business networking events in dallas tx: A Company of One Carrie M. Lane, 2011-03-15 Being laid off can be a traumatic event. The unemployed worry about how they will pay their bills and find a new job. In the American economy's boom-and-bust business cycle since the 1980s, repeated layoffs have become part of working life. In A Company of One, Carrie M. Lane finds that the new culture of corporate employment, changes to the job search process, and dual-income marriage have reshaped how today's skilled workers view unemployment. Through interviews with seventy-five unemployed and underemployed high-tech white-collar workers in the Dallas area over the course of the 2000s, Lane shows that they have embraced a new definition of employment in which all jobs are temporary and all workers are, or should be, independent companies of one. Following the experiences of individual jobseekers over time, Lane explores the central role that organized networking events, working spouses, and neoliberal ideology play in forging and reinforcing a new individualist, pro-market response to the increasingly insecure nature of contemporary employment. She also explores how this new perspective is transforming traditional ideas about masculinity and the role of men as breadwinners. Sympathetic to the benefits that this company of one ideology can hold for its adherents, Lane also details how it hides the true costs of an insecure workforce and makes collective and political responses to job loss and downward mobility unlikely.

business networking events in dallas tx: Nursing Informatics Marion J. Ball, Judith V. Douglas, Patricia Hinton Walker, Donna DuLong, Brian Gugerty, Kathryn J. Hannah, Joan Kiel, Susan K. Newbold, Joyce E. Sensmeier, Diane J. Skiba, Michelle R. Troseth, 2011-01-21 Like the three editions that preceded it, this new edition targets markets in health care practice and educational settings. It addresses practicing nurses and nursing students, together with nursing leadership and nursing faculty. It speaks to nursing informatics specialists and—in a departure from earlier editions of this title—to all nurses, regardless of their specialty, extending its usefulness as a text as noted below. In recognition of the evolving electronic health information environment and of interdisciplinary health care teams, the book is designed to be of interest to members of other health

care professions (quality officers, administrators, etc.) as well as health information technology professionals (in health care facilities and in industry). The book will include numerous relevant case studies to illustrate the theories and principles discussed, making it an ideal candidate for use within nursing curricula (both undergraduate and graduate), as well as continuing education and staff development programs. This book honors the format established by the first three editions by including a content array and questions to guide the reader. This 4th edition also includes numerous brief case studies that help to illustrate the theories and practices described within the various chapters. Most of these “mini-cases” are provided by members of professional nursing organizations that comprise the TIGER Initiative. These mini-cases are listed in the front matter and highlighted via formatting throughout the text.
