business terms word search: Synchronic Corpus Linguistics Carol E. Percy, Charles F. Meyer, Ian Lancashire, 1996 Synchronic corpus linguistics contains select papers from the sixteenth International Conference on English Language Research on Computerized Corpora (ICAME 16). The papers reflect the state of the art in the design, analysis, and annotation of corpora. Corpora new and old facilitate the description of single registers of English (e.g., London teenage English, business English) and of specific grammatical topics across registers (e.g., the grammatical flexibility of idioms), including variation studies (e.g., popular vs. technical registers of English). Other corpora permit the comparison of English to other languages (Norwegian, German, Swedish); of L1 English to L2 English; and of English as an original language to English in translation. A number of these papers emphasize pragmatics: indeed, among the papers on spoken English is an assessment of corpora annotated for discourse analysis. Other papers describe different aspects of the automatic analysis of text. Two papers describe semantic analysis of large text corpora composed of news/business text. Automatic grammatical analysis is the subject of other papers: two evaluate existing automatic parsers and wordclass taggers, while two describe how annotated corpora are being used to develop two new and innovative automatic parsers.

business terms word search: Organizational Innovation Communities Bastian Bansemir, 2013-02-15 Open source, community and crowd innovations have not only drastically changed the way products and services are developed, but also the way we work and live. Yet, organizations of all kinds, may they be small or large, globalized or local, etc., still struggle to effectively adapt to this social, however, technology-enabled trend. This work sheds light on community-based innovation development within organizations, i.e. organizational innovation communities. Three major questions are tackled: How to introduce organizational innovation communities, or how to build communities from scratch? How to manage organizational innovation communities, or can we manage creativity? How to foster employee engagement, or how to turn ordinary employees into innovation hot-spots?

Based on qualitative as well as quantitative research methods, the author derives in-depth and surprising insights as well as hands-on recommendations to speed-up, improve, and foster innovation development.
