best european airlines business class: *Air Transport in the 21st Century* John F. O'Connell, George Williams, 2016-12-05 Airlines are buffeted by fluctuating political and economic landscapes, ever-changing competition, technology developments, globalization, increasing deregulation and evolving customer requirements. As a consequence all sectors of the air transport industry are in a constant state of flux. The principle aim of this book is to review current trends in the airline industry and its related suppliers, thereby providing an insight into the forces that are changing its dynamics. The factors that are reshaping the structure of the industry are examined with a view to identifying the key issues whose impact will be critical in the future. The book features two very distinct sections. The first contains short contributions from industry executives at CEO/VP level from airlines, aircraft/engine manufacturers, safety and navigational provider organisations, who have set out their take of where the airline industry is heading. This commercial input sets the scene for the book and provides the bridge to the second section, which is composed of 18 chapters written by distinguished academic authors. Each chapter presents a valuable insight into a specific area of the air transport industry, including: airlines, airports, cargo, deregulation, the environment, navigation, strategy, information technology, security and tourism. The shared objective of the authors is to describe and explain the core competencies that are determining the current shape of the industry and to examine the forces that will change its direction going forward. The book is written in a management style and will appeal to all levels of personnel who work for airlines across the world. It is also written for airport authorities, aerospace manufacturers, regulatory and government transportation agencies, researchers and students of aviation management, transport studies, tourism and the wider air transport industry.

best european airlines business class: *A Europe of the Air?* Martin Staniland, 2008-06-09 This definitive book offers the first full study of the development of the European Union's air-transport policy. Crucial to both globalization and regional integration, commercial aviation, along with other transport industries, provides the logistics for business activities, political life, and contact between cultures. Paradoxically, however, the airline industry was one of the last to be liberalized in the process of European integration, and the creation of a single market in air transport was attended by sharp political disputes, unreconstructed nationalism, and persistent foot-dragging. Exploring the long struggle to create a Europe of the air through both regulatory change and airline strategizing, Martin Staniland examines the political bargains that have shaped a highly fragmented industry and its regulation. He argues that, rather than focusing on directives and regulations issuing from Brussels, students of integration should examine the ways in which the contentious interaction between leaders of an industry and relevant politicians and officials creates distinctive market orders. Such market orders enable firms to minimize the risks inherent in business, while allowing regulators to pursue the mandates of their organizations and to realize their notions of public interest. Economic integration is therefore an often-painful struggle to create a market order defined both by regulatory jurisdiction and by competition among firms. An invaluable case-study in industrial policy, this book will be essential reading for students of aviation, as well as for scholars interested in regulatory change and European integration.

best european airlines business class: *Food in the Air and Space* Richard Foss, 2014-12-11 In the history of cooking, there has been no more challenging environment than those craft in which humans took to the skies. The tale begins with meals aboard balloons and zeppelins, where cooking was accomplished below explosive bags of hydrogen, ending with space station dinners that were cooked thousands of miles below. This book is the first to chart that history worldwide, exploring the intricacies of inflight dining from 1783 to the present day, aboard balloons, zeppelins, land-based aircraft and flying boats, jets, and spacecraft. It charts the ways in which commercial travelers were lured to try flying with the promise of familiar foods, explains the problems of each aerial environment and how chefs, engineers, and flight crew adapted to them, and tells the stories of pioneers in the field. Hygiene and sanitation were often difficult, and cultural norms and religious practices had to be taken into account. The history is surprising and sometimes humorous—at times some ridiculous ideas were tried, and airlines offered some strange meals to try to attract passengers. It's an engrossing story with quite a few twists and turns, and this first book on the subject tells it with a light touch.

best european airlines business class: *Incumbent Inertia in Light of Disruptive Change in the Airline Industry: Causal Factors and Top Management Moderators* Oliver Viellechner, 2010-08-01 Oliver Viellechner addresses the response behavior of incumbent firms when facing discontinuous change by innovative business models. Almost always, this entails a problem of inertia, i.e. the sluggishness of incumbent response due to insecurity in deciding on an adequate response strategy. Viellechner investigates disruptive change in the European airline industry during the 1990s, when low-cost airlines severely challenged established carriers. By conducting four case studies, he identifies new causes of inertia and reveals the role of top management teams in improving incumbent firms' responsiveness. Viellechner's new book is relevant to both researchers and managers. It links concepts of strategy, organizational and psychological research and sheds light on the new competitive structure of an industry which has been repeatedly challenged by entrants and external shocks.

best european airlines business class: *Sustainability and Management* Kıymet Çalıyurt, Ülkü Yüksel, 2017-07-14 In the wake of the 1987 Brundtland Report, sustainable development has become key to the management systems within businesses, and a means by which companies can increase their long-term value. Being a 'sustainable company' increasingly means 'staying alive in business' and has become a necessity for all kinds of enterprises, from the micro-sized to global corporations. In more recent years, many companies, and indeed governments, have looked at sustainability as a means to combat the multiple challenges of environmental accidents, global warming, resource depletion, energy, poverty and pollution. However, being sustainable or maintaining sustainability is not an easy task for a company's management function. It needs continuous support and engagement from the board, the executive management, staff and other stakeholders alike. Additionally, it brings extra costs to the company in terms of hiring trained staff, organising continuous training in the company, publishing sustainability reports and subscribing to a rating system. Sustainability must be nourished by a company's board as well as by all of its departments, such as accounting, marketing and human resources. By the same token, it is not enough for a

company simply to declare itself a 'sustainable business' or rely on past measures and reputation; sustainability is an ongoing activity and one which has to be proved by periodically disclosing sustainability reports, according to international rating systems. In Sustainability and Management: An International Perspective, Kıymet Çaliyurt and Ülkü Yüksel bring together international authors from a variety of specialisations to discuss the development, aspects, problems, roadmap, trends and disclosure systems for sustainability in management. The result is a lively, insightful exposition of the field.
