american business movie: The 5 Big Lies About American Business Michael Medved, 2010-11-02 WHY FEEL EMBARRASSED BY BUSINESS? Every American benefits every day from the phenomenal productivity of the free market, so why do so many people feel guilty or skeptical about our business system? In this passionately argued, eye-opening book, talk-radio star and bestselling author Michael Medved provides detailed and devastating rebuttals to the most widely circulated smears against capitalism. MYTH: Big business is bad, small business is good. TRUTH: Every big business began life as a small business, and every small business today yearns for enough success to become a big business tomorrow. For some products—like cars or electrical power—little companies can't benefit their workers or customers as reliably as huge corporations. MYTH: Business executives are overpaid and corrupt. TRUTH: Top leaders will always command top dollar, and a company can't limit executive pay without limiting its access to talent. Ferocious, long-term competition in the corporate world ultimately rewards focus and hard work, not short cuts and corruption. MYTH: You can count on better treatment from the government than from business. TRUTH: If a private company deals with you poorly, you can take your business elsewhere. But with the government's power, you get only two choices: compliance or jail. Medved responds to business-bashing lies with the slashing wit, irrefutable facts, fascinating historical nuggets, illuminating anecdotes, and liberating clarity that made him one of the top-ten talk-radio hosts in the United States. This audacious and urgently needed book provides energy and inspiration for a beleaguered free-market system poised for its unstoppable comeback.

american business movie: Encyclopedia of African American Business History Juliet E. K. Walker, 1999-11-30 Black business activity has been sustained in America for almost four centuries. From the marketing and trading activities of African slaves in Colonial America to the rise of 20th-century black corporate America, African American participation in self-employed economic activities has been a persistent theme in the black experience. Yet, unlike other topics in African American history, the study of black business has been limited. General reference sources on the black experience—with their emphasis on social, cultural, and political life—provide little information on topics related to the history of black business. This invaluable encyclopedia is the only reference source providing information on the broad range of topics that illuminate black business history. Providing readily accessible information on the black business experience, the encyclopedia provides an overview of black business activities, and underscores the existence of a historic tradition of black American business participation. Entries range from biographies of black business people to overview surveys of business activities from the 1600s to the 1990s, including slave and free black business activities and the Black Wallstreet to coverage of black women's business activities, and discussions of such African American specific industries as catering, funeral

enterprises, insurance, and hair care and cosmetic products. Also, there are entries on blacks in the automotive parts industry, black investment banks, black companies listed on the stock market, blacks and corporate America, civil rights and black business, and black athletes and business activities.

american business movie: *Career Movies* Jack Boozer, 2003-01-01 Achieving the American Dream became inextricably linked with career/business success after World War II, as an increasingly consumerist America learned to define the dream through possessions and status. Not surprisingly, Hollywood films in the postwar years reflected the country's preoccupation with work and career success, offering both dramatic and comedic visions of the career quest and its effects on personal fulfillment, family relations, women's roles, and the creation (or destruction) of just and caring communities. In this book, Jack Boozer argues that the career/business film achieved such variety and prominence in the years between 1945 and 2001 that it should be considered a legitimate film genre. Analyzing numerous well-known films from the entire period, he defines the genre as one in which a protagonist strives for career success that often proves to be either elusive despite hard work, or unfulfilling despite material rewards and status. Boozer also explores several distinct subgenres of the career movie—the corporate executive films of the 1950s; the career struggles of (single, married, and/or parenting) women; the entrepreneurial film as it is also embodied in texts about immigrants and racial and ethnic minorities and business-oriented femmes fatales; the explosion of promotionalism and the corporatization of employment; and, finally, the blurring of work and private life in the brave new world of the televirtuality film.

american business movie: *Movie-Made America* Robert Sklar, 2012-10-31 Hailed as the definitive work upon its original publication in 1975 and now extensively revised and updated by the author, this vastly absorbing and richly illustrated book examines film as an art form, technological innovation, big business, and shaper of American values. Ever since Edison's peep shows first captivated urban audiences, film has had a revolutionary impact on American society, transforming culture from the bottom up, radically revising attitudes toward pleasure and sexuality, and at the same time, cementing the myth of the American dream. No book has measured film's impact more clearly or comprehensively than *Movie-Made America*. This vastly readable and richly illustrated volume examines film as art form, technological innovation, big business, and cultural bellwether. It takes in stars from Douglas Fairbanks to Sly Stallone; auteurs from D. W. Griffith to Martin Scorsese and Spike Lee; and genres from the screwball comedy of the 1930s to the hard body movies of the 1980s to the independents films of the 1990s. Combining panoramic sweep with detailed commentaries on hundreds of individual films, *Movie-Made America* is a must for any motion picture enthusiast.

american business movie: *The Image in Early Cinema* Scott Curtis, Philippe Gauthier, Tom Gunning, Joshua Yumibe, 2018-03-22 In *The Image in Early Cinema*, the contributors examine intersections between early cinematic form, technology, theory, practice, and broader modes of visual culture. They argue that early cinema emerged within a visual culture composed of a variety of traditions in art, science, education, and image making. Even as methods of motion picture production and distribution materialized, they drew from and challenged practices and conventions in other mediums. This rich visual culture produced a complicated, overlapping network of image-making traditions, innovations, and borrowing among painting, tableaux vivants, photography, and other pictorial and projection practices. Using a variety of concepts and theories, the contributors explore these crisscrossing traditions and work against an essentialist notion of media to conceptualize the dynamic interrelationship between images and their context.
