Ally Breedlove, Ken Abraham, 2013-10-29 AN INSPIRATIONAL AND HEARTRENDING MEMOIR ABOUT BEN BREEDLOVE, WHO SHARED HIS NEAR-DEATHEXPERIENCES AND VISIONS OF HEAVEN IN HIS VIRAL VIDEOS—WRITTEN BY HIS SISTER, ALLY BREEDLOVE. On Christmas Day 2011, Ben Breedlove's soul went to heaven. But it wasn't his first time there. Ben suffered from hypertrophic cardiomyopathy (HCM), a heart condition that posed a constant risk of sudden death. His condition,

a thickening of the heart muscle, worsened over time, leaving him weak and fatigued. It also led Ben to some close calls medically, in particular cardiac arrest on four separate occasions, during which he felt the presence of angels and experienced the perfect peace of heaven. Precocious and warm, Ben was close with his family and two siblings, and forged deep relationships with his friends. He loved to wakeboard and wake surf, and he had dreams of visiting foreign countries around the world. He created the YouTube channels TotalRandomness512 and BreedloveTV, and co-created the channel OurAdvice4You, where he posted videos about everything from dating advice for girls to more serious topics like his spirituality and heart condition. Unbeknownst to his parents and family, Ben created a two-part video called This Is My Story, in which he used flashcards to tell the world about his near-death experiences and his beckoning toward heaven. When he died a short while later, at the tender age of eighteen, his family and the rest of the world stumbled upon these videos. The world responded with overwhelming acceptance of the message Ben shared. Sharing his vision of heaven was Ben's gift to his family, and to the world. And now this is the Breedlove family's gift to us - an in-depth look at the life and near-deaths of Ben, the strength and faith of a family, and ultimately, the hope of heaven. Do you believe in Angels or God? I Do. - Ben Breedlove

when did grays anatomy start: On the Verge of Tears Michele Byers, David Lavery, 2010-04-16 The idea for this book began with David Lavery's 2007 column for flowtv.org. "The Crying Game: Why Television Brings Us to Tears" asked us to consider that "age-old mystery": tears. The respondents to David's initial survey—Michele Byers among them—didn't agree on anything ... Some cried more over film, some television, some books; some felt their tears to be a release, others to be a manipulation. They did agree, however, as did the readers who responded to the column, that crying over stories, and even "things," is something that is a shared and familiar cultural practice. This book was born from that moment of recognition. On the Verge of Tears is not the first book to think about crying. Tom Lutz's *Crying: The Natural & Cultural History of Tears*, Judith Kay

Nelson's *Seeing Through Tears: Crying and Attachment*, Peter Schwenger's *The Tears of Things: Melancholy and Physical Objects*, and Henry Jenkins' *The Wow Climax: Tracing the Emotional Impact of Popular Culture* also offer forays into this familiar, if not always entirely comfortable, emotional space. This book differs markedly from each of these others, however. As a collection of essays by diverse hands, its point of view is multi-vocal. It is not a history of tears (as is Lutz's superb book); nor is its approach psychological/sociological (as is Nelson's). It does not limit itself to very contemporary popular culture (as does Jenkins' book) or material culture (as does Schwenger's study). What *On the Verge of Tears* offers are personal, cultural, and political ruminations on the tears we shed in our daily engagements with the world and its artifacts. The essays found within are often deeply personal, but also have broad implications for everyday life. The authors included here contemplate how and why art, music, film, literature, theatre, theory, and material artifacts make us weep. They consider the risks of tears in public and private spaces; the way tears implicate us in tragedy, comedy, and horror. *On the Verge of Tears* does not offer a unified theory of crying, but, instead, invites us to imagine tears as a multi-vocal language we can all, in some manner, understand.

when did grays anatomy start: Medicine and Miracles Judith Greer, 2023-06-29 Staying Strong When Illness Strikes: Ten Insights Love is the most important part of life support. It can have a profound effect on the healing process. The patients who improve tend to have a strong network of family and friends. Families need care as well and may need TLC for years to come. Even when the patient makes a full recovery, families have to deal with loss and grief. It's important to find others who have survived the medical combat zone and tell your battle stories. This will help you bear the load. There's nothing like a sick room to reorder your priorities. Every person in your family will be changed by this. Caregiving isn't for the faint of heart. It will always require more resources than you have to give. You can't do it alone. Ask a hospital social worker for a list of support groups and family counselors, and reach out to trusted friends. Create your own circle of faith. Accept the bad days with the good and remember that progress is not a linear thing. It usually takes a zigzag path. Never give up and always be open to surprises. Remember that healing isn't just a onetime thing. Miracles keep occurring every day.
