Overview of the Barnard Business Major

The Barnard business major is designed to provide students with a robust foundation in business principles while emphasizing the importance of ethical leadership, social responsibility, and global perspectives. This program stands out for its focus on women's leadership in business, a feature that aligns with Barnard's mission as a women's liberal arts college. Students gain insights into various business disciplines, including finance, marketing, entrepreneurship, and management, which equips them with the skills necessary to excel in diverse business environments.

One of the key aspects of the Barnard business major is its integration with Columbia University's resources. Students benefit from access to a wide array of courses, faculty expertise, and extracurricular opportunities that enhance their learning experience. This collaboration enriches the program, enabling students to engage with a broader academic community and gain a competitive edge in the job market.

Curriculum Structure

Core Courses

The business major at Barnard requires students to complete a series of core courses that lay the groundwork for their business education. These core courses cover essential topics that every business professional should understand, including:

- Introduction to Business
- Financial Accounting
- Managerial Accounting
- Microeconomics and Macroeconomics
- Statistics for Business
- Business Law

These foundational courses are crucial for developing analytical thinking and problem-solving skills, which are vital in any business role. Additionally, students are encouraged to take electives that align with their interests and career aspirations, such as digital marketing, corporate finance, and international business.

Experiential Learning Opportunities

Experiential learning is a hallmark of the Barnard business major. Students are encouraged to engage in internships, co-ops, and project-based courses that provide hands-on experience in real-world business settings. Such opportunities not only reinforce classroom learning but also enable students to build valuable networks within the industry.

Internships are particularly emphasized, with resources available to help students secure positions in various sectors, including finance, consulting, and non-profit organizations. These experiences are instrumental in helping students apply theoretical knowledge to practical situations and develop key professional skills.

Unique Features of the Program

Women-Centric Leadership

At the heart of the Barnard business major is a commitment to fostering women's leadership in business. The program emphasizes the unique challenges and opportunities that women face in the professional world. Through various initiatives, including mentorship programs and leadership workshops, students are encouraged to develop their leadership styles and cultivate the confidence necessary to take on leadership roles.

Integration with Columbia University

Students in the Barnard business major have the unique advantage of accessing courses and resources at Columbia University. This integration allows them to benefit from a wider selection of courses, research opportunities, and exposure to industry leaders through guest lectures and networking events. The collaboration with Columbia enhances the academic experience and broadens students' perspectives on global business practices.

Career Opportunities

Graduates of the Barnard business major are well-prepared to enter a variety of fields. The comprehensive curriculum, combined with experiential learning opportunities, equips students with the skills and knowledge needed to excel in their chosen careers. Some of the most common career paths for graduates include:

A discussion of the early origins and history of organizational behavior follows. This is the most comprehensive coverage of how organizational behavior emerged and grew. It presents and evaluates the first generation theorists, whose work began during the first 20 years. The subject matter covered is motivation, leadership, and organizational decision making. The institutional culture of organizational behavior is discussed and a vision for the future of the field is stated. Here the early history and the evidence from the theories are brought together in an effort to assess the identity of organizational behavior and where it might be headed.

barnard business major: *Translating and Incorporating American Management Thought into Japan* Izumi Mitsui, Kazuhito Isomura, Yoshiyuki Takeuchi, 2022-10-11 This book focuses on the establishment process of the Japanese style of management (JSM). Traditionally, it has been widely believed that the JSM is native to Japan and consists of three pillars: lifetime employment, a seniority-based wage system, and company unions. This book opposes these traditional views on the JSM and argues that it has been shaped by the influence of management theories and ideas of other countries. The JSM has not only adopted the ideas and concepts of other countries, but also has refined, translated, and customized them to make such ideas and concepts acceptable in Japan. The hypothesis presented here is that in the postwar period of rapid growth, the JSM was a hybrid set of management theories and techniques greatly influenced by American ideas about management. This book concentrates on the impact of American management theories and ideas on the JSM. Taking the historical point of view, it clarifies that impact not only for academics but also for business people. The hypothesis propounded here is that some of those theories and ideas have been accepted whereas some of them have been rejected and eventually made irrelevant. The following issues are discussed: scientific management, the human relations school, Barnard's organizational theory, Drucker's management thoughts, strategic management, human resource management, and corporate culture.

barnard business major: Business Without Boundary James Gray, 1954 Business Without Boundary was first published in 1954. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. The firm of General Mills is probably best known to millions of people as the maker of Gold Medal Flour and as the progenitor of that first lady of the kitchen and the airwaves, Betty Crocker. But, although its greatest fame is as a flour miller, the company engages in a host of other activities that attest to the foresight and creative thinking of its executives. In fact, the sky seems to be the only limit as the company extends its sights upward in Operation Skyhook, a United States navy research project for which General Mills makes and launches into the stratosphere giant plastic balloons. James Gray relates not only the history of General Mills since its founding in 1928 but also the background of the major companies that merged to form the larger corporation: the Washburn Crosby Company of Minneapolis, the Sperry Company of San Francisco, the Kell group of Texas and Oklahoma mills, and the Larrowe Milling Company of Detroit. Anyone interested in advertising and promotion will find fascinating the accounts of the early successes in radio advertising, including the first use of singing commercials and the phenomenal rise of Betty Crocker (voted the second best-known woman in America!) The scientific and technical research that is a cornerstone of the modern corporation is described in detail, as is the development of the products control method, a General Mills innovation now widely adopted in industry. For those curious to understand how business expands, for those interested in a close-up of industrial leaders, for anyone who wants to sharpen his view of America at work, this is an important book.
