black owned business in kansas city: Missouri's Black Heritage Lorenzo Johnston Greene, Gary R. Kremer, Antonio Frederick Holland, 1993 Originally written in 1980 by the late Lorenzo J. Greene, Gary R. Kremer, and Antonio F. Holland, Missouri's Black Heritage remains the only book-length account of the rich and inspiring history of the state's African-American population. It has now been revised and updated by Kremer and Holland, incorporating the latest scholarship into its pages. This edition describes in detail the struggles faced by many courageous African-Americans in their efforts to achieve full civil and political rights against the greatest of odds. Documenting the African-American experience from the horrors of slavery through present-day victories, the book touches on the lives of people such as John Berry Meachum, a St. Louis slave who purchased his own freedom and then helped countless other slaves gain emancipation; Hiram Young, a Jackson County free black whose manufacturing of wagons for Santa Fe Trail travelers made him a legendary figure; James Milton Turner; who, after rising from slavery to become one of the best-educated blacks in Missouri, worked with the Freedmen's Bureau and the State Department of Education to establish schools for blacks all over the state after the Civil War; and Annie Turnbo Malone, a St. Louis entrepreneur whose business skills made her one of the state's wealthiest African-Americans in the early twentieth century. A personal reminiscence by the late Lorenzo J. Greene, a distinguished African-American historian whom many regard as one of the fathers of black history, offers a unique view of Missouri's racial history and heritage. Because Missouri's Black Heritage, Revised Edition places Missouri's experience in the larger context of the national experience, this book will be welcomed by all students and teachers of American history or black studies, as well as by the general reader. It will also promote pride and a greater understanding among African-Americans about their past and provide an increased appreciation of the contributions and hardships of blacks.

black owned business in kansas city: Kansas City's Montgall Avenue Margie Carr, 2023-06-12 A few blocks southeast of the famed intersection of 18th and Vine in Kansas City, Missouri, just a stone's throw from Charlie Parker's old stomping grounds and the current home of

the vaulted American Jazz Museum and Negro Leagues Baseball Museum, sits Montgall Avenue. This single block was home to some of the most important and influential leaders the city has ever known. Margie Carr's *Kansas City's Montgall Avenue: Black Leaders and the Street They Called Home* is the extraordinary, century-old history of one city block whose residents shaped the changing status of Black people in Kansas City and built the social and economic institutions that supported the city's Black community during the first half of the twentieth century. The community included, among others, Chester Franklin, founder of the city's Black newspaper, *The Call*; Lucile Bluford, a University of Kansas alumna who worked at *The Call* for sixty-nine years; and Dr. John Edward Perry, founder of Wheatley-Provident Hospital, Kansas City's first hospital for Black people. The principal and four teachers from Lincoln High School, Kansas City's only high school for African American students, also lived on the block. While introducing the reader to the remarkable individuals who lived on Montgall Avenue, Carr also uses this neighborhood as a microcosm of the changing nature of discrimination in twentieth-century America. The city's white leadership had little interest in supporting the Black community and instead used its resources to separate and isolate them. The state of Missouri enforced segregation statutes until the 1960s and the federal government created housing policies that erased any assets Black homeowners accumulated, robbing them of their ability to transfer that wealth to the next generation. Today, the 2400 block of Montgall Avenue is situated in one of the poorest neighborhoods in Kansas City. The attitudes and policies that contributed to the neighborhood's changing environment paint a more complete—and disturbing—picture of the role that race continues to play in America's story.

black owned business in kansas city: *Our Black Year* Maggie Anderson, 2012-02-14 Maggie and John Anderson were successful African American professionals raising two daughters in a tony suburb of Chicago. But they felt uneasy over their good fortune. Most African Americans live in economically starved neighborhoods. Black wealth is about one tenth of white wealth, and black businesses lag behind businesses of all other racial groups in every measure of success. One problem is that black consumers--unlike consumers of other ethnicities-- choose not to support black-owned businesses. At the same time, most of the businesses in their communities are owned by outsiders. On January 1, 2009 the Andersons embarked on a year-long public pledge to buy black. They thought that by taking a stand, the black community would be mobilized to exert its economic might. They thought that by exposing the issues, Americans of all races would see that economically empowering black neighborhoods benefits society as a whole. Instead, blacks refused to support their own, and others condemned their experiment. Drawing on economic research and social history as well as her personal story, Maggie Anderson shows why the black economy continues to suffer and issues a call to action to all of us to do our part to reverse this trend.
