costco business center atlanta: A New New Deal Amy B. Dean, David B. Reynolds, 2011-05-15 In *A New New Deal*, the labor movement leaders Amy B. Dean and David B. Reynolds offer a bold new plan to revitalize American labor activism and build a sense of common purpose between labor and community organizations. Dean and Reynolds demonstrate how alliances organized at the regional level are the most effective tool to build a voice for working people in the workplace, community, and halls of government. The authors draw on their own successes to offer in-depth, contemporary case studies of effective labor-community coalitions. They also outline a concrete strategy for building power at the regional level. This pioneering model presents the regional building blocks for national change. A diverse audience—both within the labor movement and among its allies—will welcome this clear, detailed, and inspiring presentation of regional power-building tactics, which include deep coalition-building, leadership development, policy research, and aggressive political action. *A New New Deal* explores successful coalitions forged in Los Angeles, Boston, Denver, San Jose, New Haven, and Atlanta toward goals such as universal health insurance for children and sensible redevelopment efforts that benefit workers as well as businesses. The authors view partnerships between labor and grassroots organizations as a mutually beneficial strategy based on shared goals, resulting in a broadened membership base and increased organizational capacity. They make the innovative argument that the labor movement can steward both industry and community and make manifest the ways in which workplace battles are not the

parochial concerns of isolated workers, but a fundamental struggle for America's future. Drawing on historical parallels, the authors illustrate how long-term collaborations between labor and community organizations are sowing the seeds of a new New Deal.

costco business center atlanta: *Business Improvement Districts* Goktug Morcol, Lorlene Hoyt, Jack W. Meek, Ulf Zimmermann, 2017-09-29 Initiated and governed by property or business owners under the authorization of state and local governments, business improvement districts (BIDs) have received a very mixed reception. To some, they are innovative examples of self-governance and public-private partnerships; to others, they are yet another example of the movement toward the privatization of what should be inherent government responsibilities. Among the first books to present a collection of scholarly work on the subject, *Business Improvement Districts: Research, Theories, and Controversies* brings together renowned leaders in the field to compile the highest-quality theoretical, legal, and empirical studies into one comprehensive volume. Investigating fundamental concerns at the core of the debate, as well as potential solutions, this groundbreaking resource: Tackles the need for improved problem solving and efficiency in service delivery Examines new and innovative policy tools for both the public and private sectors Evaluates whether BIDs do ignore the needs and voices of residential property owners Discusses the challenge created by social segregation in cities Addresses lack of accountability by BIDs to the public and elected representatives From different perspectives, leading practitioners and academics analyze the pros and cons of BIDs both in the United States and around the world. They look at their impact on urban planning and retail revitalization, consider their legal implications, and explore ways to measure BID performance. Filled with case studies of urban centers including San Diego, Atlanta, New York, Toronto, and Capetown, and state models such as New Jersey and Pennsylvania, this examination brings together essential information for researchers as well as those leaders and policy makers looking to adopt a BID model or improve one already in place.

costco business center atlanta: Just Keep Truckin', America and Don'T Think! Frank Belcher, 2015-06-11 This is the story of a sixty-plus-year-old individual who became bored with retirement and took up a new career as an owner-operator of an interstate heavy truck, running it from coast to coast and from the Canadian border to the Mexican border for over a half-million miles. The author was the sole driver and tells of his experiences over the road. Go on these trips with him as you traverse each chapter, and learn a little about the lives of those who transport freight at highway speeds across the United States, sometimes carrying cargo up to twenty-five tons in those fifty-three-foot boxes, thirteen and a half feet high, called trailers, pulled by ten-wheel tractors, and similar combinations of double trailers, flatbeds carrying openly visible cargo.
