albany business review: The City Authentic David A. Banks, 2023-04-25 The first book to explore how our cities gentrify by becoming social media influencers—and why it works. Cities, like the people that live in them, are subject to the attention economy. In *The City Authentic*, author David A. Banks shows how cities are transforming themselves to appeal to modern desires for authentic urban living through the attention-grabbing tactics of social media influencers and reality-TV stars. Blending insightful analysis with pop culture, this engaging study of New York State's Capital Region is an accessible glimpse into the social phenomena that influence contemporary cities. The rising economic fortunes of cities in the Rust Belt, Banks argues, are due in

part to the markers of its previous decay—which translate into signs of urban authenticity on the internet. The City Authentic unpacks the odd connection between digital media and derelict buildings, the consequences of how we think about industry and place, and the political processes that have enabled a new paradigm in urban planning. Mixing urban sociology with media and cultural studies, Banks offers a lively account of how urban life and development are changing in the twenty-first century.

albany business review: Regional Renaissance Charles W. Wessner, Thomas R. Howell, 2019-09-14 This book examines ways in which formerly prosperous regions can renew their economy during and after a period of industrial and economic recession. Using New York's Capital Region (i.e., Albany, Troy, Schenectady, etc.) as a case study, the authors show how entrepreneurship, innovation, investment in education, research and political collaboration are critical to achieving regional success. In this way, the book provides other regions and nations with a real-life model for successful economic development. In the past half century, the United States and other nations have seen an economic decline of formerly prosperous regions as a result of new technology and globalization. One of the hardest-hit United States regions is Upstate New York or "the Capital Region"; it experienced a demoralizing hemorrhage of manufacturing companies, jobs and people to other regions and countries. To combat this, the region, with the help of state leaders, mounted a decades-long effort to renew and restore the region's economy with a particular focus on nanotechnology. As a result, New York's Capital Region successfully added thousands of well-paying, skill-intensive manufacturing jobs. New York's success story serves as a model for economic development for policy makers that includes major public investments in educational institutions and research infrastructure; partnerships between academia, industry and government; and creation of frameworks for intra-regional collaboration by business, government, and academic actors. Featuring recommendations for best practices in regional development policy, this book is appropriate for scholars, students, researchers and policy makers in regional development, innovation, R&D policy, economic development and economic growth.

albany business review: The Last American Newspaper Ken Tingley, 2022-08-30 This book reveals what is happening in small communities across the United States as their newspapers struggle to survive. It is a celebration not just of journalism, but of the inspirational people who do it and the news and events of small towns. Importantly, it asks the question: who will be the community watchdog of the future? This book memorializes the American newspaper through the story of the Post-Star of Glens Falls, NY. The author, a devoted veteran of the Post-Star, compiles a series of vignettes that depict the newspaper's coverage over the years. They provide a glimpse behind the newsroom curtain through the stories of the investigative journalism done in small towns.

albany business review: Media Ethics at Work Lee Anne Peck, Guy S. Reel, 2016-08-31 A fresh approach to building integrity in all media Media Ethics at Work: True Stories from Young Professionals (By Lee Anne Peck and Guy S. Reel) transforms students into confident, self-reliant, and ethical decision makers, prepared to resolve moral dilemmas from day one of their first media job or internship. The highly anticipated Second Edition of this text continues to engage students with true stories of young professionals working in today's multimedia news and strategic communications organizations, helping readers create meaningful connections to real-world applications. Each story is presented as a narrative, so students can work through the ethical dilemmas as they unfold, encouraging readers to think about and ask the question: "What would I do if this happened to me?" By creating a more personalized experience for students beginning their first entry-level media jobs or internship, this book helps readers develop their own ethical standards and apply in the workplace what they have learned.

albany business review: FOIL Brett Orzechowski, 2018-03-23 The Freedom of Information Law allows any person to request and obtain, without explanation or justification, existing, identifiable, and unpublished governmental records, including documents, data, and video. Signed into law in New York in 1974, FOIL remains a powerful public panacea in unlocking information and maintaining vital transparency in our state government. Databases detailing public employee compensation, online viewing of highway department agreements and school district superintendents' contracts, and text message exchanges—all disclosed and made public through FOIL requests—are now common, as the last decade has ushered in an increased demand for public information. Orzechowski guides readers through the creation of the law and the concept of open government in the twenty-first century, offering a foundational understanding of how the legislation

works, who is exempt, and how the law was created for every citizen of New York State. Dozens of perspectives—from state senators to a Pulitzer Prize winner to watchdog organizations—outline the impact of New York State's law. Orzechowski examines the drafting of current legislation to strengthen the existing law and offers perspectives from those who are confronted with the real challenges of accessing public information every day: journalists, attorneys, and citizens. This exploration of FOIL, including narrative, scholarly examination, and how-to guides, serves as a tour of a law that continues to impact residents across the state.

albany business review: Higher Calling Scott C. Beardsley, 2017-09-12 A revolution has been taking place in the ranks of higher education. University and college presidents—once almost invariably the products of traditional scholarly, tenure-track career paths, up through the provost's office—are rapidly becoming a group with diverse skills and backgrounds. The same is true for many deans and administrative leaders. In *Higher Calling: The Rise of Nontraditional Leaders in Academia*, Scott C. Beardsley, dean of the University of Virginia's prestigious Darden School of Business, offers a new vision of leadership for today's higher education. Grounded in the author's own inspirational story of leaving McKinsey & Company in pursuit of a new source of meaning in his professional life, *Higher Calling* employs research gathered from search firm executives who now play king or queen maker in presidential and dean searches. It also takes into account information from U.S. liberal arts colleges—considered by many to be the bellwethers of change—to explore what set of strengths an institution of higher education needs in a leader in the twenty-first century. Beardsley explores the widely varying definitions and associated numbers of traditional and nontraditional leaders and asks, Why are U.S. colleges and universities hiring nontraditional candidates to lead them into the future? How are the skills required to lead higher education institutions changing? Or has the search process changed, resulting in a more diverse set of candidates? Providing not only an analysis of nontraditional leaders in higher education but also strategies for developing skills and selecting leaders, Beardsley offers a wealth of information for the modern university in the face of change.

albany business review: Social Enterprise and Special Events Julie Olberding, 2016-11-25 During the past twenty years, the field of nonprofit management has grown significantly in terms of the number of nonprofit organizations, number of people employed, and amount of funds raised. A key activity in nonprofit management has been organizing events, which are generally defined as purposive gatherings of people. These purposes may include: increasing awareness about the nonprofit organization and its mission; raising funds to support programs and services related to its mission; engaging and developing individuals as donors, volunteers, and advocates; and enhancing the image of the organization and/or the broader community. Events in the modern era tend to be organized across the nonprofit, public, and private sectors. While a nonprofit organization may create and manage an event, corporations and businesses often contribute financial support and technical expertise in areas such as branding, marketing, and social media. Depending on the event type and size, a local government may provide the venue and public safety services, including police, fire, and ambulance. We can understand more about these mission-driven, cross-sectoral events by looking through the lens of social enterprise. Social enterprise has been defined as a venture that advances a social mission using business methods or market-based approaches. It is typically conceptualized as spanning sectors, particularly the nonprofit and private sectors. *Social Enterprise and Special Events* focuses on how market-based approaches can be used to help mission-driven gatherings achieve their purposes as efficiently, effectively, and sustainably as possible. These approaches include market research, brand development, cause marketing, gamification, liquidity, cash management, and clustering. The book also incorporates concepts important in the nonprofit and public sectors such as collaborative governance, social capital, political capital, community development, placemaking, and diversity.
