doctor of business administration liberty university: The Modern-Day Cyrus Rev. Robert Antwi, 2018-06-15 During the exodus from Egypt to the Promised Land, God told the Israelites that the city in which He would place his name should be their center of worship or the economic capital. But unto the place which the Lord your God shall choose out of all your tribes to put his name there, even unto his habitation shall ye seek, and thither thou shall come. (Deuteronomy 12:5) Around 1000 BC, the God of Abraham selected Jerusalem to place His name there and David to rule over His people. David became a king of ancient Israel when God selected Jerusalem to place His name and made Jerusalem the center of worship (spiritual and economic capital). But I have chosen Jerusalem that my name might be there; and have chosen David to be over my people Israel. (2 Chronicles 6:6) Therefore, God chose Jerusalem to put His name there and David to rule over His people (Israel). The Jews know their history, and Jerusalem was proclaimed the capital. On May 14, 1948, Ben-Gurion formally proclaimed the formation of Israel. Jerusalem is the capital and the largest city in Israel. Tel Aviv is Israel's economic and technology center. Jerusalem is the capital, but it has limited recognition. International bodies and many countries around the world do not recognize Jerusalem as the capital of Israel. I believe it is time for the world and international bodies to recognize Jerusalem as the capital. I believe Donald Trump won the election to declare and recognize Jerusalem as the capital of Israel. The Babylonians captured Jerusalem in 587 BC and forced all the Jewish inhabitants into exile in Babylon. That period was known as the Babylonian Captivity. Isaiah had already given prophecy about Cyrus, so the Jewish community in Babylon saw him as their liberators and assisted Cyrus's army in overthrowing the Babylonians. In 538 BC, Cyrus allowed about forty thousand Jews to return to Jerusalem, ending the Babylonian captivity. Cyrus used the funds he had acquired in conquering Babylon to rebuild the sacred temple in Jerusalem, which was given in prophecy by Isaiah. I have declared President Donald Trump the modern-day Cyrus. Just as King Cyrus set the Israelites free from the Babylonian captivity, Donald Trump is setting Jerusalem free from the slave of unrecognition.

doctor of business administration liberty university: Inspirations from My Mother Mike Melvin, 2022-12-22 Inspirations from My Mother, a Journey of Faith and Endurance: An Autobiography is an epic journey of faith and endurance of a little boy born into a polygamous family in the village of Lekong in the deep hinterland of the rain forest of Cameroon, with big dreams installed in him by his mother who got blind during his teenage years. Growing up in a poor polygamous family, Dr. Mike depended solely on his mother for everything, but his mother got blind during his first year in secondary (middle) school and died during his first year in high school. Though his mother was blind and dead, Dr. Mike refused to give up on himself and must endure all obstacles, faced his challenges, and built faith in God from his teenage age through adulthood to become the highly educated, family-loving, and responsible individual today due to the inspiration from his mother. Determined to confirm the information that his child died at birth, Dr. Mike went searching for his teenage age girlfriend and, after seven years of search, discovered his daughter who was reported dead thirty-five years ago at birth by his girlfriend's uncle. While his journey is filled with obstacles, Dr. Mike never gave up on being a family man, a loving husband, and a father. In his seven children, there is a graduate with a master's degree, one in the university, three in high school, one in middle school, and another in the vocational training academy. Dr. Mike is a grandfather to nine grandchildren. Dr. Mike is the first of his siblings to graduate from college and

to have earned a terminal degree, thanks to his blind mother, endurance, and faith.

doctor of business administration liberty university: *Corporate Conformance and the Social License* Petter Gottschalk, Christopher Hamerton, 2025-08-04 The principal focus of *Corporate Conformance and the Social License: A Criminological Perspective* is to enhance and broaden the criminological dialogue surrounding the role of and effect of corporate conformance as a key element in the maintenance of the social license to operate. The book posits that in recent years conformance has emerged as a key component in shaping corporate behaviour and informing corporate crises. With a series of widely publicised global scandals heightening awareness of extensive and serious repercussions, revealing severe financial and environmental impacts, operational issues, and even existential concerns. This has led to a growing body of research focusing on how such crises materialise, are perceived and might be strategically managed and prevented. The book foregrounds conformance as a proactive demonstration of adherence to contemporary ethical standards of globalized business practice, with the authors offering a novel perspective that considers conformance and associated normative pressures within a criminological framework. Here, convenience theory is applied to analyse a series of important contemporary case-studies, with the research illustrating how corporations and their stakeholders have used conformance to manage, maintain and, following periods of crisis, attempt to regain their corporate license to operate. The book further explores differences in strategic conformance responses in terms of perceptions and reactions from the public, media and criminal justice system.

