

capability definition business

capability definition business is a crucial concept that encapsulates the skills, resources, and competencies an organization possesses to execute its strategies and achieve its objectives. Understanding this definition is vital for businesses as it helps them assess their strengths and weaknesses, identify areas for improvement, and optimize their performance in the competitive landscape. This article will delve into the intricate details of capability definition in a business context, exploring its importance, types, and methods for enhancing organizational capabilities. Additionally, we will provide insights into how businesses can effectively leverage their capabilities for sustainable growth and success.

To facilitate your reading, we have structured the article into the following sections:

- Understanding Capability in Business
- The Importance of Capability Definition
- Types of Business Capabilities
- Assessing Organizational Capabilities
- Enhancing Business Capabilities
- Conclusion and Strategic Implications

Understanding Capability in Business

Capability in business refers to the combination of skills, technologies, processes, and knowledge that a company utilizes to deliver products or services effectively. This encompasses everything from the human resources within the organization to the technological tools employed in operations. The capability definition business thus integrates both tangible and intangible assets, illustrating how they contribute to the overall functionality and success of the organization.

Organizations must recognize that capabilities are not static; they evolve based on market demands, technological advancements, and internal changes. Companies that continuously assess and adapt their capabilities are often better positioned to respond to challenges and seize new opportunities in their respective industries.

The Importance of Capability Definition

Defining capabilities is fundamental for businesses for several reasons. First and foremost, it allows

organizations to align their resources and efforts with strategic goals. When a company has a clear understanding of its capabilities, it can make informed decisions regarding resource allocation, talent management, and operational improvements.

Moreover, capability definition business aids in identifying competitive advantages. By recognizing what they do well, businesses can differentiate themselves from competitors, leading to enhanced market positioning. This understanding also facilitates the identification of gaps in capabilities that need to be filled to achieve desired outcomes.

Types of Business Capabilities

Business capabilities can be broadly categorized into several types, each playing a crucial role in the overall functionality of an organization. Understanding these categories can help businesses focus their development efforts appropriately.

Core Capabilities

Core capabilities are those that are essential to the organization's mission and directly contribute to its competitive advantage. These might include unique technology, proprietary processes, or specialized knowledge that sets the organization apart in its industry.

Support Capabilities

Support capabilities are necessary for the operational efficiency of a business but do not directly differentiate it from competitors. These include administrative functions, human resources, and IT support. While they may not provide a competitive edge, their effective management is critical for sustaining core capabilities.

Dynamic Capabilities

Dynamic capabilities refer to an organization's ability to integrate, build, and reconfigure internal and external competencies to address rapidly changing environments. This concept is particularly important in industries characterized by rapid innovation and changing consumer preferences.

Assessing Organizational Capabilities

To capitalize on their capabilities, businesses must first assess them effectively. This assessment often involves several steps:

1. **Identify Key Capabilities:** Determine which capabilities are critical to the organization's success and align with its strategic objectives.
2. **Evaluate Current Performance:** Assess how well these capabilities are currently functioning. This may involve performance metrics, employee feedback, and benchmarking against industry standards.
3. **Analyze Gaps:** Identify any gaps between current capabilities and desired performance. This analysis should consider both internal weaknesses and external threats.
4. **Prioritize Development Areas:** Based on the assessment, prioritize which capabilities need enhancement or development to support strategic goals.

This systematic approach helps organizations develop a clear understanding of their strengths and weaknesses, allowing them to strategize effectively for the future.

Enhancing Business Capabilities

Once an organization has assessed its capabilities, the next step is to enhance them. This process can involve various strategies, including training, investment in technology, and process optimization.

Training and Development

Investing in employee training and development is one of the most effective ways to enhance organizational capabilities. By equipping employees with new skills and knowledge, businesses can improve their core capabilities and adapt to changing market demands.

Technology Investment

In the modern business landscape, technology plays a pivotal role in enhancing capabilities. Companies should evaluate and invest in tools and systems that streamline operations, improve productivity, and foster innovation. This could include adopting new software solutions, improving data analytics capabilities, or implementing automation technologies.

Process Improvement

Evaluating and optimizing business processes is essential for enhancing capabilities. By identifying inefficiencies and areas for improvement, organizations can streamline operations and boost overall

performance. Techniques such as Lean and Six Sigma can be beneficial in this regard.

