business class on china eastern airlines: They Call Me Jake - 2 Jakob Smith, 2024-10-11
"WE ARE ALL WANDERERS ON THIS EARTH OUR HEARTS ARE FULL OF WONDER AND OUR SOULS DEEP WITH DREAMS" - ROMANY GYPSY SAYING Jakob Smith was a sometimes wild and reckless youth whose passion in life was to travel to new countries. Wherever he went, he was interested in the local history, daily life and culture of the people. During the daylight hours, he enjoyed visiting museums, religious sites, zoos and national parks. At night, contrary to his daytime wanderings, he would enjoy drinking beer and mixing with the local people in neighbourhood bars or restaurants. He would attempt to talk with anyone despite sometimes language difficulties. Frequently these conversations took place in places of ill repute where hookers and petty criminals made up the numbers. They conned him relentlessly but their stories, true or otherwise, were often amusing and worth the few drinks they cost. Now somewhat more mature, he looks back on such

times with fond memories. So many people met only once for just a few, sometimes drunken moments, but never forgotten. Despite the odd black eye and a couple of nights spent in lock-up, was it worth it? I must say yes, as if I had my youth over, I would probably go down the same path. The few bad times fade into obscurity, and the many good times, prone to exaggeration, just seem to get better with age. A TRAVEL STORY DIFFERENT FROM MOST, ENTERTAINING, INFORMATIVE AT TIMES, JAKOB QUITE SIMPLY LOVES TRAVELLING, NEW PLACES AND NEW PEOPLE ARE HIS LIFE.

business class on china eastern airlines: Last Days in Shanghai Casey Walker, 2015-11-10 Luke Slade, a young Congressional aide, begins this business trip to China like all other international travel he's endured with Leo the Lyin': buried under a slew of diplomatic runarounds, non-functioning cell phones, and humiliation from the Congressman at every turn. But on their first night in Beijing, their trip is plunged into a deeper chaos: Leo goes on a drunken bender and disappears into the night. Unsure what dubious business his boss had planned, Luke must piece together the Congressman's lies while maintaining appearances with their Chinese contacts. Amidst the confusion, a little bleary from jet lag and alcohol, Luke receives a briefcase full of money from the mayor of a provincial Chinese city. Luke accepts the gift, but when he later reconsiders and wants to return the cash, he discovers even more anxiety-inducing news. There's been a mysterious death, and he appears to be under surveillance by Chinese police. As Luke tries to navigate a complex minefield of corruption, he must also confront his own role in the events. Unwitting marionette? Fall guy? Or perhaps someone more capable of moral compromise than he would have liked to believe? Last Days in Shanghai is an unforgettable debut by a writer to watch. It's both a hold-on-to-your-seat thriller and a pitch-perfect exploration of present day China—the country's rapacious capitalism, the shocking boom of its cities and the wholesale eradication of its traditions.

business class on china eastern airlines: The Global Commercial Aviation Industry Sören Eriksson, Harm-Jan Steenhuis, 2015-07-16 This book provides a state-of-the-art overview of the changes and development of the civil international aircraft/aviation industry. It offers a fully up-to-date account of the international developments and structure in the aircraft and aviation industries from a number of perspectives, which include economic, geographical, political and technological points of view. The aircraft industry is characterized by very complex, high technology products produced in relatively small quantities. The high-technology requirements necessitate a high level of R&D. In no other industry is it more of inter-dependence and cross-fertilisation of advanced technology. Consequently, most of the world's large aircraft companies and technology leaders have been located in Europe and North America. During the last few decades many developing countries have tried to build up an internationally competitive aircraft industry. The authors study a number of important issues including the political economy of the aircraft industry, globalization in this industry, innovation, newly industrializing economies and the aircraft industry. This book also explores regional and large aircraft, transformation of the aviation industry in Central and Eastern Europe, including engines, airlines, airports and airline safety. It will be of great value to students and to researchers seeking information on the aircraft industry and its development in different regions.

business class on china eastern airlines: The Airline Revolution Gordon Mills, 2016-07-15 When starting new airlines in response to government deregulation, entrepreneurs in the U.S. and Europe reduced some traditional service qualities (to reduce costs), concentrated on non-stop services between city pairs not already so connected, improved on-time performance, and offered low fares to win leisure travelers from the incumbents and to encourage more travel. In recent developments, some of the new airlines have offered optional extras (at higher fares) to attract business travelers and entered major routes alongside the legacy carriers. Within both the U.S. and Europe, deregulation removed most geographical barriers to expansion by short-haul airlines. Later, limited deregulation spread to other world regions, where many short-haul routes connect city pairs in different countries, and where governments have retained traditional two-country mechanisms restricting who may fly. To gain access to domestic routes in other countries, some new airlines are setting up affiliate companies in neighboring countries, with each company legally controlled in the country of domicile. With air travel growing strongly, especially in Asia, a common result is intense, but potentially short-lived, competition on major routes. The recent developments give clear signposts to likely mid-term outcomes, and make this an opportune time to report on the new-airline scene. The Airline Revolution will provide valuable economic analysis of this climate to students, airline professionals advancing to senior positions, public servants and others who provide advice to governments.

business class on china eastern airlines: Airline Choices for the Future Kostas Iatrou, Mauro Oretti, 2016-03-16 Airline Choices for the Future: From Alliances to Mergers offers an up-to-date assessment of the industry as it stands today, delivering a comprehensive insight into how the world of airline alliances is changing, and how the merger phenomenon is likely to fit into the new scenario. The purpose of this book is twofold. Firstly, it outlines the evolution and the reasons behind alliances between international air carriers, the alliances' track records and the way they have affected airlines and the air transport industry. Secondly, drawing on past and more recent developments in the industry, it examines the experiences airlines involved in cross-border mergers have gone through and the advantages and difficulties they have come across. Alliances and mergers are presented from both the airline and the consumer perspective. The book provides a balanced account of where mergers and alliances have taken the industry to date, bridging the gap between

merger theory and implemented practices and strategies. It also identifies the challenges alliances and cross-border mergers have faced and highlights the key forces affecting airline development. Theoretical evidence is supplemented by data collected via surveys and interviews with airline executives, aviation experts, consultants and regulatory bodies.
