business woman silhouette: *Family Papers* Sarah Abrevaya Stein, 2024-07-02 An award-winning historian shares the true story of a frayed and diasporic Sephardic Jewish family preserved in thousands of letters. One of The Economist's Best Books of 2019 A New York Times Book Review Editors' Choice A National Jewish Book Award finalist For centuries, the bustling port city of Salonica was home to the sprawling Levy family. As leading publishers and editors, they helped chronicle modernity as it was experienced by Sephardic Jews across the Ottoman Empire. The wars of the twentieth century, however, redrew the borders around them, in the process transforming the Levys from Ottomans to Greeks. Family members soon moved across boundaries and hemispheres, stretching the familial diaspora from Greece to Western Europe, Israel, Brazil, and India. In time, the Holocaust nearly eviscerated the clan, eradicating whole branches of the family tree. In *Family Papers*, the prizewinning Sephardic historian Sarah Abrevaya Stein uses the family's correspondence to tell the story of their journey across the arc of a century and the breadth of the globe. They wrote to share grief and to reveal secrets, to propose marriage and to plan for divorce, to maintain connection. They wrote because they were family. And years after they frayed, Stein discovers, what remains solid is the fragile tissue that once held them together: neither blood nor belief, but papers. With meticulous research and care, Stein uses the Levys' letters to tell not only their history, but the history of Sephardic Jews in the twentieth century. A superb and touching book about the frailty of ties that hold together places and people. — The New York Times Book Review Remarkable . . . rigorously researched . . . recent decades has the American academic profession taken women's history seriously. But the very concept of women's history has a much longer past, one that's intimately entwined with the development of American advertising and consumer culture. *Selling Women's History* reveals how, from the 1900s to the 1970s, popular culture helped teach Americans about the accomplishments of their foremothers, promoting an awareness of women's wide-ranging capabilities. On one hand, Emily Westkaemper examines how this was a marketing ploy, as Madison Avenue co-opted women's history to sell everything from Betsy Ross Red lipstick to Virginia Slims cigarettes. But she also shows how pioneering adwomen and female historians used consumer culture to publicize histories that were ignored elsewhere. Their feminist work challenged sexist assumptions about women's subordinate roles. Assessing a dazzling array of media, including soap operas, advertisements, films, magazines, calendars, and greeting cards, *Selling Women's History* offers a new perspective on how early- and mid-twentieth-century women saw themselves. Rather than presuming a drought of female agency between the first and second waves of American feminism, it reveals the subtle messages about women's empowerment that flooded the marketplace.
