- FAQ

Cabin Configuration and Design

The All Nippon Airways 787-9 business class features a thoughtfully designed cabin that prioritizes passenger comfort and privacy. The aircraft typically operates in a 1-2-1 configuration, allowing every passenger direct aisle access. This setup is crucial for ensuring that travelers can move freely without disturbing their neighbors. The cabin is designed to create a serene atmosphere, with muted colors and modern aesthetics that reflect Japanese elegance.

One of the standout features of the cabin design is the use of large, panoramic windows, which enhance the overall experience by providing natural light and stunning views. In addition to the spacious layout, the cabin is

equipped with advanced soundproofing technology, minimizing noise from the engines and improving the in-flight environment.

Seat Comfort and Features

In the All Nippon Airways 787-9 business class, comfort is paramount. Each seat is designed to provide maximum ergonomic support, featuring adjustable headrests, lumbar support, and ample legroom. The seats can recline into fully flat beds, allowing passengers to arrive at their destination well-rested. The bed width and length accommodate various body types, ensuring a cozy experience during long-haul flights.

Seat Specifications

Key specifications of the business class seats on the ANA 787-9 include:

- Seat width: Approximately 23 inches
- Seat pitch: Up to 78 inches when fully reclined
- Personal storage space: Ample room for personal items
- Power outlets: Universal charging ports and USB connections

In addition to these features, each seat is equipped with a large personal entertainment screen, allowing passengers to enjoy a wide selection of movies, TV shows, and music during their flight. The intuitive entertainment system is user-friendly and offers various language options, catering to an international clientele.

In-Flight Amenities

Traveling in the All Nippon Airways 787-9 business class comes with an array of in-flight amenities designed to enhance passenger comfort and convenience. Each passenger is provided with a plush blanket and a high-quality pillow, ensuring a restful sleep. The cabin crew is trained to maintain a comfortable cabin environment, including optimal temperature and lighting adjustments.

Additional Amenities

Key in-flight amenities include:

- Noise-canceling headphones for an immersive entertainment experience
- Welcome drinks and a selection of beverages available throughout the flight
- Wi-Fi connectivity for passengers who need to stay connected
- Business facilities, including printing and scanning services (available on select flights)

Passengers can also expect luxury amenity kits that contain high-quality toiletries and skincare products, reflecting ANA's commitment to passenger comfort and well-being during the flight.

Culinary Experience

The culinary offerings in the All Nippon Airways 787-9 business class are a highlight of the journey, showcasing a blend of Japanese and international cuisine. The airline collaborates with renowned chefs to curate a seasonal menu that features locally sourced ingredients, providing passengers with an authentic taste of Japan.

Dining Options

Dining in business class typically includes:

- A multi-course meal service, with options for both Western and Japanese cuisine
- A selection of fine wines and beverages, including sake
- In-flight snacks available upon request
- Special meal options for dietary restrictions, available upon prior request

Passengers can enjoy their meals on elegant tableware, enhancing the dining experience. The attentive cabin crew ensures that all needs are met, from meal preferences to drink refills, making the culinary journey as enjoyable as the destination.

Service Excellence

All Nippon Airways prides itself on its outstanding service quality, which is a defining characteristic of the airline. The cabin crew is known for their professionalism, attention to detail, and warm hospitality, reflecting the Japanese ethos of service. Each flight is staffed with well-trained personnel who are dedicated to providing a seamless travel experience.

Personalized Service

Key aspects of the service experience in the ANA 787-9 business class include:

- Warm welcome upon boarding and assistance with luggage
- Personalized greetings and attentive service throughout the flight
- Regular check-ins to ensure passenger comfort
- Post-flight follow-up for feedback and suggestions

This level of service not only makes the flight enjoyable but also fosters a sense of loyalty among frequent travelers. Passengers can expect a consistent and high standard of service on every journey.

Conclusion

The All Nippon Airways 787-9 business class exemplifies luxury travel, offering an impressive combination of comfort, amenities, and exceptional service. From the thoughtfully designed cabin layout to the gourmet dining experience and attentive crew, every aspect of the journey is tailored to provide an unparalleled travel experience. Whether you are traveling for business or leisure, flying in ANA's 787-9 business class ensures that you arrive at your destination refreshed and satisfied.

