ba 787 9 business class: *Havayollarında hizmet: konfor, faaliyet ve performans ilişkisinin değerlendirilmesi* Dr. Tüzün Tolga İNAN, 2019-10-20 17 Aralık 1903 tarihinde Wright Kardeşlerin ilk başarılı motorlu uçuş denemesiyle başlayan sivil havacılık tarihi günümüzde dünyanın en büyük endüstrilerinden biri haline gelmiştir. Her ne kadar 2003 yılına kadar ülkemiz için sivil havacılık büyük bir aşama kaydetmese de, 2003 yılından sonra milat niteliğinde gelişmeler gerçekleşmiştir. Doktor ünvanını aldığım halen sivil havacılık alanında lisanslandırmaya sahip tek Üniversite olan Anadolu Üniversitesi ile başlayan sivil havacılık alanında ihtisas veren Üniversite ve Meslek Yüksekokulları, özellikle 2011 yılından itibaren sayıca üst limitlere ulaşmıştır. Ancak unutmamak gerekir ki, havacılık bir nevi aşkla ifa edilmesi gereken bir meslektir. İçerisinde pilotaj, hat ve bakım teknisyenliği, uçuş hareket yöneticiliği (dispeçerlik), uçuş ve misafir kontrol uzmanlığı, kabin, hareket, yolcu hizmetleri ve kargo memurluğu olmak üzere birçok iş tanımı bulundurmaktadır. Kendim için düşündüğüm zaman bana havacılığı sevdiren kişi babam olmuştur. Özellikle sektörel olarak 30 yılın üzerinde Türk Hava Yolları tecrübesinin bulunması ve beni havacılık alanında doktora yapmaya itmesi kariyerim için en önemli adımlardan bir tanesi oldu. Tabii herşey burada anlatmak istediğim kadar güllük gülistanlık olmamakla birlikte, vardiyalı çalışma düzeni ve yoğun tempo havacılığın olmazsa olmazıdır. Bu nedenle öğrencilere ve bu alanda kariyer yapmak isteyenlere tavsiyem, havacılığın para için yapılacak bir meslek olmadığına bilincinde olmaları gerektiğidir. Bu kitabı yayımlama sebeplerimden bir tanesi de kamuoyu tarafından bilinmeyen ya da bilindiği zannedilen bu endüstride hizmet-konfor ve performans parametrelerinin ne olduğunun ve bir havayolu şirketini hangi ölçüde etkilediğini göstermek istememdir. Bu kitap umarım hem akademik hem de sektörel camiada tüm havacılık çalışanlarına ve havacılık sevdalılarına faydalı olacak bir eser olacaktır. Unutmamak gerekir ki burada önemli olan konu 5 yıllık değerler ile 2016 yılında hangi verilerin elde edildiği değil, bu verilerin havacılık şirketleri için öneminin farkına varılması olacaktır.

ba 787 9 business class: *Marketing Technology as a Service* Laurie Young, Bev Burgess, 2010-05-24 Despite the fact that vast engineering networks are the foundations of modern society, the services that technology companies provide over them have been a relatively neglected area of study. As a result, marketing in some technology businesses has been depressingly tactical and inconsistent. Marketers with little experience, and even less professional training, run around presenting PowerPoint decks to each other, chasing after the latest fad and throwing erratic, changing activities at the market each quarter. Many work on the unchallenged assumption that markets are fast changing and that customers only want the lowest prices. Yet this industry has

liberated human imagination in the internet and convinced the world that they must have a PC and a mobile phone. Now, as a result of profound, relentless, global forces, some of the leading firms and greatest minds in it are at last turning their attention to service. With the advent of 'cloud computing' and radical changes in the engineering of some utilities, the marketing of services that are based on a technical infrastructure is about to become as important and sophisticated as in, say, consumer products. This book explores their story and experience. "I really enjoyed the book *From Products to Services* by Mr Laurie Young. Encouraged by it, Haier accelerated its changeover from a traditional product-driven to a more customer-centric company. This new book *Marketing Technology as a Service* is another major contribution to technology companies for the cultivation of service needs worldwide." – Mr Zhang Ruimin, CEO and Chairman, Haier Group, Beijing "Young and Burgess describe a shift in mindset and pragmatic techniques that are quite doable – Rae Sedel, MD, Global Technology Practice, Russell Reynolds Associates. "This book provides practical and insightful advice on how to use services to turn technology into value add solutions for real people – Rudy Provoost, CEO, Philips Lighting "Business leaders in India have been remarkably successful at offering technology based services like outsourcing across the world. Currently worth \$60 billion, they intend to reach \$300 billion by 2020. To succeed, the Indian business community must offer new value propositions and adapt to emerging trends, like cloud computing. Burgess and Young have put together the first comprehensive and practical guide for business leaders to meet their challenges of exponential growth." – Dr Mukesh Aghi, Chairman and CEO, Steria (India)

ba 787 9 business class: *The A to Z of Australia* James C. Docherty, 2010-04-01 The last continent to be claimed by Europeans, Australia began to be settled by the British in 1788 in the form of a jail for its convicts. While British culture has had the largest influence on the country and its presence can be seen everywhere, the British were not Australia's original populace. The first inhabitants of Australia, the Aborigines, are believed to have migrated from Southeast Asia into northern Australia as early as 60,000 years ago. This distinctive blend of vastly different cultures contributed to the ease with which Australia has become one of the world's most successful immigrant nations. The A to Z of Australia relates the history of this unique and beautiful land, which is home to an amazing range of flora and fauna, a climate that ranges from tropical forests to arid deserts, and the largest single collection of coral reefs and islands in the world. Through a detailed chronology, an introduction, appendixes, a bibliography, and cross-referenced dictionary entries on some of the more significant persons, places, and events; institutions and organizations; and political, economic, social, cultural, and religious facets, author James Docherty provides a much needed single volume reference on Australia, from its most unpromising of beginnings as a British jail to the liberal, tolerant, democracy it is today.

I expect that this book will inspire the next generation of innovators and problem solvers to tackle the challenges and opportunities of today and tomorrow, ensuring a future where technology serves humanity with utmost dependability and safety". Professor Way Kuo in the Foreword to *Design and Manufacturing Practices for Performability Engineering* There are several aspects involved when evaluating a system's performance, such as reliability, cost, quality, safety, maintainability, risks, and performance-related characteristics. Performability engineering provides a unified framework for integrating these aspects in a quantified manner, enabling informed decisions about a system.

However, this field faces the daunting task of unifying diversified disciplines and theories that address issues such as quality, reliability, availability, maintainability, and safety (QRAMS), as well as engineering characteristics, statistical data analysis, multi-criteria decision-making, and applications of deep and machine learning. This book documents the latest ideas presented by world leaders in the QRAMS domain. Through diverse chapters, this volume represents the vitality of QRAMS in performability engineering. Design and Manufacturing Practices for Performability Engineering serves as a useful resource for practicing engineers and researchers pursuing this challenging and relevant area for sustainable development. Readers will find the book: Describes network reliability measures and algorithms to evaluate them in an easily understandable manner; Introduces the notion of global cuts and their applications to evaluate reliability measures and flow network reliability, and provides a general framework for reliability evaluation; Serves as a valuable reference and primer in the area of network reliability; Offers up-to-date research in the field of network reliability. Audience Researchers and educators of reliability engineering, electrical, computer science, electronics, and communication engineering with their associated allied areas. Industry analysts and design engineers of engineering systems will also find this book valuable.
