- **Superior:** Refers to a structure that is higher than another (e.g., the head is superior to the neck).
- **Inferior:** Indicates a structure that is lower than another (e.g., the stomach is inferior to the heart).
- **Anterior (Ventral):** Refers to the front of the body (e.g., the chest is anterior to the back).
- **Posterior (Dorsal):** Refers to the back of the body (e.g., the spine is posterior to the stomach).
- **Medial:** Indicates a position closer to the midline of the body (e.g., the nose is medial to the ears).
- **Lateral:** Refers to a position further away from the midline (e.g., the arms are lateral to the chest).
- **Proximal:** Indicates a position closer to the trunk of the body (e.g., the elbow is proximal to the wrist).
