american international business class: International Business Travel in the Global Economy
Ben Derudder, Frank Witlox, 2016-05-23 Business travel has become indispensable to the global economy, not only due to its necessity in the maintaining of corporate networks, but also because of the associated economies that cater to the daily requirements of the business traveller. Underlying these developments are concerns over the environmental impact of increasing air travel, which are likely to generate new challenges for the future of business travel. From a team of international experts comes this analysis of the role, nature and effects of modern business travel. Issues addressed include the relationships between airlines and business travellers, the role of mobility in business, and the opportunities and challenges created by mobile workforces. The study combines theoretical advances with comprehensive analysis, and will provoke debate across the social sciences on the nature, organization and space of work in the twenty-first century.

american international business class: American International Law Cases , 2007

american international business class: **AMERICAN INTERNATIONAL LAW CASES Fourth Series 2009 VOLUME 5** , 2011-01-06 AILC is an annual case law reporter that provides the

full text of U.S. court opinions involving international law issues. The courts covered include all U.S. federal district courts, federal appellate courts, and the U.S. Supreme Court, as well as some state courts, the U.S. Court of Claims, the U.S. Court of International Trade, and the U.S. Tax Court. The series seeks to provide not every single case in which a court refers to international law but rather all cases that analyze at least one international law issue in depth. The list of subjects addressed by these volumes is vast and changes from year to year, with the inclusion and prominence of most topics turning on their prevalence in a given year's jurisprudence. Some consistently prominent topics are personal jurisdiction over foreign defendants, deportation procedure, and double taxation. Over the last three editions (2006, 2007, and 2008), many topics have developed rapidly and constitute a correspondingly larger portion of the volumes, particularly Terrorism, the Foreign Sovereign Immunities Act, Forum Non Conveniens, and an entirely new, added topic: the National Security Exception (to deportation eligibility). The 2008 edition of AILC also features expanded sections on family law and on the detention of terrorist suspects. The U.S. war on terror and the crisis at Guantanamo have made that last topic a significant and dynamic component of AILC. Each edition of AILC also comes framed with two practical resources for students and scholars. The first is an introductory editor's note that both reviews international law's major developments for the given year and explains to readers how to use the volumes. The second is a subject index to allow for targeted research. Volume Five of AILC covers procedural aspects, the Foreign Sovereign Immunities Act and the commercial exception, the Act of State Doctrine, U.S. Sovereign Immunity, and the Alien Tort Claim Act. In *Sonia Ghawanmeh v. Islamic Saudi Academy*, an issue was whether the Kingdom of Saudi Arabia's operation of the Islamic Saudi Academy constitutes commercial activity under the Foreign Sovereign Immunities Act. An issue in *Vishranthamma Swarna v. Badar al-Awadi* was whether the individual defendants, by virtue of their diplomatic immunity, or Kuwait, by virtue of its sovereign immunity, are immune from any or all of the plaintiff's claims. The plaintiff brought claims under international law for trafficking, involuntary servitude, enslavement, forced labor, and sexual slavery.

american international business class: Rotary International and the Selling of American Capitalism Brendan Goff, 2021-07-06 Rotary International spreads America's good news. The organization spent the interwar years convincing Main Street and the world at large that America's promise lay in cooperation and service under capitalism, values that could knit the globe together. In the process, Brendan Goff argues, Rotary became an extension of US power.

american international business class: *Constructing Identities in Mexican-American Political Organizations* Benjamin Márquez, 2009-09-15 A Choice Outstanding Academic Book, 2002 The formation of a group identity has always been a major preoccupation of Mexican American political organizations, whether they seek to assimilate into the dominant Anglo society or to remain separate from it. Yet organizations that sought to represent a broad cross section of the Mexican American population, such as LULAC and the American G.I. Forum, have dwindled in membership and influence, while newer, more targeted political organizations are prospering—clearly suggesting that successful political organizing requires more than shared ethnicity and the experience of discrimination. This book sheds new light on the process of political identity formation through a study of the identity politics practiced by four major Mexican American political organizations—the Southwest Network for Environmental and Economic Justice, the Southwest Industrial Areas Foundation, the Texas Association of Mexican American Chambers of Commerce, and the Mexican American Women's National Association (now known as MANA—A National Latina Organization). Through interviews with activists in each organization and research into their records, Benjamin Marquez clarifies the racial, class-based, and cultural factors that have caused these organizations to create widely differing political identities. He likewise demonstrates why their specific goals

resonate only with particular segments of the Mexican American community.

american international business class: Arbitration of International Business Disputes

William W. Park, 2012-09-20 Arbitration of International Business Disputes 2nd edition is a fully revised and updated anthology of essays by Rusty Park, a leading scholar in international arbitration and a sought-after arbitrator for both commercial and investment treaty cases. This collection focuses on controversial questions in arbitration of trade, financial, and investment disputes. The essays address some of the most interesting topics in cross-border business dispute resolution, many of which have endured over several decades and remain subject to radically different views. Examples include the proper role of judicial review, the allocation of jurisdictional tasks, evolution of arbitration's statutory and treaty framework, free trade and bilateral investment agreements, and the balance between fixed rules and arbitral discretion. The book is structured around three themes: arbitration's legal framework; the conduct of arbitral proceedings; and a comparison of arbitration in specific fields such as finance, intellectual property, and taxation. In each of these areas, analysis includes the tensions between fairness and efficiency, and the accurate application of substantive law as well as the implications of mandatory procedural norms. Augmented by more than a dozen new contributions and a revised introduction, this 2nd edition retains all of its earlier practical and scholarly relevance, and includes a Foreword by V. V. (Johnny) Veeder QC.
