business administration studies: *Management Education in Canada* Kristin S. Williams, Albert J Mills, Heidi Weigand, 2025-05-23 Management Education in Canada: Historical Reflections offers a fresh and critical look at the evolution of management education in Canada. Nearly 25 years after the seminal work Capitalizing Knowledge by Barbara Austin, this edited collection revisits and expands upon the debates that shaped the field, while introducing new perspectives and overlooked histories. Featuring ten scholarly essays from leading academics, this volume explores a range of critical and historiographic approaches to management education, highlighting the ways in which

history is written, privileged, and, at times, neglected. Through a variety of themes, including the gendered experiences of female Ph.D. graduates, Africentric and Indigenous leadership approaches, and the role of globalization in shaping management curricula, the book prompts readers to reflect on the past, present, and future of management education in Canada. Chapters cover topics such as the influence of the Administrative Sciences Association of Canada, the underrepresentation of French- language business education, and the critical interrogation of management textbooks. Together, these chapters offer a rich and comprehensive analysis of the cultural, institutional, and intellectual forces shaping the discipline. This volume will engage scholars, educators, and students in business schools, faculties of management, and those interested in the broader history of higher education, as well as anyone seeking to understand the historical development of management education in Canada. It is an essential contribution to the ongoing conversation about what management education has been and what it could become.

business administration studies: *American Universities and Colleges* Praeger Publishers, 2010-04-16 For well over a half century, *American Universities and Colleges* has been the most comprehensive and highly respected directory of four-year institutions of higher education in the United States. A two-volume set that *Choice* magazine hailed as a most important resource in its November 2006 issue, this revised edition features the most up-to-date statistical data available to guide students in making a smart yet practical decision in choosing the university or college of their dreams. In addition, the set serves as an indispensable reference source for parents, college advisors, educators, and public, academic, and high school librarians. These two volumes provide extensive information on 1,900 institutions of higher education, including all accredited colleges and universities that offer at least the baccalaureate degree. This essential resource offers pertinent, statistical data on such topics as tuition, room and board; admission requirements; financial aid; enrollments; student life; library holdings; accelerated and study abroad programs; departments and teaching staff; buildings and grounds; and degrees conferred. Volume two of the set provides four indexes, including an institutional Index, a subject accreditation index, a levels of degrees offered index, and a tabular index of summary data by state. These helpful indexes allow readers to find information easily and to make comparisons among institutions effectively. Also contained within the text are charts and tables that provide easy access to comparative data on relevant topics.
