Key Features of the Blue Business Plus Credit Card

The Blue Business Plus Credit Card from American Express offers several key features that make it a solid choice for small business owners. One of the standout features is the rewards program, which allows cardholders to earn points on every purchase. Specifically, cardholders earn 2x Membership Rewards points on the first \$50,000 spent each year, and 1x points on all other purchases. This tiered rewards system is particularly beneficial for businesses with fluctuating spending patterns.

Another important feature is the card's flexibility. The Blue Business Plus Credit Card has no predefined spending limit, which means that businesses can make larger purchases without worrying about exceeding a set credit limit.

This feature can be particularly advantageous for businesses that experience seasonal fluctuations in spending.

Additionally, the card includes various expense management tools, such as customizable employee cards and easy tracking of business expenses through the American Express mobile app. This helps business owners stay organized and manage their finances more effectively.

Benefits of the Blue Business Plus Credit Card

The benefits of the Blue Business Plus Credit Card from American Express are numerous and can greatly enhance a business's financial strategy. First and foremost, the rewards program is a major draw, allowing businesses to earn points that can be redeemed for travel, gift cards, or statement credits. This can translate into significant savings over time.

Furthermore, cardholders enjoy a 0% introductory APR on purchases and balance transfers for the first 12 months. This feature allows businesses to finance large purchases without incurring interest fees right away, providing an opportunity to manage cash flow more effectively.

The card also includes various travel benefits, such as access to car rental loss and damage insurance, and travel accident insurance, making it a great option for businesses that require frequent travel.

- No annual fee
- Flexible spending capability
- Expense management tools
- 0% introductory APR on purchases
- Comprehensive travel benefits

Drawbacks of the Blue Business Plus Credit Card

While the Blue Business Plus Credit Card from American Express offers many advantages, it is also essential to consider potential drawbacks. One notable limitation is the lack of bonus categories for earning 2x points. Cardholders only receive this rate for the first \$50,000 spent each year, after which all purchases earn 1x points. This may be less appealing to businesses that spend heavily in specific categories.

Another potential drawback is that the card does not offer any cash back rewards, which might be a priority for some business owners. Instead, the rewards are focused on earning Membership Rewards points, which may not be as immediately useful for businesses looking for cash flow management.

Additionally, while the card has no annual fee, businesses may incur foreign transaction fees when using the card outside of the United States, which can add up for frequent travelers.

How to Apply for the Blue Business Plus Credit Card

Applying for the Blue Business Plus Credit Card from American Express is a straightforward process. Interested applicants can visit the American Express website and fill out an online application form. The application will require basic information about the business, including the legal business name, address, and tax identification number.

Once the application is submitted, American Express will review the information provided and conduct a credit check. It is important to ensure that your business's credit profile is in good standing before applying, as this can influence the approval decision.

Eligibility Requirements

To qualify for the Blue Business Plus Credit Card from American Express, applicants must meet certain eligibility requirements. Generally, the applicant needs to be a business owner or authorized officer of the business. The business must also have a valid business license and a tax identification number.

American Express typically looks for applicants with a good credit score, usually in the range of 680 or higher. However, other factors such as business revenue and the length of time the business has been operating can also play a role in the approval process.

Comparison with Other Business Credit Cards

When considering the Blue Business Plus Credit Card, it is essential to compare it with other business credit cards available on the market. Some popular alternatives include the Chase Ink Business Cash Credit Card and the Capital One Spark Cash for Business card.

The Chase Ink Business Cash card offers a cash back rewards structure with 5%

cash back on the first \$25,000 spent in combined purchases at office supply stores and on internet, cable, and phone services, and 2% cash back on the first \$25,000 spent in combined purchases at gas stations and restaurants. This can be more appealing for businesses that spend heavily in those categories.

On the other hand, the Capital One Spark Cash for Business card offers a straightforward 2% cash back on every purchase, which may be preferable for businesses that want simplicity in their rewards structure.

Ultimately, the choice between these cards will depend on each business's spending habits and financial goals.

Conclusion

The Blue Business Plus Credit Card from American Express is an excellent option for small business owners seeking flexible rewards and useful financial tools without the burden of an annual fee. With its competitive rewards program, introductory APR offer, and expense management features, it stands out in the crowded business credit card market. However, potential applicants should weigh the benefits against the drawbacks, especially regarding the rewards structure and foreign transaction fees. By doing so, business owners can make an informed decision that best suits their financial needs.

blue business plus credit card from american express: Paying with Plastic, second edition David S. Evans, Richard Schmalensee, 2004-12-17 The definitive account of the trillion-dollar payment card industry. The payment card business has evolved from its inception in the 1950s as a way to handle payment for expense-account lunches (the Diners Club card) into today's complex, sprawling industry that drives trillions of dollars in transaction volume each year. Paying with Plastic is the definitive source on an industry that has revolutionized the way we borrow and spend. More than a history book, Paying with Plastic delivers an entertaining discussion of the impact of an industry that epitomizes the notion of two-sided markets: those in which two or more customer groups receive value only if all sides are actively engaged. New to this second edition, the two-sided market discussion provides useful insight into the implications of these market dynamics for cardholder rewards, merchant interchange fees, and card acceptance. The authors, both of whom have researched the industry for more than 25 years, also examine the implications of the recent antitrust cases on the industry as well as other business and technological changes—including the massive consolidation brought about by bank mergers, the rise of the debit card, and the emergence of e-commerce—that could alter the payment card industry dramatically in the years to come.
