business class flight to korea: Capitalist in North Korea Felix Abt, 2014-05-28 Business in North Korea: a paradoxical and fascinating situation is interpreted by a true insider. In 2002, the Swiss power company ABB appointed Felix Abt its country director for North Korea. The Swiss Entrepreneur lived and worked in North Korea for seven years, one of the few foreign businessmen there. After the experience, Abt felt compelled to write *A Capitalist in North Korea* to describe the multifaceted society he encountered. North Korea, at the time, was heavily sanctioned by the UN which made it extremely difficult to do business. Yet he discovered that it was a place where plastic surgery and South Korean TV dramas were wildly popular and where he rarely needed to walk more than a block to grab a quick hamburger. He was closely monitored and once faced accusations of spying, yet he learned that young North Koreans are hopeful--signing up for business courses in anticipation of a brighter, more open, future. In *A Capitalist in North Korea*, Abt shares these and many other unusual facts and insights about one of the world's most secretive nations.

business class flight to korea: *Three Tigers, One Mountain* Michael Booth, 2020-04-14 A lively tour through Japan, Korea, and China, exploring their intertwined cultures and fraught history, by the author of *The Almost Nearly Perfect People*. There is an ancient Chinese proverb that states, "Two tigers cannot share the same mountain." However, in East Asia, there are three tigers on that mountain—China, Korea, and Japan—and they have a long history of turmoil and tension with one another. In this entertaining and thought-provoking travelogue, Michael Booth sets out to discover how deep the enmity really is between these three "tiger" nations and what prevents them from making peace. Booth, long fascinated with the region, travels by car, ferry, train, and foot, experiencing the people and culture of these nations up close. No matter where he goes, the burden of history, and the memory of past crimes, continues to overshadow present relationships. An enlightening, entertaining and sometimes sobering journey, *Three Tigers, One Mountain* is an intimate and in-depth look at three fascinating countries and their cultures. Praise for *Three Tigers, One Mountain* "[An] enjoyable and information-packed travelogue. . . . [Booth] is a terrific observer of the region's educated youth, who make him an optimist. . . . His deft, accurate summaries of the

contentious history in each place work well.” —The Sunday Times (London) “An evenhanded, accessible, and pertinent work of Asian history and current affairs.” —Kirkus Reviews “Cheerfully digressive and intellectually undisciplined, this enthusiastic account will whet readers’ appetites for a more in-depth treatment of the political, cultural, and historical forces at play in the region.” —Publishers Weekly

business class flight to korea: *Memoirs of a Fun Life* Andy Bush, 2025-04-25 A cheerful tale of a lucky life. While intelligence can be useful, a touch of silliness often leads to more adventures and fun. Starting life with no grand ambitions or expectations means you’re never disappointed – instead, you’re regularly delighted to find yourself in fascinating situations. Life sometimes feels like tubing down rocky rapids, where, with only the occasional use of a paddle, you somehow arrive in calm waters – unscathed and grinning from ear to ear.

business class flight to korea: **Behind the Smile: Orphaned by Hitler's Madness** PRK Brenner, 2011-10-06 I was born during the winter of 1944 by an unwed, seventeenyear old, frightened Norwegian girl on the war-torn soil of Germany. Unknowingly, she became part of Heinrich Himmler’s plan, known as the Lebensborn Program, a master design for cultivating an Aryan race. The unfolding story is both revealing and touching. Over time slivers of buried history surfaced into the mainstream of my thinking. An orphan’s journey is revealed transforming the story into enlightened self-discovery. It wasn’t until I found the courage to face the unknown mysteries woven together by people, places and programs that healing could eventually take place. All the intertwining circumstances influenced my life, opened my eyes and helped me make peace with my inner spirit.

business class flight to korea: **Cosmopolitanism and Tourism** Robert Shepherd, 2017-12-12 Within tourism studies, the cosmopolitan potentials of tourism have often been situated within a broader conversation about globalization, an approach that implies that cosmopolitanism is a predictable by-product of globalization and becoming more cosmopolitan should be the goal of travel. And yet a fundamental value of a cosmopolitan outlook—namely, to not only to be “at home in the world” but also to experience the world in an authentic sense—depends on the culturally embedded, parochial, and particular world views which it rejects. In *Cosmopolitanism and Tourism: Rethinking Theory and Practice*, contributors take this as a starting point. What does a “worldly” consciousness mean to people situated in different cultural landscapes and to what extent might these intersect with cosmopolitan values? How is cosmopolitanism marketed in tourism and tourist-related industries such as service learning and study abroad? And finally, what roles do social and economic class, educational background, gender, and other factors have in cosmopolitan claims? The contributors to this edited collection address these questions in a series of case studies that range from Guatemala, Bolivia, and Ireland to China, India, and Dubai. For more information, check out *A Conversation with Robert Shepherd, author of Cosmopolitanism and Tourism: Rethinking Theory and Practice*.