Conclusion and Strategic Implications

Understanding the capability definition business is crucial for organizations aiming for long-term success. By recognizing the types of capabilities they possess and assessing their effectiveness, businesses can strategically align their resources and efforts to meet their objectives. Furthermore, enhancing capabilities through training, technology, and process improvements will ensure that organizations remain competitive and responsive to market changes.

In summary, a comprehensive approach to capability assessment and enhancement will not only improve operational efficiency but also foster a culture of continuous improvement and innovation within the organization.

Q: What is the capability definition in a business context?

A: Capability definition in business refers to the combination of skills, technologies, resources, and processes that an organization utilizes to achieve its objectives and execute its strategies effectively.

Q: Why is understanding capabilities important for businesses?

A: Understanding capabilities is important for businesses as it allows them to align resources with strategic goals, identify competitive advantages, and recognize areas needing improvement.

Q: What are the main types of business capabilities?

A: The main types of business capabilities include core capabilities, support capabilities, and dynamic capabilities, each serving a unique role in the organization.

Q: How can organizations assess their capabilities?

A: Organizations can assess their capabilities by identifying key capabilities, evaluating current performance, analyzing gaps, and prioritizing areas for development.

Q: What strategies can businesses use to enhance their capabilities?

A: Businesses can enhance their capabilities through employee training and development, investing in technology, and optimizing their processes for efficiency.

Q: How do dynamic capabilities differ from core capabilities?

A: Dynamic capabilities focus on an organization's ability to adapt and reconfigure resources in response to changing environments, while core capabilities are essential skills and processes that provide a competitive advantage.

Q: What role does technology play in enhancing business capabilities?

A: Technology plays a significant role in enhancing business capabilities by streamlining operations, improving productivity, and enabling innovation through advanced tools and systems.

Q: How can process improvement benefit organizational capabilities?

A: Process improvement can benefit organizational capabilities by identifying inefficiencies, streamlining operations, and boosting overall performance, allowing businesses to operate more effectively.

Q: What is the impact of training on organizational capabilities?

A: Training has a positive impact on organizational capabilities by equipping employees with new skills and knowledge, thereby enhancing performance and adaptability to market changes.

capability definition business: The TOGAF® Standard, 10th Edition - Business Architecture - 2025 Update The Open Group, 2025-06-30 #html-body [data-pb-style=EVJ64F9],This document is a compilation of TOGAF Series Guides addressing Business Architecture. It has been developed and approved by The Open Group and is part of the TOGAF Standard, 10th Edition.It consists of the following documents: TOGAF® Series Guide:Business Models This document provides a basis for Enterprise Architects to understand and utilize business models, which describe the rationale of how an organization creates, delivers, and captures value. It covers the concept and purpose of business models and highlights the Business Model Canvas™ technique. TOGAF® Series Guide:Business Capabilities, Version 2 This document answers key questions about what a business capability is, and how it is used to enhance business analysis and planning. It addresses how to provide the architect with a means to create a capability map and align it with other Business Architecture viewpoints in support of business planning

processes. TOGAF® Series Guide:Value Streams Value streams are one of the core elements of a Business Architecture. This document provides an architected approach to developing a business value model. It addresses how to identify, define, model, and map a value stream to other key components of an enterprise's Business Architecture. TOGAF® Series Guide:Information Mapping This document describes how to develop an Information Map that articulates, characterizes, and visually represents information that is critical to the business. It provides architects with a framework to help understand what information matters most to a business before developing or proposing solutions. TOGAF® Series Guide:Organization Mapping This document shows how organization mapping provides the organizational context to an Enterprise Architecture. While capability mapping exposes what a business does and value stream mapping exposes how it delivers value to specific stakeholders, the organization map identifies the business units or third parties that possess or use those capabilities, and which participate in the value streams. TOGAF® Series Guide:Business Scenarios This document describes the Business Scenarios technique, which provides a mechanism to fully understand the requirements of information technology and align it with business needs. It shows how Business Scenarios can be used to develop resonating business requirements and how they support and enable the enterprise to achieve its business objectives.

