**business class in europe: China and Europe in 21st Century Global Politics** Frauke Austermann, Anastas Vangeli, Xiaoguang Wang, 2014-01-15 China and Europe both decisively shape twenty-first century global politics. Successful cooperation between Europe and China continues, notably in climate change mitigation, or finding a way out of the financial crisis. Relations are also increasingly institutionalised, such as through Summits or High-Level Dialogues. However, although in 2013 the EU and China have celebrated the 10-year-anniversary of their Strategic Partnership, struggles have re-emerged, in relation to human rights, intervention in crisis regions such as Syria, and trade subsidisation and protectionism in areas such as the solar energy industry. Given this simultaneous presence of partnership and competition, this edited volume investigates if Sino-European relations have become what Henry Kissinger has termed a “co-evolution”: both China and Europe “pursue their domestic imperatives, cooperating where possible, and adjust their relations to minimize conflict”. The volume sheds light on four key areas of Europe-China relations: first, high politics and security relations; second, the European sovereign debt crisis; third, energy and environmental issues; and fourth, soft power and public diplomacy. As the volume is authored by Chinese and European early-stage scholars in equal numbers, it adds a balance of perspectives and a future-oriented outlook to the still-low but increasing number of works on Europe/EU-China relations.

**business class in europe: Europe's Growth Champion** Marcin Piatkowski, 2025-09-03 What makes countries rich? What makes countries poor? Europe's Growth Champion: Insights from the Economic Rise of Poland seeks to answer these questions, and many more, through a study of one of the biggest, and least heard about, economic success stories. Over the last thirty years Poland has transitioned from a perennially backward, poor, and peripheral country to unexpectedly join the ranks of the world's high-income countries. Europe's Growth Champion is about the lessons learned from Poland's remarkable experience, the conditions that keep countries poor, and the challenges that countries need to face in order to grow. It defines a new growth model that Poland and its Eastern European peers need to adopt in order to continue to grow and catch up with their Western counterparts. Europe's Growth Champion emphasizes the importance of the fundamental sources of growth- institutions, culture, ideas, and leaders- in economic development. It argues that a shift from an extractive society, where the few rule for the benefit of the few, to an inclusive society, where many rule for the benefit of many, was the key to Poland's success. It asserts that a newly emerged inclusive society will support further convergence of Poland and the rest of Central and Eastern Europe with the West, and help to sustain the region's Golden Age. It also acknowledges the future challenges that Poland faces, and that moving to the core of the European economy will require further reforms and changes in Poland's developmental character. This new edition analyses what has changed in the global and Polish economy since 2018. In particular, it discusses the effects of the COVID-19 pandemic, climate change, Russia's aggression against Ukraine, and the ongoing restructuring of the global value chains. It also diagnoses new opportunities and challenges for the future of Poland.

**business class in europe: Flying Off Course** Rigas Doganis, 2009-12-18 The airline industry presents an enigma. High growth rates in recent decades have produced only marginal profitability. This book sets out to explain, in clear and simple terms, why this should be so. It provides a unique insight into the economics and marketing of international airlines. Flying Off Course has established itself over the years as the indispensable guide to the inner workings of this exciting industry. This enlarged fourth edition, largely re-written and completely updated, takes into account the sweeping changes which have affected airlines in recent years. It includes much new material on many key topics such as airline costs, ‘open skies’ , air cargo economics, charters and new trends in airline pricing. It also contains two exciting new chapters on the economics of the low-cost no frills carriers and on the future prospects of the industry. The book provides a practical insight into key aspects of airline operations, planning and marketing within the conceptual framework of economics . It is given added force by the author’s hands-on former experiences as a Chairman and CEO of Olympic

Airways and as a non-executive Director of South African Airways while he is currently a non-executive Director of easyJet.

**business class in europe:** *Wings Across Europe* Kenneth Button, 2017-07-05 Airlines, like most industries, contain a mixture of good and badly managed companies (and perhaps more important, lucky and unlucky companies). More important in the longer-run is the institutional structure in which the companies offer their services. Air transport is a major industry in its own right. But it is also the fastest growing mode of transport for both passengers and freight, a large employer of labour, at the forefront of many technological developments and often a pioneer in adopting such innovations. It is the source of important economic stimuli for local economic development. This book examines the current state of European airlines - mainly, but not exclusively, those within the EU and the European Economic Area (EEA). It seeks in particular to determine if the current institutional structure provides a sustainable basis for the continued vitality of air transport as a facilitator of economic development, and it can serve as an input into wider matters involving the social and political integration within Europe. It also includes material on airports, slots and security. It provides the opportunity to look at factors that currently influence the efficiency of European airlines and to see how the industry has moved to meet these challenges. The book is also designed to be accessible with a glossary at the end, definitions of key terms and concepts, a list of abbreviations and acronyms and two annexes that provide more details of the European air transport market within the wider international regulatory system. The readership includes all concerned with airline and airport management, including regulators and government departments of transportation, and researchers in air transport. While of main interest to those in Europe, it is also important to all who are dealing with similar questions in other continents, and all concerned with inter-continental air transport provision. In the current aviation context the key features of the book are:

**business class in europe: Modernity in India** Renu Vinod, 2023-12-01 This book presents a sociological interpretation of the emergence of modernity in India via the colonial encounter, and its ramifications for Indian society, economy, and polity. It outlines the main features of modernity and the Western context in which it was defined, both in classical and later sociological works, as well as the Western roots of India's development project after independence. The Eurocentric origins of modernity in India are summarised, along with the challenges it has posed in the political realm in the building of a pan-Indian or national consciousness, and in the emergence of dominant caste politics and regional and regionalistic parties to counter what was perceived to be an elite and marginalising project to modernise the Indian nation. It describes the trajectory that the Indian economy has undertaken from state-supported capitalism at the time of independence to market-centric neoliberalism by the 1990s, and the effects of this trajectory on both rural and urban India. The dominating role of both the 'old' and the 'new' middle classes as formidable cultural forces and the heterogeneous character of the latter, as a result of the upward mobility that has been underway since independence, are also summarised, as are the debates around the ever-imminent breakup of the Indian family and its implications for women and the elderly. It ends by outlining the history and persistence of various economic and cultural forms of social exclusion in contemporary India. This book would be useful for students, researchers, and teachers of sociology, history, political science, and interdisciplinary courses in the social sciences, such as modern Indian studies.
