business for sale charleston: The Culinarians David S. Shields, 2017-10-26 “[A] first ever history of the nation’s foundational ‘culinarians’—the chefs, caterers, and restaurateurs who made cooking an art.” —Marcie Cohen Ferris, author of *The Edible South* In this encyclopedic history of the rise of professional cooking in America, the 175 biographies include the legendary Julien, founder in 1793 of America’s first restaurant, Boston’s Restorator; and Louis Diat and Oscar of the Waldorf, the men most responsible for keeping the ideal of fine dining alive between the World Wars. Though many of the gastronomic pioneers gathered here are less well known, their diverse influence on American dining should not be overlooked—plus, their stories are truly entertaining. We meet an African American oyster dealer who became the Congressional caterer, and, thus, a powerful broker of political patronage; a French chef who was a culinary savant of vegetables and drove the rise of California cuisine in the 1870s; and a rotund Philadelphia confectioner who prevailed in a culinary contest with a rival in New York by staging what many believed to be the greatest American meal of the nineteenth century. He later grew wealthy selling ice cream to the masses. Shields also introduces us to a French chef who brought haute cuisine to wealthy prospectors and a black restaurateur who hosted a reconciliation dinner for black and white citizens at the close of the Civil War in Charleston. Altogether, *The Culinarians* is a delightful compendium of charcuterie-makers, pastry-pipers, caterers, railroad chefs, and cooking school matrons—not to mention drunks, temperance converts, and gangsters—who all had a hand in creating the first age of American fine dining and its legacy of conviviality and innovation that continues today.

business for sale charleston: Encyclopedia of African American Business History Juliet E. K. Walker, 1999-11-30 Black business activity has been sustained in America for almost four centuries. From the marketing and trading activities of African slaves in Colonial America to the rise of 20th-century black corporate America, African American participation in self-employed economic activities has been a persistent theme in the black experience. Yet, unlike other topics in African American history, the study of black business has been limited. General reference sources on the black experience—with their emphasis on social, cultural, and political life—provide little information on topics related to the history of black business. This invaluable encyclopedia is the only reference source providing information on the broad range of topics that illuminate black business history. Providing readily accessible information on the black business experience, the encyclopedia provides an overview of black business activities, and underscores the existence of a historic tradition of black American business participation. Entries range from biographies of black business people to overview surveys of business activities from the 1600s to the 1990s, including slave and free black business activities and the Black Wallstreet to coverage of black women's business activities, and discussions of such African American specific industries as catering, funeral enterprises, insurance, and hair care and cosmetic products. Also, there are entries on blacks in the

automotive parts industry, black investment banks, black companies listed on the stock market, blacks and corporate America, civil rights and black business, and black athletes and business activities.