Reactions from other readers 'A quality hard copy of the TOGAF method - easier to read than endless htm docs or huge pdfs! The TOGAF framework has become the de facto standard for developing Enterprise Architectures.' 'A good one-stop-shop guide and toolsets for getting your Enterprise Architecture right. A lot of thought, experience, and funding have gone into this, and the results are well worth the price you pay for the book (and the actual accreditation should you or your organization wish to go down that route).' Amazon Comment '...it still is the best documented Enterprise Architecture method publicly available. The book is of high quality binding and will endure browsing through the pages for a long time.' Amazon Comment

capability definition business: *Applying Business Capabilities in a Corporate Buyer M&A Process* Andreas Freitag, 2014-10-01 As a first step towards applying Enterprise Architecture Management (EAM) in Mergers and Acquisitions (M&A), Andreas Freitag investigates the end-to-end applicability of business capabilities in the M&A process of a corporate buyer organization. Enterprises still struggle to manage M&A efficiently. A significant number of merger projects do not reach the expected goals or fail completely. Therefore, companies attempt to improve their M&A capability by establishing the required skills, organization, processes and methods. EAM is an approach for business and IT planning, promising to contribute to the success of business transformation challenges such as M&A. Business capability models are an essential element of a state of the art EAM approach. They are frequently used as a starting point to work collaboratively with business and IT stakeholders.

capability definition business: TOGAF® Business Architecture Level 1 Study Guide Andrew Josey, Steve Else, 2019-07-09 This title is the Study Guide for the TOGAF® Business Architecture Part 1 Examination. It gives an overview of every learning objective for the TOGAF Business Architecture Syllabus and in-depth coverage on preparing and taking the TOGAF Business Architecture Part 1 Examination. It is specifically designed to help individuals prepare for certification. This Study Guide is excellent material for: • Individuals who require knowledge and understanding of TOGAF Business Architecture techniques; • Professionals who are working in roles associated with an architecture project such as those responsible for planning, execution, development, delivery, and operation; • Architects who are looking to achieve the TOGAF Business Architecture Level 1 credential; • Architects who want to specialize in development of a Business Architecture based on the TOGAF Standard, Version 9.2; It covers the following topics: • Business Modeling • Business Capabilities • Value Streams • Information Mapping • TOGAF Business Scenarios and how to apply them in development of a Business Architecture based on the TOGAF Standard, Version 9.2. A prior knowledge of Enterprise Architecture is advantageous but not required. While reading this Study Guide, the reader should also refer to the TOGAF Standard, Version 9.2 documentation (manual), available as hard copy and eBook, from www.vanharen.net and online booksellers, and also available online at www.opengroup.org.

capability definition business: *The Strategic Role of Software Customization* Matthias Bertram, 2016-06-30 Matthias Bertram aims to develop a deeper understanding of software customization and its strategic role for software product management. Drawing on the conceptual foundation of the resource-based view of the firm, such as resources, capabilities, and dynamic capabilities, the author conducts two qualitative investigations: the first within vendor and customer firms to develop an in-depth understanding of the value of software customization as well as the vendor resources and capabilities necessary to successfully provide software customization and the second on the vendor's dynamic capabilities necessary to generate temporary competitive advantage from software customization in product management activities.

capability definition business: *Report on selected solutions of law, business and technologies preventing crimes* Anna Zalcewicz, 2018 Raport jest pierwszym tego typu opracowaniem w polskim piśmiennictwie, szczególnie w tak oryginalnym i profesjonalnym ujęciu. [...] Integralną i niezwykle ważną dla percepcji raportu część stanowią załączniki, które poszerzają zakres wiedzy zawartej w opracowaniu, ułatwiając jej zrozumienie. [...] Raport zawiera autorskie ujęcie zjawiska relatywnie nowego w praktyce życia gospodarczego i proponuje zasady oraz metody zarządzania nim. Charakteryzuje się właściwym, interdyscyplinarnym podejściem. Napisano go na podstawie aktualnej – głównie angielskiej – literatury oraz z wykorzystaniem badań własnych autorów. Odpowiada na pilne i rosnące zapotrzebowanie praktyki gospodarczej. Jest innowacyjną pozycją na polskim rynku wydawniczym. Prof. dr hab. Bohdan Jeliński Uniwersytet Gdański Praca jest oryginalnym osiągnięciem naukowym, wypełniającym lukę w słabo zbadanym jak dotąd obszarze zapobiegania przestępczości w sektorach: finansowym, ubezpieczeniowym i energetycznym oraz w obszarze zarządzania zasobami ludzkimi. Proponowane rozwiązania przyczynią się do poprawy skuteczności działania w analizowanych sektorach. Płk dr hab. Tomasz Kośmider, prof. ASW Akademia Sztuki

