business asu: The Aerospace Business Wesley Spreen, 2019-10-01 This textbook provides a detailed overview of industry-specific business management and technology management practices in aerospace for relevant bachelors and MBA programs. The Aerospace Business: Management and Technology sequentially addresses familiar management disciplines such as production management, labor relations, program management, business law, quality assurance, engineering management, supply-chain management, marketing, and finance, among others. In this context it analyzes and discusses the distinctive perspective and requirements of the aerospace industry. The book also includes subjects of special interest such as government intervention in the sector and strategies to deal with the environmental impact of aircraft. As each chapter deals with a separate management discipline, the material reviews the historical background, technical peculiarities, and financial factors that led the aerospace industry to evolve its own distinct practices and tradition. Theoretical bases of the practices are explained, and the chapters provide actual examples from the industry to illustrate application of the theories. The material is compiled, organized, and analyzed in ways that often provide original perspectives of the subject matter. University students, particularly in programs oriented towards aviation and aerospace management, will find the book to be directly applicable to their studies. It is also extremely appropriate for aerospace MBA and executive MBA programs, and would suit specialized corporate or government training programs related to aerospace.

business asu: The Business of Sustainability Scott G. McNall, James C. Hershauer, George Basile, 2011-10-20 This three-volume set is a landmark comprehensive overview of the business of sustainability, providing 56 separate chapters from leaders in business, non-profit organizations, and from within the academic and policy world. In today's business environment, garbage isn't simply worthless refuse to be disposed of anymore; it often represents a material with monetary value. The human population is using up about 30 percent more natural resources in one year than the earth can regenerate. Because businesses constitute half of the world's largest economies, there can be no sustainability without sustainable businesses. The Business of Sustainability: Trends, Policies, Practices, and Stories of Success is a foundation set that effectively captures and articulates the why, what, who, and how of sustainability and business. Volume I covers the scientific, economic, and social underpinnings of sustainability and identifies the challenges facing business leaders. Volume II explores the global network of designers, producers, suppliers, distributors, and consumers that must be addressed as a unit from a cradle-to-cradle, life-cycle perspective. Volume III presents examples of success across many industries, demonstrating that sustainability is indeed possible. Each volume analytically addresses the larger issues, such as the challenges of managing a business to the standards of sustainability, measuring progress or success, and creating—and maintaining—sustainable businesses. This monumental work provides a comprehensive treatment of sustainability in the world of businesses, exploring all of its dimensions: obstacles, metrics, opportunities, and pathways to success.

business asu: Politics, Labor, and the War on Big Business David R. Berman, 2012-07-15 Politics, Labor, and the War on Big Business details the rise, fall, and impact of the anticorporate

reform effort in Arizona during the Progressive reform era, roughly 1890-1920. Drawing on previously unexamined archival files and building on research presented in his previous books, author David R. Berman offers a fresh look at Progressive heritage and the history of industrial relations during Arizona's formative period. In the 1890s, once-heavily courted corporations had become, in the eyes of many, outside money interests or beasts that exploited the wealth of the sparsely settled area. Arizona's anticorporate reformers condemned the giant corporations for mistreating workers, farmers, ranchers, and small-business people and for corrupting the political system. During a thirty-year struggle, Arizona reformers called for changes to ward off corporate control of the political system, increase corporate taxation and regulation, and protect and promote the interests of working people. Led by George W.P. Hunt and progressive Democrats, Arizona's brand of Progressivism was heavily influenced by organized labor, third parties, and Socialist activists. As highly powerful railroad and mining corporations retaliated, conflict took place on both political levels and industrial backgrounds, sometimes in violent form. Politics, Labor and the War on Big Business places Arizona's experience in the larger historical discussion of reform activity of the period, considering issues involving the role of government in the economy and the possibility of reform, topics highly relevant to current debates.

business asu: Service Science, Management and Engineering Bill Hefley, Wendy Murphy, 2008-01-08 Increasingly, academic and industrial leaders are recognizing that college graduates need new skills to address business and technical issues in a service business environment. Because services depend critically on people working together and with technology to provide value for others, these new skills include the ability to integrate across traditional disciplinary areas to obtain globally effective solutions. Service Science, Management and Engineering (SSME) is one such approach to properly focusing education and research on services, and to preparing tomorrow's graduates to work in an expanding services economy. Papers in this volume were developed from the 2006 conference hosted by IBM, Service Science, Management, and Engineering — Education for the 21st Century. The book incorporates a variety of perspectives, informed by an international background in SSME experience and education, including management, business, social science, computer science and engineering.