Q: What is the configuration of the All Nippon Airways 787-9 business class seating?

all nippon airways 787 9 business class: *The Economic Geography of Air Transportation* John T. Bowen, 2010-04-05 Drawing upon hundreds of mainly secondary sources, this book answers three questions: how did air transportation develop in the century after the Wright Brothers, what does it mean to live in an airborne world, and what is the future of aviation in this century?

all nippon airways 787 9 business class: Project Finance B Rajesh Kumar, 2022-05-03 Large projects are defining moments for companies and countries. When large projects succeed, they can dramatically improve the social and economic conditions in a region. This book focuses on major aspects of the world's largest infrastructural, industrial and public service projects through the lens of structuring, valuing, managing risk and financing projects. The book analyses and discuss large projects in government, private and public and private partnership. The author sheds light into the attributes of project finance which have unique structural elements. The book focuses on case

studies related to 50 mega projects which includes infrastructural projects, energy related projects, industrial projects, roads, ports and bridges among others. This book covers both the theoretical aspects of financing of mega projects and the practical applications by including case studies of the world's largest projects in terms of value.

all nippon airways 787 9 business class: Flying Off Course Rigas Doganis, 2019-01-10

Aviation is one of the most widely talked about industries in the global economy and yet airlines continue to present an enigma. Between 2010 and 2018 the global airline industry experienced its longest period of sustained profitability; however, huge global profits hid a darker side. Many airlines made inadequate profits or serious losses while others collapsed entirely. This fifth edition of Flying Off Course explains why. Written by leading industry expert, Rigas Doganis, this book is an indispensable guide to the inner workings of this exciting industry. Providing a complete, practical introduction to the fundamentals of airline economics and marketing, it explores the structure of the market, the nature of airline costs, issues around pricing and demand, and the latest developments in e-commerce. Vibrant examples are drawn from passenger, charter and freight airlines to provide a dynamic view of the entire industry. This completely updated edition also explores the sweeping changes that have affected airlines in recent years. It includes much new material on airline alliances, long-haul low-cost airlines, new pricing policies and ancillary revenues in order to present a compelling account of the current state of the airline industry. Offering a practical approach and peppered with real examples, this book will be valuable to anyone new to the airline industry as well as those wishing to gain a wider insight into its operations and economics. For undergraduate or postgraduate students in transport studies, tourism and business the book provides a unique insider's view into the workings of this exciting industry.

all nippon airways 787 9 business class: Global Air Transport Management and Reshaping

Business Models for the New Era Kankaew, Kannapat, 2022-05-27 The air transport industry is highly vulnerable to environmental changes as was seen when the recent COVID-19 pandemic caused most airline operations to cease. However, for decades airlines have been collapsing around the globe as the business of managing airline operations has become stressed due to price competition. This is detrimental to air carriers since air transport products and services are the same. Moreover, it impacts other industries such as tourism, hotels, and restaurants, which contribute to the derailment of economic and social activities. Thus, it is essential to determine new practices and strategies that can allow air transport management to be enriched and to flourish. Global Air Transport Management and Reshaping Business Models for the New Era provides a comprehensive collection of knowledge on the new era of business management on air transport. It provides strategies, technologies, and tools used in the reshaping of the air transport business model. Covering topics such as customer experience, robotic process automation, and airline alliances, this major reference work is an essential resource for airline managers, supply chain specialists, air transport managers, students and faculty of higher education, libraries, researchers, economists, government officials, and academicians.