business class flight to korea: **The Mid-Life Crisis Continues** Malcolm Teasdale, 2024-12-06 Trekking, diving, avoiding trouble, and other dodgy activities After spending the past 30 years traveling on business to locations around the World, the time rived when Malcolm Teasdale

could visit places of his choosing. One would think that after spending so much time "on the road", that he would have thrown in the towel and settled down to a normal, peaceful life. What now appears to be an addiction or an extension of a midlife crisis, he seems hell-bent on traveling to destinations where most people would not consider. Whether it is trekking in the Himalayas, diving with the World's largest fish, or hanging out in one of the seediest towns in Asia, the quest for adventure continues. Thimphu, Bhutan, Nagarkot, Nepal, and Pattaya, Thailand, are not household names, but that's the beauty of it all, to go where the general population do not venture. Saying that, soaking up the culture in Turkey's Istanbul, discovering the way of life in Myanmar's capital city, and going far away from it all to a sublime remote island in the Maldives, adds to a mixed bag cultural experiences. Explore how Malcolm deals with the physical and social challenges in far off distant lands in an effort to become educated and fulfilled. business class flight to korea: *Three Days in the Hermit Kingdom* Eddie Burdick, 2014-01-10 To most of the world, North Korea remains a secretive and mysterious nation, one that has tightly controlled the outflow of information in order to groom its public image. This book chronicles a rare, regime-sanctioned excursion by a North American into the heart of the Democratic People's Republic of Korea. What is revealed is often what's expected, such as the adoration of leaders, excursions to national monuments, and exposure to propaganda relating to self-sufficiency. But as a Korean speaker, the author gathered a lot more information than the scripted English narration provided by his Korean guides. Behind the propaganda of the Communist regime, the authentic, eye-opening North Korea is revealed.

business class flight to korea: *Looking Beyond the Runway* Nawal K. Taneja, 2016-12-05 The global airline industry, facing significant changes and discontinuity is prompted and forced to deal with a new normal. Who would have imagined a few years ago that: - a significant percentage of consumers in the US now prefer to fly low-cost airlines instead of full-service airlines because they perceive the product to be better, - airlines would generate up to a third of their total income from non-ticket revenue, - many low-cost airlines would add complexity to their original simple business models through the development of code-share agreements, the use of global distribution systems, and travel agents to distribute their seats, - Jetstar, a low-cost subsidiary of Qantas, would grow faster and be more profitable than its parent, - a survey carried out by Ryanair would show that 42 percent of passengers would be willing to stand on short (one hour) flights if they could pay 50 percent less than seated passengers, - passengers could pay as little as US\$2,000 for a transatlantic Business Class ticket on top-brand airlines, - Lufthansa would have ownership in airlines based in Austria, Belgium, Italy, Switzerland, Turkey, the UK, and the US, and that it would continue to pursue equity ownership in airlines based in Poland and Scandinavia, or - the Japanese and Canadian governments would struggle to find different ways to bail out their heretofore flag carriers? To deal with this upcoming new normal, airlines have to go beyond their short-term circumstantial strategies - they need strategic renewal of their ageing business model. In this candidly-written book, Nawal Taneja explains what will separate the winners from the losers. He maintains the leaders will be the airlines that: (1) exploit this crisis-driven change to their best advantage, (2) learn to work around the airline-inherent constraints that prevent them from running

their businesses just like other businesses, (3) learn from successes and failures of other global enterprises, (4) sharpen their business intelligence, analytics, and strategic agility, and (5) proactively explore the pockets of growth in this emerging-markets century. To help airline executives become informed of new competitive games, the author analyzes numerous business sectors such as auto, hospitality, retail, technology, and entertainment. For example, relevant lessons can be learned from the strategic mistakes made by the US automakers. Likewise, emergent and compelling insights can be gained in superior customer experience from Ritz Carlton and Zappos, and in value-creating innovation from Cirque du Soleil and Zipcar. The book also features a multitude of forewords from airlines and related businesses to provide readers with multiple perspectives on the changing landscape in the global airline industry. Nawal Taneja is a career analyst of the global airline industry with wide-ranging experience in the aviation industry, academia, and public policy. Encouraged by industry executives, he has written five other books for practitioners in the global airline industry, including FASTEN YOUR SEATBELT: The Passenger is Flying the Plane and Flying Ahead of the Airplane.
