business class qatar review: The Report: Qatar 2015 Oxford Business Group, 2015-04-22 Qatar's sizable oil and natural gas reserves have underpinned its rapid economic growth over the past two decades. Home to the world's largest non-associated gas field, the country is the world's

fourth-largest producer of dry natural gas and the largest producer of liquefied natural gas, with hydrocarbons revenues forming the bulk of national income as a result. Although the drop in global energy prices has impacted export revenues, rigorous economic diversification drives in recent years have paid dividends, and in 2015 non-hydrocarbons growth reached 7.7%, compared to a 0.1% contraction for hydrocarbons growth during the same period. The country's financial sector has continued to evolve; Islamic banking in particular has witnessed significant progress. Meanwhile, as the country gears up to host several important sporting events in the coming years, most notably the 2022 FIFA World Cup, numerous big-ticket infrastructure builds continue to expand the construction sector.

business class qatar review: Creative Insecurity Dania Thafer, 2023-06-23 The Middle East is experiencing the world's most prominent youth bulge. Yet many MENA economies' institutional designs, both formal and informal, favour the power of business elites, systematically discriminating against young people joining the workforce or opening businesses, and thus limiting their ability to contribute to innovation. Large youth populations can be a boon or a curse: nurtured and integrated, they can jumpstart stratospheric growth; but if alienated and confined, they can drain a society politically and economically. The Gulf Cooperation Council countries are no exception to this

perilous dilemma. This book explores the problem through a new concept, 'creative insecurity': a state's subjection to an institutional ecosystem that is suppressing opportunities for innovation—to the extent that it is causing economic and political vulnerabilities, which in turn threaten national security. Creative insecurity threatens the longevity of many states today. In this original, incisive study, Dania Thafer argues that GCC member-states should make it a national security imperative to cash in their demographic dividend, by averting the deleterious effects of ill-disposed elite politics. Investing in an innovation ecosystem that harnesses the talent of the youth majority will be crucial for the GCC's successful transition to the post-oil era.

business class qatar review: The New Post-oil Arab Gulf Zeinab Karake-Shalhoub, David Weir, 2012-01-30 The sharp increase in oil revenues since 2002 has left the Arab Gulf States with billions of petro-dollars. But how will these countries fare in the post-oil era? The rulers of these states are taking serious measures to ensure the survival of their economies, and indeed their regimes, in a world with scarce mineral resources. This volume explores the extent to which these countries have been and will be able to prepare for the future by transforming themselves into serious international destinations for tourism, finance, healthcare and education. It also considers the implications of failure for the future survival of their regimes. This study will provide food for thought for academics, policy makers and general readers.
