anatomy of a fall similar movies: *Minding Movies* David Bordwell, Kristin Thompson, 2011-03-15 David Bordwell and Kristin Thompson are two of America's preeminent film scholars. You would be hard pressed to find a serious student of the cinema who hasn't spent at least a few hours huddled with their seminal introduction to the field—Film Art, now in its ninth edition—or a cable television junkie unaware that the Independent Film Channel sagely christened them the “Critics of the Naughts.” Since launching their blog Observations on Film Art in 2006, the two have added web virtuosos to their growing list of accolades, pitching unconventional long-form pieces engaged with film artistry that have helped to redefine cinematic storytelling for a new age and audience. *Minding Movies* presents a selection from over three hundred essays on genre movies, art films, animation, and the business of Hollywood that have graced Bordwell and Thompson's blog. Informal pieces, conversational in tone but grounded in three decades of authoritative research, the essays gathered here range from in-depth analyses of individual films such as *Slumdog Millionaire* and *Inglourious Basterds* to adjustments of Hollywood media claims and forays into cinematic humor. For Bordwell and Thompson, the most fruitful place to begin is how movies are made, how they work, and how they work on us. Written for film lovers, these essays—on topics ranging from *Borat* to blockbusters and back again—will delight current fans and gain new enthusiasts. Serious but not solemn, vibrantly informative without condescension, and above all illuminating reading, *Minding Movies* offers ideas sure to set film lovers thinking—and keep them returning to the silver screen.

anatomy of a fall similar movies: *Falling in Love at the Movies* Esther Zuckerman, 2024-12-03 Prepare to swoon, ugly cry, laugh, and fall in love with this officially licensed exploration of the impact and legacy of one of film's most beloved genres from Turner Classic Movies: the rom-com. Romantic comedies have had an incredible influence on popular culture, shaping everything from how we think of relationships to fashion. Often swept aside in film history, these movies are thought of as pure comfort viewing. Although they certainly provide those fuzzy feelings, they have also had a significant artistic influence and cultural impact. Spanning decades of romantic comedies—from movies of the 1930s such as *It Happened One Night* and the rom com craze of the 80s and 90s including *When Harry Met Sally...* all the way to contemporary hits like *Crazy Rich Asians*, and everything in between—*Falling in Love at the Movies* will make you fall in love (all over again) with romantic comedies. Esther Zuckerman—accomplished entertainment journalist and member of the New York Film Critic's Circle—takes readers on a journey through the rom-com. She examines the aspects that make us so drawn to these types of films, diving deep into the key auteurs—from Preston Sturges to James L. Brooks to Nora Ephron and beyond—who both created and subverted the canon. These directors, actors, and writers shaped the genre, establishing and also busting

traditional pillars and tenets of these movies such as the “Perfect Pair” or “The Man in Crisis” and “The High Maintenance Woman.” Featuring full-color images from the films throughout, along the way Zuckerman takes detours, explores iconic lines of dialogue (Who could forget Julia Roberts' “I’m also just a girl, standing in front of a boy, asking him to love her” iconic moment from Notting Hill?) to memorable scenes (the magical moment at the Empire State Building in Sleepless in Seattle) and weaves in interviews of artists and romantic comedy fanatics in the industry. Looking beyond the traditional rom-com, Zuckerman digs into the nooks and crannies, the films that buck the trend of happily ever after, the ones that think beyond heteronormative narratives, and the indies that kept the rom-com alive outside of the studio system, to offer a more comprehensive story of the rom-com than has ever been seen before—and one that you’re bound to love. How’s that for a happy ending?

anatomy of a fall similar movies: Law and Film Vittoria Becci, Alexia Katsiginis, Edward Van Daalen, 2024-12-31 This book explores how law can be understood through film by engaging creatively with the intellectual and aesthetic dimensions of both fields. The contributors to this book consider the need to turn to film and what this means for how we come to understand law and its absences. The chapters explore a variety of narratives, aesthetics, cinematic epistemologies and legal phenomena; from assessing law in social debates to film as legal critique, from notions of justice to contemplations on evil, and from masculine vigilantism to radical feminism. Taken

together, they constitute an inspiring body of work that embodies an urgency for diverse and subversive ways to challenge law's formalism and authority; and to think about and respond variously to law's impotence, its disappointment, or its boredom. This book will appeal to legal scholars and students in law and the humanities, especially those with interests in aesthetics, law and literature, law and culture, law and society, and critical legal theory.

anatomy of a fall similar movies: Movies and Methods Bill Nichols, 1985-09-06 The original Movies and Methods volume (1976) captured the dynamic evolution of film theory and criticism into an important new discipline, incorporating methods from structuralism, semiotics, and feminist thought. Now there is again ferment in the field. Movies and Methods, Volume II, captures the developments that have given history and genre studies imaginative new models and indicates how feminist, structuralist, and psychoanalytic approaches to film have achieved fresh, valuable insights. In his thoughtful introduction, Nichols provides a context for the paradoxes that confront film studies today. He shows how shared methods and approaches continue to stimulate much of the best writing about film, points to common problems most critics and theorists have tried to resolve, and describes the internal contradictions that have restricted the usefulness of post-structuralism. Mini-introductions place each essay in a larger context and suggest its linkages with other essays in the volume. A great variety of approaches and methods characterize film writing today, and the final part conveys their diversity—from statistical style analysis to phenomenology and from gay criticisms to neoformalism. This concluding part also shows how the rigorous use of a broad range of approaches has helped remove post-structuralist criticism from its position of dominance through most of the seventies and early eighties. The writings collected in this volume exhibit not only a strong sense of personal engagement but also a persistent awareness of the social importance of the cinema in our culture. Movies and Methods, Volume II, will prove as invaluable to the serious student of cinema as its predecessor; it will be an essential reference work for years to come.

anatomy of a fall similar movies: Down and Dirty Pictures Peter Biskind, 2013-01-08 In this "dishy...superbly reported" (Entertainment Weekly) New York Times bestseller, Peter Biskind chronicles the rise of independent filmmakers who reinvented Hollywood—most notably Sundance founder Robert Redford and Harvey Weinstein, who with his brother, Bob, made Miramax Films an indie powerhouse. As he did in his acclaimed Easy Riders, Raging Bulls, Peter Biskind "takes on the movie industry of the 1990s and again gets the story" (The New York Times). Biskind charts in fascinating detail the meteoric rise of the controversial Harvey Weinstein, often described as the last mogul, who created an Oscar factory that became the envy of the studios, while leaving a trail of carnage in his wake. He follows Sundance as it grew from a regional film festival to the premier showcase of independent film, succeeding almost despite the mercurial Redford, whose visionary plans were nearly thwarted by his own quixotic personality. Likewise, the directors who emerged from the independent movement, such as Quentin Tarantino, Steven Soderbergh, and David O. Russell, are now among the best-known directors in Hollywood. Not to mention the actors who emerged with them, like Matt Damon, Ben Affleck, Ethan Hawke, and Uma Thurman. Candid, controversial, and "sensationally entertaining" (Los Angeles Times) Down and Dirty Pictures is a must-read for anyone interested in the film world.
