best autobiographies for business: State and Business in Modern Turkey Ayse Bugra, 1994-02-03 This book analyzes the factors that shape business activity in Republican Turkey and examines the presence of some of these factors in other societies with highly different cultures and histories. Bugra's premise is that neither the institutional framework nor the behavioral regularities of a market economy emerge spontaneously following principles of a universally rational behavior. Rather, these reflect societal characteristics to be shaped by policy measures that ensure the smooth functioning of the market mechanism. The author investigates the sociopolitical context of Turkish entrepreneurship by looking at the development of the private sector in the Republican period; policy process under successive Republican governments; socially defined features of the holding company, the typical big-business unit; and the nature of business associations in Turkey. Her analysis is relevant both to the study of business organization and to the study of structural change in late-industrializing countries and former socialist societies where the shortcomings of standard economic approaches are clear.

best autobiographies for business: *A Collective Biography of Twelve World-Class Leaders* John R. Shoup, 2005-03-14 This collective biography on twelve world-class leaders provides timeless principles on how families, as well as educational, civic, religious, and military organizations, can facilitate the development of exemplary leaders. The biographies and autobiographies of great leaders reveal the importance of an involved parent, happy childhood, plethora of apprenticeships, rich formal and informal education, a steady stream of prodigious patrons, gracious critics, and a favorable fate. In addition to biographical data, this study synthesizes the various trends in leadership studies to develop a comprehensive model. A coherent theory on leadership has been elusive because scholars have focused on specific parts of leadership without recognition of the whole. The biographical data and synthesis of various leadership theories demonstrates that leaders share similar story lines in their development. The seven identified influences and the three stages of leadership development outlined in the book illustrate themes necessary for true leadership qualities to emerge within an individual. This book is intended for anyone interested in developing exceptional leaders.

best autobiographies for business: Over the Top Michael Paris, 2004-10-30 During the Great War, books and stories for young men were frequently used as unofficial propaganda for recruitment and to sell the war to British youth as a moral crusade. Until now, this literature has been neglected by academics, but the image of the war these fictions created was remarkably enduring and, despite the appearance of post-war literature of disillusioned veterans, continued to shape the attitudes of the young well into the 1930s. This is the first detailed account of how adventure fiction represented the Great War for British boys between 1914 and the end of the war. Paris examines how such literature explained the causes of the war to boys and girls and how it encouraged young men to participate in the noble crusade on the Western Front and in other theaters. He explores the imagery of the trenches, the war in the air, and the nature of war in the Middle East and Africa. He also details the links between popular writers and the official literary propaganda campaign. The study concludes by looking at how these heroic images remained in print, enduring well into the inter-war years.