Wojennej w Warszawie Raport prezentuje innowacyjne rozwiązania w kwestii zarówno produktów zapobiegających przestępczości, jak i procesów zarządczych przedstawionych w szczególności w rozdziale dotyczącym zarządzania ludźmi. Opracowanie ukazuje również, z jakimi wyzwaniem natury prawnej może mierzyć się w przyszłości ustawodawca na szczeblu krajowym i ponadnarodowym, w tym unijnym. [...] Raport może przyczynić się także do podjęcia dalszych badań nad cyberprzestępczością w Polsce. Dr hab. Krystyna Nizioł, prof. US Uniwersytet Szczeciński

capability definition business: *Interfirm Business-to-Business Networks* Roger Baxter, Arch G. Woodside, 2011-07-25 The three papers in Volume 17 report new theory and in-depth descriptions of interfirm network behavior. Each paper includes extensive reviews of the relevant literature on interfirm network behavior as well as data analysis using empirical positivistic and/or case study research methods.

capability definition business: *Business Architecture* Jonathan Whelan, Graham Meaden, 2016-04-15 Organizations today exist in an environment of unprecedented change. They do so against a backdrop of a global, competitive marketplace, the fast-paced enablement of technology, amplified regulation and accelerating organizational complexity. Many organizations are addressing change in a sub-optimal way and they are operating without a clear view of where their operational risks lie. It is these dynamics that are leading organizations to recognise and embrace Business Architecture. Despite this environment, Business Architecture can be a difficult 'sell' - it is often perceived to be abstract and lacking in tangible delivery. To succeed, Business Architecture must be pragmatic and, to be sustainable, it must focus on achieving long-term value and, at the same time, recognise the shorter-term tactical needs of the organisation. With these challenges in mind, this book provides a practical guide on how to employ Business Architecture and how to build a balanced proposition that delivers value to a broad range of stakeholders. As the book states, Business Architecture should not be practised in isolation, nor should it be thought of as a one-off process; it needs to be woven into the fabric of the organization. And so the authors illustrate the opportunities for weaving the Business Architecture Practice into this fabric through the various stakeholders and life cycles that exist, both formally and informally, within an organization. Whilst recognizing best practice, this book explores a new, inspirational level of Business Architecture whilst acknowledging that the best way to realize the vision is one step at a time.

capability definition business: *ECIME 2014 Proceedings of the 8th European Conference on IS Management and Evaluation* Steven de Haes, 2014

capability definition business: *Outcome-Driven Business Architecture* Amit Tiwary, Bhuvan Unhelkar, 2018-08-06 This book discusses business architecture as a basis for aligning efforts with outcomes. It views BA as complementary to enterprise architecture, where the focus of technological initiatives and inventories is to understand and improve business organization, business direction, and business decision-making. This book provides a practical, long-term view on BA. Based on the authors' consulting experience and industrial research, the material in this book is a valuable addition to the thought processes around BA and EA. The lead author has direct and practical experience with large clients in applying APQC capability framework for undertaking multiple enterprise-wide capability assessments.

capability definition business: *Enterprise, Business-Process and Information Systems Modeling* Han van der Aa, Dominik Bork, Rainer Schmidt, Arnon Sturm, 2024-05-30 This book contains the refereed proceedings of two long-running events held along with the CAiSE conference relating to the areas of enterprise, business-process and information systems modeling: - the 25th International Conference on Business Process Modeling, Development and Support, BPMDS 2024, and - the 29th International Conference on Exploring Modeling Methods for Systems Analysis and Development, EMMSAD 2024. The conferences were taking place in Limassor, Cyprus, during June 3-4, 2024. For BPMDS 8 full papers and 3 short papers were carefully reviewed and selected for publication from a total of 25 submissions; for EMMSAD 11 full papers and 5 short papers were accepted from a total of 32 submissions after thorough reviews. The BPMDS papers deal with a broad range of theoretical and applications-based research in business process modeling,

development and support. EMMSAD focusses on modeling methods for systems analysis and development.

