reinforced a cultural climate grounded in fear and anxiety.
