pop up anatomy book: Mourning Sex Peggy Phelan, 2013-07-23 This is a book about the exhilaration and the catastrophe of embodiment. Analyzing different instances of injured bodies, Peggy Phelan considers what sustained attention to the affective force of trauma might yield for critical theory. The bodies she examines here include Christ's, as represented in Caravaggio's painting *The Incredulity of St Thomas*, Anita Hill's and Clarence Thomas's bodies as they were performed during the Senate hearings, the disinterred body of the Rose Theatre, exemplary bodies reconstructed through psychoanalytic talking cures, and the filmic bodies created by Tom Joslin, Mark Massi, and Peter Friedman in *Silverlake Life: The View From Here*. pop up anatomy book: *Inventing the World* Meredith Small, 2020-12-01 An epic cultural journey that reveals how Venetian ingenuity and inventions—from sunglasses and forks to bonds and currency—shaped modernity. How did a small, isolated city—with a population that never exceeded 100,000, even in its heyday—come to transform western civilization? Acclaimed anthropologist Meredith Small, the author of the groundbreaking *Our Babies, Ourselves* examines the the unique Venetian social structure that was key to their explosion of creativity and invention that ranged from the material to social. Whether it was boats or money, medicine or face cream, opera, semicolons, tiramisu or child-labor laws, these all originated in Venice and have shaped contemporary notions of

institutions and conventions ever since. The foundation of how we now think about community, health care, money, consumerism, and globalization all sprung forth from the Laguna Veneta. But Venice is far from a historic relic or a life-sized museum. It is a living city that still embraces its innovative roots. As climate change effects sea-level rises, Venice is on the front lines of preserving its legacy and cultural history to inspire a new generation of innovators.