all nippon airways 787 9 business class: Havayollarında hizmet: konfor, faaliyet ve performans ilişkisinin değerlendirilmesi Dr. Tüzün Tolga İNAN, 2019-10-20 17 Aralık 1903 tarihinde Wright Kardeşlerin ilk başarılı motorlu uçuş denemesiyle başlayan sivil havacılık tarihi günümüzde dünyanın en büyük endüstrilerinden biri haline gelmiştir. Her ne kadar 2003 yılına kadar ülkemiz için sivil havacılık büyük bir aşama kaydetmese de, 2003 yılından sonra milat niteliğinde gelişmeler gerçekleşmiştir. Doktor ünvanını aldığım halen sivil havacılık alanında lisanslandırmaya sahip tek Üniversite olan Anadolu Üniversitesi ile başlayan sivil havacılık alanında ihtisas veren Üniversite ve Meslek Yüksekokulları, özellikle 2011 yılından itibaren sayıca üst limitlere ulaşmıştır. Ancak unutmamak gerekir ki, havacılık bir nevi aşkla ifa edilmesi gereken bir meslektir. İçerisinde pilotaj, hat ve bakım teknisyenliği, uçuş hareket yöneticiliği (dispeçerlik), uçuş ve misafir kontrol uzmanlığı, kabin, hareket, yolcu hizmetleri ve kargo memurluğu olmak üzere birçok iş tanımı bulundurmaktadır. Kendim için düşündüğüm zaman bana havacılığı sevdiren kişi babam olmuştur. Özellikle sektörel olarak 30 yılın üzerinde Türk Hava Yolları tecrübesinin

bulunması ve beni havacılık alanında doktora yapmaya itmesi kariyerim için en önemli adımlardan bir tanesi oldu. Tabii herşey burada anlatmak istediğim kadar güllük gülistanlık olmamakla birlikte, vardiyalı çalışma düzeni ve yoğun tempo havacılığın olmazsa olmazıdır. Bu nedenle öğrencilere ve bu alanda kariyer yapmak isteyenlere tavsiyem, havacılığın para için yapılacak bir meslek olmadığının bilincinde olmaları gerektiğidir. Bu kitabı yayımlama sebeplerimden bir tanesi de kamuoyu tarafından bilinmeyen ya da bilindiği zannedilen bu endüstride hizmet-konfor ve performans parametrelerinin ne olduğunun ve bir havayolu şirketini hangi ölçüde etkilediğini göstermek istememdir. Bu kitap umarım hem akademik hem de sektörel camiada tüm havacılık çalışanlarına ve havacılık sevdalılarına faydalı olacak bir eser olacaktır. Unutmamak gerekir ki burada önemli olan konu 5 yıllık değerler ile 2016 yılında hangi verilerin elde edildiği değil, bu verilerin havacılık şirketleri için öneminin farkına varılması olacaktır.

all nippon airways 787 9 business class: Air Transport in the Asia Pacific David Timothy Duval, 2016-03-16 Air transport in the Asia Pacific has undergone significant transformation in the last three decades. What was once a region in the shadow of larger and more prosperous continents such as North America and Europe is now at the forefront of expansion in commercial air-service networks, frequency and capacity, and the overall growth in the contribution of air transport to economies on regional and, in many cases, individual country levels. Despite this, it represents an area that is generally under-represented in the commercial air-transport academic literature. Air Transport in the Asia Pacific seeks to fill this gap. Against this context, the aim of the volume is to offer a contemporary snapshot of current academic research into commercial air transport in the Asia Pacific. While one volume cannot realistically address the complete range of identifiable issues, this book provides timely, specific and research-based studies authored by leading academics and practitioners.

all nippon airways 787 9 business class: Jetliner Cabins Jennifer Coutts Clay, 2006-03-24 Describes the high art and technical bravura behind creating some of the smallest living spaces in the world. With photographs of aircraft interiors from leading carriers, this book fully details the variety, as well as the creative breadth, behind them.

all nippon airways 787 9 business class: Air Transportation John Wensveen, 2016-03-09 Air Transportation: A Management Perspective by John Wensveen is a proven textbook that offers a comprehensive introduction to the theory and practice of air transportation management. In addition to explaining the fundamentals, the book transports the reader to the leading edge of the discipline, using past and present trends to forecast future challenges and opportunities the industry may face, encouraging the reader to really think about the decisions a manager implements. Written in an easy-to-read, easy-to-understand style, the Eighth Edition modernizes the text focusing on newly emerging management trends, innovative technology, and an increased emphasis on global changes in the industry that will change the future of aviation. New and updated material has been added throughout the text including mini case examples and supplemental presentation materials for each chapter. Air Transportation: A Management Perspective is suitable for almost all aviation programs that feature business and management. Its student-friendly structure and style make it highly suitable for modular courses and distance-learning programs, or for self-directed study and continuing personal professional development.
