cleaning trash can business: *Sidewalks* Anastasia Loukaitou-Sideris, Renia Ehrenfeucht, 2011-12-09 Examines the evolution of an undervalued urban space and how conflicts over competing uses—from the right to sit to the right to parade—have been negotiated. Urban sidewalks, critical but undervalued public spaces, have been sites for political demonstrations and urban greening, promenades for the wealthy and the well-dressed, and shelterless shelters for the homeless. On sidewalks, decade after decade, urbanites have socialized, paraded, and played, sold their wares, and observed city life. These many uses often overlap and conflict, and urban residents and planners try to include some and exclude others. In this first book-length analysis of the sidewalk as a distinct public space, Anastasia Loukaitou-Sideris and Renia Ehrenfeucht examine the evolution of the American urban sidewalk and trace conflicts that have arisen over its competing uses. Drawing on historical and contemporary examples as well as case study research and archival data from five cities—Boston, Los Angeles, New York, Miami, and Seattle—they discuss the characteristics of sidewalks as small urban public spaces, and such related issues as the ambiguous boundaries of their “public” status, contestation over specific uses, control and regulations, and the implications for First Amendment speech and assembly rights.
