angelo bruno business library: Business Librarianship and Entrepreneurship Outreach

Karen MacDonald, Hal Kirkwood, 2014-03-05 The changing landscape of business information has created opportunities for business librarians to move beyond being reactive to business information needs to become proactive participants in business development and entrepreneurship instruction. Libraries are no longer only repositories of books but information -rich sources of business and economic data. The case studies presented within this book highlight a variety of examples on entrepreneurship education and local economic development. The examples presented serve as a catalyst for further entrepreneurial endeavours and highlight the growing need for effective value-added support in finding business information. Business librarians play a critical role in promoting the effective use of business information and in providing significant value-added services within university and community settings. This book was published as a special double issue of the Journal of Business & Finance Librarianship.

angelo bruno business library: Forms of Persuasion Alex J. Taylor, 2022-03-15 Forms of Persuasion is the first book-length history of corporate art patronage in the 1960s. After the decline of artist-illustrated advertising but before the rise of museum sponsorship, this decade saw artists and businesses exploring new ways to use art for commercial gain. Where many art historical accounts of the sixties privilege radical artistic practices that seem to oppose the dominant values of capitalism, Alex J. Taylor instead reveals an art world deeply immersed in the imperatives of big business. These projects unfolded in Madison Avenue meeting rooms and MoMA galleries, but as the most creative and competitive corporations sought growth through global expansion, they also reached markets all around the world. From Andy Warhol's commissions for packaged goods manufacturers to Richard Serra's work with the steel industry, Taylor demonstrates how major artists of the period provided brands with forms of persuasion that bolstered corporate power, prestige, and profit. Drawing on extensive original research conducted in artist, gallery, and corporate archives, Taylor recovers a flourishing field of promotional initiatives that saw artists, advertising creatives, and executives working around the same tables. As museums continue to grapple with the ethical dilemmas posed by funding from oil companies, military suppliers, and drug manufacturers, Forms of Persuasion returns to these earlier relations between artists and multinational corporations to examine the complex aesthetic and ideological terms of their enduring entanglements--

angelo bruno business library: Shipwrecked Jamin Wells, 2020-10-07 Reframing the American story from the vantage point of the nation's watery edges, Jamin Wells shows that disasters have not only bedeviled the American beach — they created it. Though the American beach is now one of the most commercialized, contested, and engineered places on the planet, few people visited it or called it home at the beginning of the nineteenth century. By the twentieth century, the

American beach had become the summer encampment of presidents, a common destination for millions of citizens, and the site of rapidly growing beachfront communities. Shipwrecked tells the story of this epic transformation, arguing that coastal shipwrecks themselves changed how Americans viewed, used, and inhabited the shoreline. Drawing on a broad range of archival material — including logbooks, court cases, personal papers, government records, and cultural ephemera — Wells examines how shipwrecks laid the groundwork for the beach tourism industry that would transform the American beach from coastal frontier to oceanfront playspace, spur substantial state and private investment alongshore, reshape popular ideas about the coast, and turn the beach into a touchstone of the American experience.