doctor of business administration liberty university: *DAVID'S MIGHTY MEN* C. David Jones, 2009-08-14 **FOREWORD** Every man who is a success, regardless of how gifted he may be, did not manage to achieve his goals, rank, station or wealth by his own efforts, but he is indebted to a number of key persons in his life without whose mentoring, support, and encouragement he would quite likely have been a miserable failure! * * * KING DAVID of Israel was surrounded by a magnificent corps of extraordinarily strong, courageous, unflinchingly brave and self-sacrificing men who were his confidants, his personal bodyguard, and comrades-at-arms. They were the special elite corps of fearless warriors whose devotion to their king placed his welfare and that of his kingdom above their own personal safety - every one of these champions would gladly have sacrificed his own life to honor, advance and protect the life of their king. The annals of Holy Scripture single them out by the accolade that marks them as David's Mighty Men. Their names are recorded in the Hebrew Old Testament book of II Samuel, chapter 23, verses 8-39. They were thirty-seven of the most fierce and dedicated warriors that ever lived. In a parallel list of these men which is recorded in I Chronicles 11:11-47, the number of warriors is expanded by 16 names (I Ch. 11:41-47), probably because additional men were added to replace those who had died, some in battle, giving their lives for their king. They were truly men of extraordinary valor, physical might and unwavering loyalty. They were a combination of "combat commandos," "stealth rangers," "navy seals," "green beret," "special ops" and "Delta forces" who had acquired the skills of battle demanded to survive and conquer in hand-to-hand warfare. They engaged in clandestine operations and were often

outnumbered by staggering odds pitted against them, yet they stood their ground. Time after time on fields of battle they were "the last men standing." They defended their king and gained victory over their enemies by sheer strength of determination and by the inexplicable physical and mental character with which they were endowed by their God, Yahweh, Who Himself had chosen David as their king. "These are the names of David's Mighty Men: "Josheb-Basshebeth, a Tahkemomite, was the chief . . . he raised his spear against eight hundred men, whom he killed in one encounter. "Eleazar son of Dodai the Ahohite . . . he was with David when they taunted the Philistines that were gathered at Pas Dammim for battle. The men of Israel retreated, but he stood his ground and struck down the Philistines till his hand grew tired and froze to the sword. The Lord brought about a great victory that day. "Shammah son of Agee the Harrarite. When the Philistines banded together . . . Israel's troops fled from them. But Shamma took his stand in the middle of the field. He defended it and struck the Philistines down, and the Lord brought about a great victory. "Abishai the brother of Joab . . . he raised his spear against three hundred men, whom he killed. "Benaiah son of Jehoida was a valiant fighter from Kabzeel . . . he struck down two of Moab's best men. He also went down into a pit on a snowy day and killed a lion, and he struck down a huge Egyptian. Although the Egyptian had a spear in his hand, Benaiah went against him with a club. He snatched the spear from the Egyptian's hand and killed him with his own spear. And David put him in charge of his bodyguard." Abishai, Benaiah and another warrior risked their lives to break through the lines of the Philistines and draw water from the well near the gate of Bethlehem to bring back to David a drink from that well. Although he longed to taste that water, David poured it out as an offering unto the Lord rather than to drink water for which his loyal and devoted warriors risked their lives. There were also among David's Mighty Men the following warriors: "Ashel the brother of Joab, Elhanan so

doctor of business administration liberty university: Economic Crime and Conceptions of Trust Petter Gottschalk, Christopher Hamerton, 2025-03-24 Economic Crime and Conceptions of Trust explores the intricacies of the contemporary concept of trust in episodes of misconduct through an analysis of workplace deviance and crime. Grounded in detailed examinations of contemporary case studies and bolstered by original comparative fieldwork, the text takes an offender-focused approach, emphasizing the pivotal role of convenience. Adopting an interdisciplinary perspective, the authors seek to enhance and broaden existing understanding of white-collar and corporate criminology, while also highlighting its relevance to strategic management studies. A core argument of the book is that the traditional emphasis on individual actors and notions of trustworthiness when conceptualising white-collar has waned in recent times. The authors' perspective revisits and builds upon this important foundational concept of late twentieth-century discourse within the discipline, signalling a need for a reassessment and highlighting a number of recent conceptual developments to evaluate and position trust within the twenty-first century globalized business sphere.

