**emirates 777 business: The A380neo Business Case** Dr Addison M Schonland, Mr Ernest S Arvai, 2015-01-15 There is significant market pressure coming from Emirates for Airbus to offer an A380neo. Airbus cannot ignore this pressure, because the A380 program is in need of more sales, and currently Emirates represents the shortest path to such orders. An A380neo should be attractive to other A380 operators as well as other airlines considering VLAs. The VLA segment as a niche but is also valid market. This view puts the focus on order volume, rather than order revenues. VLA s have a historical average (1975-2014) order market share of 4%. Based on both the Airbus and Boeing forecast fleet size for 2033 we estimate the VLA segment to be ~1,000 aircraft.

**emirates 777 business: What you need to know about an airline - an aviation business handbook** Robin Andrae, Arne Semken , 2021-04-21 The intention of the book is grounded on the unbroken enthusiasm for airlines and the entire travel and transportation industry, as well as our interest in writing a compact handbook with basic knowledge about airlines (from the perspective of two consultants). Especially at the beginning of our career in the consulting industry, we realized that this basic knowledge about airlines is hidden in countless textbooks, websites and experiences of experts and that a compact handbook would certainly be beneficial. From this thought the idea was born to provide graduates, people interested in airlines, airline newcomers and airline experts a book, which makes the entry into the airline industry more enjoyable and easier. We hope that our book will give you interesting insights into this exciting industry and that it will inspire and stimulate you, especially with the organizational and theoretical models (which undoubtedly originate from our core competence as consultants). We hope you enjoy reading this book and wish you many valuable findings. Your Robin Andrae and Arne Semken

However, for decades airlines have been collapsing around the globe as the business of managing airline operations has become stressed due to price competition. This is detrimental to air carriers since air transport products and services are the same. Moreover, it impacts other industries such as tourism, hotels, and restaurants, which contribute to the derailment of economic and social activities. Thus, it is essential to determine new practices and strategies that can allow air transport management to be enriched and to flourish. *Global Air Transport Management and Reshaping Business Models for the New Era* provides a comprehensive collection of knowledge on the new era of business management on air transport.