capability definition business: The TOGAF® Business Architecture Foundation Study Guide Andrew Josey, The Open Group, 2023-04-10 The TOGAF® Standard, a standard of The Open Group, is a proven Enterprise Architecture methodology and framework used by the world's leading organizations to improve business efficiency. The TOGAF Certification Program has enabled more than 100,000 Enterprise Architects and trainers around the globe to demonstrate their proven knowledge of the framework and method. This is the book you need to prepare for the TOGAF Business Architecture Foundation qualification. This edition is aligned to the TOGAF Standard, 10th Edition. It includes an overview of every learning outcome included in the TOGAF Business Architecture Syllabus and in-depth coverage on preparing and taking the TOGAF Business Architecture Foundation examination. It includes Key Learning Points, exercises and challenging Test Yourself questions for each part of the syllabus, together with a Test Yourself examination paper that you can use to test your readiness to take the official TOGAF Business Architecture Foundation examination. The audience for this Study Guide is: Individuals, such as those responsible for business planning, who wish to apply the TOGAF Business Architecture approach in their working environment Individuals needing to gain competencies in TOGAF Business Architecture techniques Individuals who wish to become qualified as part of their own professional development A prior knowledge of Enterprise Architecture is advantageous but not required. Topics covered include: An introduction to TOGAF certification and the TOGAF Business Architecture Foundation qualification, including the TOGAF Business Architecture Foundation examination The concepts of Enterprise Architecture and the TOGAF Standard; this includes the TOGAF Architecture Development Method (ADM), the contents of the TOGAF framework, and the TOGAF Library The key terminology of TOGAF Business Architecture An introduction to the TOGAF ADM, including the objectives of the ADM phases, and how to adapt and scope the ADM for use How business modeling relates to the TOGAF Standard, the impact and benefits of business models, and examples of different representations of business models How to define business capabilities, how they can be modeled, and how to map them to other business perspectives Value streams and value stream mapping; the benefits, the different approaches to value stream analysis, the relationship to other Business Architecture concepts, and how to apply value streams How to apply information mapping when developing a Business Architecture How to apply organization mapping when developing a Business Architecture How to apply the TOGAF Business Scenario method How a Business Architecture is developed with the TOGAF ADM

capability definition business: *Perspectives in Business Informatics Research* Björn Johansson, Charles Møller, Atanu Chaudhuri, Frantisek Sudzina, 2017-08-21 This book constitutes the proceedings of the 16th International Conference on Perspectives in Business Informatics Research, BIR 2017, held in Copenhagen, Denmark, in August 2017. This year the BIR conference attracted 59 submissions from 23 countries. They were reviewed by 45 members of the Program Committee, and as a result, 17 full papers and 3 short papers were selected for presentation at the conference and publication in this volume. They are organized in sections on enterprise architecture, business process management, business analytics, information systems applications, and information systems development. In addition, the summaries of the two conference keynotes are also included. This year, the conference theme was the digital transformation, which will impact most businesses, organizations and societies and call for new and radical approaches to how we adopt, use and manage IT.

capability definition business: *Perspectives in Business Informatics Research* Robert Andrei Buchmann, Andrea Polini, Björn Johansson, Dimitris Karagiannis, 2020-10-10 This book constitutes the proceedings of the 19th International Conference on Perspectives in Business Informatics Research, BIR 2020. The conference was initially planned to be held in Vienna, Austria, during September 2020. Due to the COVID-19 pandemic it was postponed to be held together with BIR 2021. The 14 papers presented in this volume were carefully reviewed and selected from 48

submissions. The papers were organized in topical sections as follows: Digital Transformation and Technology Acceptance; Multi-perspective Enterprise Models and Frameworks; Supporting Information Systems Development; Literature and Conceptual Analysis; and Value Creation and Value Management.

capability definition business: Cloud Computing Service and Deployment Models: Layers and Management Bento, Al, Aggarwal, A. K., 2012-10-31 This book presents a collection of diverse perspectives on cloud computing and its vital role in all components of organizations, improving the understanding of cloud computing and tackling related concerns such as change management, security, processing approaches, and much more--Provided by publisher.

capability definition business: Perspectives in Business Informatics Research Václav Řepa, Tomáš Bruckner, 2016-09-07 This book constitutes the proceedings of the 15th International Conference on Perspectives in Business Informatics Research, BIR 2016, held in Prague, Czech Republic, in September 2016. Overall, 61 submissions from 16 countries were rigorously reviewed by 42 members of the program committee representing 21 countries. The selected 21 full papers and 3 short papers are included in this volume together with 2 abstracts of invited talks. This year again, the papers presented at the conference cover many important aspects of the development, use, and application of management information systems. The papers have been organized in topical sections on Business Processes and Enterprise Modeling; Information Systems Development; Information Systems Management; Learning and Capability; and Data Analysis.

