english for business courses: *English in Business and Commerce* Tamah Sherman, Jiri Nekvapil, 2018-05-07 This volume fills an important gap in exploring English in the domains of business and commerce through the prism of sociolinguistics and the sociology of language, as opposed to analyzing business genres or taking a linguodidactic approach. It expands the regional coverage of English in Europe, with several studies based in Central Europe, and also considers contexts which interact with Europe even though they are physically outside of it (Asia, Africa). It addresses English as just one of several languages at play in the ecology of the countries. It focuses not only on the position of languages as declared in documents of various organizations, that is, language policy, but also everyday linguistic practices as observed in business contexts, that is, interactions. The studies are divided into three thematic areas: ideologies and discourses on English in the business sphere, the management of English in business and organizational contexts, and English and other languages on local and international labor markets. It will be of interest to readers concerned with multilingualism in the economic sphere and the workplace and the interplay between macro and micro levels during the management of communication in organizations.

Now more than ever, the importance of learning English is paramount within nearly all professional and educational sectors. English for Specific Purposes (ESP) has long been accepted as an effective method for teaching English as a foreign language. In recent years, it has experienced an increasing presence in secondary and tertiary education across the globe. This is predominantly due to its learner-centered approach that focuses on developing linguistic competence in the student's specific discipline, may that be academics, business or tourism, for example. Positioning English for Specific Purposes in an English Language Teaching Context attempts to present and define the relevance and scope of ESP within English Language teaching. From mobile phones as educational tools to the language needs of medical students, the contributors to this volume examine and propose different epistemological and methodological aspects of ESP teaching. Its unique approach to ESP marks this volume out as an important and necessary contribution to existing ESP literature, and one that will be of use to both researchers and practitioners of ESP.
