adt business alarm systems: Growing an Entrepreneurial Business Edward Hess, 2011-02-01
Growing an Entrepreneurial Business: Concepts and Cases is a textbook designed for courses that focus on managing small to medium sized enterprises. It focuses on the major management challenges that successful start-ups encounter when leaders decide to grow and scale their businesses. The book is divided into two parts—text and cases—to provide professors with maximum flexibility in organizing their courses. The thirty-five cases can be used in conjunction with the text, or independently. Twelve cases are written as narratives with multiple teaching points, but without a focus on a particular business decision; the remaining twenty-three cases were written around specific conundrums related to strategy, operations, finance, marketing, leadership, culture, human resources, organizational design, business model, and growth. Discussion questions are provided for each case. The text portion of the book discusses key issues derived from the author's research and consulting, and is meant to complement the case method of teaching, raising issues for conversation. In addition to the real-world knowledge that students will derive from the cases, readers will take away research-based templates and models that they can use in developing or consulting with small businesses.

adt business alarm systems: Smart Growth Edward D. Hess, 2010 Wall Street believes that all public companies should grow smoothly and continuously, as evidenced by ever-increasing quarterly earnings, and that all companies either grow or die. Introducing a research-based growth model called Smart Growth, Edward D. Hess challenges this ethos and its dangerous mentality, which often deters real growth and pressures businesses to create, manufacture, and purchase noncore earnings just to appease Wall Street. Smart Growth accounts for the complexity of growth from the perspective of organization, process, change, leadership, cognition, risk management, employee engagement, and human dynamics. Authentic growth is much more than a strategy or a desired result. It is a process characterized by complex change, entrepreneurial action, experimental learning, and the management of risk. Hess draws on extensive public and private company research, incorporating case studies of Best Buy, Sysco, UPS, Costco, Starbucks, McDonalds, Coca Cola, Room & Board, Home Depot, Tiffany & Company, P&G, and Jet Blue. With conceptual innovations such as an Authentic Earnings and Growth System framework, a seven-step growth funnel pipeline, a Growth Decision Template, and a Growth Risks Audit, Hess provides a blueprint for an enduring business that strives to be better, rather than simply bigger.
