az business journal: Route 66 and the Formation of a National Cultural Icon Daniel Milowski, 2023-12-06 During the twentieth century, Route 66 became a national icon and was commonly associated with classic American cuisine, road trips, and the golden age of postwar American prosperity. This conception, however, is mythic. The reality of Route 66 travel was congestion, danger, and racism. Route 66 and the Formation of a National Cultural Icon: Mother Road to Mythic American Byway by Daniel Milowski explores the divergence between Route 66 myth and reality and provides a critical examination of the cultural origins of the Route 66 myth and the road's historical role in community development in the American West. Milowski discusses how Route 66 became so clogged with traffic in the 1960s that it garnered the dark nickname "Bloody 66" due to the high volume of serious traffic accidents. He examines rampant racism at travel businesses and racialized policing in many towns along the highway. Finally, he contrasts this with the myth of Route 66 which incorporates aspects of cultural nostalgia for supposedly simpler times while representing Route 66 as emblematic of a past "more authentic America." Milowski demonstrates that the history of Route 66 and its towns is deeper and more nuanced than the Route 66 myth allows.

az business journal: The Future of the Suburban City Grady Gammage, 2016-04-05 This book looks at the promise of the suburban city as well as the challenges. He argues that places that grew up based on the automobile and the single-family home need to dramatically change and evolve. But suburban cities have some advantages in an era of climate change, and many suburban cities are already making strides in increasing their resilience. Gammage focuses on the story of Phoenix, which shows the power of collective action -- government action -- to confront the challenges of geography and respond through public policy. He takes a fresh look at what it means to be sustainable and examines issues facing most suburban cities around water supply, heat, transportation, housing, density, urban form, jobs, economics, and politics.

az business journal: SWAT Madness and the Militarization of the American Police Jim Fisher, 2010-09-02 With the immediacy of a daily newspaper, this book reveals how the irresponsible use of SWAT teams, shock-and-awe policing, and the increasing militarization of American law enforcement is changing the face of the land of the free. In the United States, military-style police enforcement is fast becoming the norm—even the smallest police departments now field costly SWAT units. While the fact that police forces have increased capabilities to deal with urgent or dangerous situations may seem positive, this type of aggressive response is problematic; court settlements regarding excessive SWAT raids cost law enforcement agencies millions of dollars every year, not to mention that these brute-force strategies often traumatize, injure, and kill innocent people. This book takes an unprecedented look into the realities of zero-tolerance, militaristic policing, the tactics and equipment used, the problematic crime warrior mindset at play, and the statistical evidence of its ineffectiveness. The author's professional experience in criminology and scholarly knowledge of the topic enables him to candidly address common concerns about utilizing paramilitary law enforcement and special weapons and tactics (SWAT) units in routine, low-risk police work, such as the general loss of freedom, the often tragic results of excessive force, and the effects on race relations.

az business journal: Politics in Color and Concrete Krisztina Fehérváry, 2021-12-22 A historical anthropology of material transformations of homes in Hungary from the 1950s to the 1990s. Material culture in Eastern Europe under state socialism is remembered as uniformly gray, shabby, and monotonous—the worst of postwar modernist architecture and design. Politics in Color and Concrete revisits this history by exploring domestic space in Hungary from the 1950s through the 1990s and reconstructs the multi-textured and politicized aesthetics of daily life through the objects, spaces, and colors that made up this lived environment. Krisztina Fehérváry shows that contemporary standards of living and ideas about normalcy have roots in late socialist consumer

culture and are not merely products of postsocialist transitions or neoliberalism. This engaging study decenters conventional perspectives on consumer capitalism, home ownership, and citizenship in the new Europe. A major reinterpretation of Soviet-style socialism and an innovative model for analyzing consumption. —Katherine Verdery, The Graduate Center, City University of New York *Politics in Color and Concrete* explains why the everyday is important, and shows why domestic aesthetics embody a crucially significant politics. —Judith Farquhar, University of Chicago The topic is extremely timely and relevant; the writing is lucid and thorough; the theory is complex and sophisticated without being overly dense, or daunting. I thoroughly enjoyed reading it. —Brad Weiss, College of William and Mary

az business journal: *Trying to Make It* Rajeev V. Gundur, 2022-08-15 *Trying to Make It* is R. V. Gundur's journey from the US-Mexico border to America's heartland, from America's prisons to its streets, in search of the true story of the drug trade and the people who participate in it. The book begins in the Paso del Norte area, encompassing the sister cities of Ciudad Juárez and El Paso, which has been in the public eye as calls for securing the border persist. From there, it moves on to Phoenix, which was infamously associated with the drug trade through a series of kidnappings. Finally, the book goes on to Chicago, which has been a lightning rod of criticism for its gangs and violence. Gundur highlights the similarities and differences that exist in the American drug trade within the three sites and how they relate to current drug trade narratives in the US. At each stop, the reader is transported to the city's historical and contemporary contexts of the drug trade and introduced to the individuals who have lived them. Drug retailers, street and prison gang members, wholesalers, and the law enforcement personnel who try to stop them offer readers a comprehensive look at how various illicit enterprises work together to supply the drugs that American users demand. Most importantly, through a combination of macro- and microlevel vantage points, and comparative analysis of three key sites in illicit drug operations, the stories in *Trying to Make It* remind us that the people involved in the drug trade, for the most part, do not deserve vilification. Far from being a seemingly uniform, widespread threat or an unlimited array of bogeymen and women, they are ordinary people, living ordinary lives, just trying to make it.

az business journal: *Aztlán Arizona* Darius V. Echeverría, 2014-03-27 *Aztlán Arizona* is a history of the Chicano Movement in Arizona in the 1960s and 1970s. Focusing on community and student activism in Phoenix and Tucson, Darius V. Echeverría ties the Arizona events to the larger Chicano and civil rights movements against the backdrop of broad societal shifts that occurred throughout the country. Arizona's unique role in the movement came from its (public) schools, which were the primary source of Chicano activism against the inequities in the judicial, social, economic, medical, political, and educational arenas. The word *Aztlán*, originally meaning the legendary ancestral home of the Nahuatl peoples of Mesoamerica, was adopted as a symbol of independence by Chicano/a activists during the movement of the 1960s and 1970s. In an era when poverty, prejudice, and considerable oppositional forces blighted the lives of roughly one-fifth of Arizonans, the author argues that understanding those societal realities is essential to defining the rise and power of the Chicano Movement. The book illustrates how Mexican American communities fostered a togetherness that ultimately modified larger Arizona society by revamping the educational history of the region. The concluding chapter outlines key Mexican American individuals and organizations that became politically active in order to address Chicano educational concerns. This Chicano unity, reflected in student, parent, and community leadership organizations, helped break barriers, dispel the Mexican American inferiority concept, and create educational change that benefited all Arizonans. No other scholar has examined the emergence of Chicano Movement politics and its related school reform efforts in Arizona. Echeverría's thorough research, rich in scope and interpretation, is coupled with detailed and exact endnotes. The book helps readers understand the issues surrounding the Chicano Movement educational reform and ethnic identity. Equally important, the author shows how residual effects of these dynamics are still pertinent today in

places such as Tucson.