capability definition business: Business Modeling and Software Design Boris Shishkov, 2024-07-01 This book constitutes the refereed proceedings of the 14th International Symposium on Business Modeling and Software Design, BMSD 2024, which took place in Luxembourg, during July 1-3, 2024. The 13 full and 7 short papers included in this book were carefully reviewed and selected from a total of 54 submissions. BMSD is a leading international forum that brings together researchers and practitioners interested in business modeling and its relation to software design. Particular areas of interest are: Business Processes and Enterprise Engineering, Business Models and Requirements, Business Models and Services, Business Models and Software, Information Systems Architectures and Paradigms, Data Aspects in Business Modeling and Software Development, Blockchain-Based Business Models and Information Systems, IoT and Implications for Enterprise Information Systems. Each year, a special theme is chosen, for making presentations and discussions more focused, and in 2024 it is: Towards Socially Responsible Information Systems.

capability definition business: Business Process Management Workshops Marcello La Rosa, Pnina Soffer, 2013-01-26 This book constitutes the refereed proceedings of 12 international workshops held in Tallinn, Estonia, in conjunction with the 10th International Conference on Business Process Management, BPM 2012, in September 2012. The 12 workshops comprised Adaptive Case Management and Other Non-Workflow Approaches to BPM (ACM 2012), Business Process Design (BPD 2012), Business Process Intelligence (BPI 2012), Business Process Management and Social Software (BPMS2 2012), Data- and Artifact-Centric BPM (DAB 2012), Event-Driven Business Process Management (edBPM 2012), Empirical Research in Business Process Management (ER-BPM 2012), Process Model Collections (PMC 2012), Process-Aware Logistics Systems (PALS 2012), Reuse in Business Process Management (rBPM 2012), Security in Business Processes (SBP 2012), and Theory and Applications of Process Visualization (TAProViz 2012). The 56 revised full papers presented were carefully reviewed and selected from 141 submissions.

capability definition business: The TOGAF® Standard, 10th Edition - A Pocket Guide Andrew Josey, Dave Hornford, 2022-04-26 This is the official Pocket Guide for the TOGAF® Standard, 10th Edition from The Open Group. Building on over 25 years of development and constant input from The Open Group Architecture Forum's global community of Enterprise Architecture thought leaders, the TOGAF Standard, 10th Edition expands the material available to architecture practitioners to make adoption of best practices easier. With greatly expanded guidance and "how-to" material, it enables organizations to operate in an efficient and effective way across a broad range of use-cases, including Agile enterprises and Digital Transformation. The TOGAF

Standard is the most prominent and reliable Enterprise Architecture standard, ensuring consistent standards, methods, and communication among Enterprise Architecture professionals. Those professionals who are fluent in the TOGAF approach enjoy greater industry credibility, job effectiveness, and career opportunities. The TOGAF approach helps practitioners avoid being locked into proprietary methods, utilize resources more efficiently and effectively, and realize a greater return on investment. This official Pocket Guide provides an overview of the contents and purpose of the TOGAF Standard in a condensed form. As such it does not cover every aspect of the standard in detail, but provides highlights and key reference information. Topics covered include: A high-level introduction to the TOGAF Standard, introducing the modular TOGAF documentation set, the TOGAF Library, and the TOGAF framework Guidance on how to read the standard An introduction to the general how-to information provided in the TOGAF Standard, including guidance for practitioners, and how to use the standard in the Digital Enterprise An overview of guidance to support the establishment of an Enterprise Architecture team An overview of the guidance provided in the TOGAF Standard for specific topic domains, including Security Architecture, Business Architecture, Data/Information Architecture, Agile Methods, and Reference Models and Methods An introduction to the TOGAF Fundamental Content documents provided in the TOGAF Standard, which describe the concepts considered to be universally applicable to the TOGAF framework, including: Key techniques of the ADM cycle Guidelines for adapting the TOGAF ADM for different usage scenarios The Architecture Content Framework Enterprise Architecture Capability and Guidance The TOGAF Architecture Development Method (ADM), including summary phases for each of the ADM phases An overview of ADM deliverables

capability definition business: Business Architecture Management Daniel Simon, Christian Schmidt, 2015-04-22 This book presents a comprehensive overview of enterprise architecture management with a specific focus on the business aspects. While recent approaches to enterprise architecture management have dealt mainly with aspects of information technology, this book covers all areas of business architecture from business motivation and models to business execution. The book provides examples of how architectural thinking can be applied in these areas, thus combining different perspectives into a consistent whole. In-depth experiences from end-user organizations help readers to understand the abstract concepts of business architecture management and to form blueprints for their own professional approach. Business architecture professionals, researchers, and others working in the field of strategic business management will benefit from this comprehensive volume and its hands-on examples of successful business architecture management practices.