doctor of business administration liberty university: Corporate Compliance Petter Gottschalk, Christopher Hamerton, 2022-10-31 Compliance has long been identified by scholars of white-collar crime as a key strategic control device in the regulation of corporations and complex organisations. Nevertheless, this essential process has been largely ignored within criminology as a specific subject for close scrutiny - Corporate Compliance: Crime, Convenience and Control seeks to address this anomaly. This initiating book applies the theory of convenience to provide criminological insight into the enduring self-regulatory phenomenon of corporate compliance. Convenience theory suggests that compliance is challenged when the corporation has a strong financial motive for illegitimate profits, ample organisational opportunities to commit and conceal wrongdoing, and executive willingness for deviant behaviour. Focusing on white-collar deviance and crime within corporations, the book argues that lack of compliance is recurrently a matter of deviant behaviour by senior executives within organisations who abuse their privileged positions to commission, commit and conceal financial crime.

doctor of business administration liberty university: Donald Trump J.D. Rockefeller, 2015-11-21 As we travel down the roads of life, we are confronted consistently with decisions that we need to make. Donald Trump, based on the trials and successes that he has faced, teaches us that every important decision we make is going to determine what will happen in our lives in the future. For the most part, we are making most of our decisions without a need to give thought as to what that outcome of that decision will be. Donald made examples for us to further understand this, such as; we have to decide when to get out of bed and what we are going to do as soon as we get up. The options may be as simple as brushing our teeth to sitting down and having a cup of coffee, and may even consist of constructing a plan for building a business. The options that we have can be extremely complex or simple, depending on the situation. Each decision we make will influence our lives and business dealings either for better or for worse.

doctor of business administration liberty university: Corporate Compliance and Conformity Petter Gottschalk, 2023-03-10 Traditionally, control in organizations is concerned with top-down approaches, where executives attempt to direct their employees' attention, behaviors, and performance to align with the organization's goals and objectives. This book takes a new approach by turning the problem of control upside down as it focuses on control of executives who find white-collar crime convenient. The bottom-up approach to executive compliance focuses on organizational measures to make white-collar crime less convenient for potential offenders. Rather than focusing on the regulatory formalities and staged procedures of compliance and audits, the book emphasizes the organizational challenges involved in compliance work when trusted corporate officials exhibit deviant behavior, refining, and advancing knowledge in this field by reference to contemporary international case studies and associated original evaluative research. The themes and cases covered are carefully selected to provide the reader with an insight into professional conduct and procedural practice – the organization of corporate compliance success, failure, and corruption – with the theory of convenience placed at the fore. It is the bottom-up approach by application of convenience theory that makes the proposed book unique compared to other books on corporate compliance. This book is a valuable resource for scholars and upper-level students researching and studying in the areas of business administration, organizational behavior, corporate and white-collar crime, as well as business ethics and auditing.

doctor of business administration liberty university: Digital Strategies And Organizational Transformation G Reza Djavanshir, 2023-08-02 In today's highly competitive business environments, with the rise of digital businesses and digital economy, digital strategies and organizational changes go hand in hand. Organizations that possess a robust digital strategy benefit greatly from the advancements of emerging digital technologies, and hence, making necessary organizational changes in order to maximise the benefits have become vital for their survival. According to MIT Sloan's Center for Information Systems Research (CISR), '[i]n this period of digital disruption, businesses focused narrowly on value chains are at a disadvantage'. Next-generation enterprises need to think more broadly about their business ecosystems, leverage digitization to understand their customers better, and establish options for future success. Therefore, competitive businesses have started using a variety of digital tools including artificial intelligence, alongside other digital applications, making the required changes to their organizational models and cultures to better serve their customers efficiently and effectively. This book contains a collection of chapters describing these digital strategies and how they go hand in hand with organizational changes. We solicited contributions from well-known academics from universities, business leaders, and experts within businesses and government organizations for this book. The majority of the chapters examines the necessary relationships between these two critical issues. Specifically, this book discusses how to infuse new knowledge into ongoing discourse and debates within academia and business organizations regarding digital strategies and organizational changes, and how to accomplish seamless integration of digital tools and applications into organizational platforms in order to accomplish the required organizational changes smoothly. In summary, this book discusses the integration and implementation of digital technology and the required organizational changes to take advantage of the phenomenon of digitization. In order to create competitive advantage, leadership organizations must address the challenges of formulating and implementing robust digital strategies and simultaneously, start making the required organizational changes, as this book concludes.
