embraer 175 business class: Saxophone Secrets Tracy Lee Heavner, 2013-01-25 Modeled on the brilliant approach first formulated by distinguished professor music and master clarinetist Michele Gingras in her Clarinet Secrets and More Clarinet Secrets (both available from Scarecrow Press), Tracy Heavner's Saxophone Secrets provides advanced saxophonists with 60 performance secrets that will assist in their musical development. This work is the result of 30 years of personal teaching and performance experience. Designed to be the go-to hands-on guide for practitioners, Heavner's strategies consider a vast array of issues for the saxophonist who needs to take that next big step up. Beginning chapters consider various brands of saxophones, mouthpieces, ligatures, reeds, and maintenance techniques that reflect the standard practices and expectations of the advanced performer. The secrets that follow develop and improve embouchure, tone, articulation, and finger technique, allowing saxophonists to analyze their own playing and adjust accordingly. Heavner pulls back the curtain further to introduce those secrets for developing the altissimo register and extended saxophone techniques, from circular breathing and multiphonics to slap and flutter tonguing--all absolute necessities for saxophonists seeking to play contemporary classical, jazz, or commercial music. Finally, Heavner concludes by letting musicians in on those little-revealed secrets for taking their saxophones on the road. embraer 175 business class: *Buying the Big Jets* Paul Clark, 2017-07-14 Selecting the right aircraft for an airline operation is a vastly complex process, involving a multitude of skills and considerable knowledge of the business. Buying the Big Jets has been published since 2001 to provide expert guidance to all those involved in aircraft selection strategies. This third edition brings the picture fully up to date, representing the latest developments in aircraft products and best practice in airline fleet planning techniques. It features a new section that addresses the passenger experience and, for the first time, includes regional jet manufacturers who are now extending their product families into the 100-plus seating category. Overall, the third edition looks at a broader selection of analytical approaches than previously and considers how fleet planning for cost-leader airlines differs from that of network carriers. Buying the Big Jets is an industry-specific example of strategic planning and is therefore a vital text for students engaged in graduate or post-graduate studies either in aeronautics or business administration. The book is essential reading for airline planners with fleet planning responsibility, consultancy groups, analysts studying aircraft performance and economics, airline operational personnel, students of air transport, leasing companies, aircraft value appraisers, and all who manage commercial aircraft acquisition programmes and provide strategic advice to decision-makers. It is also a valuable tool for the banking community where insights into aircraft acquisition decisions are vital.

embraer 175 business class: **Rooted Globalism** Kevin Funk, 2022-10-18 Does the concept of nationality apply to the economic elite, or have they shed national identities to form a global

capitalist class? In *Rooted Globalism*, Kevin Funk unpacks dozens of ethnographic interviews he conducted with Latin America's urban-based, Arab-descendant elite class, some of whom also occupy positions of political power in countries such as Argentina, Brazil, and Chile. Based on extensive fieldwork, Funk illuminates how these elites navigate their Arab ancestry, Latin American host cultures, and roles as protagonists of globalization. With the term rooted globalism, Funk captures the emergence of classed intersectional identities that are simultaneously local, national, transnational, and global. Focusing on an oft-ignored axis of South-South relations (between Latin America and the Arab world), *Rooted Globalism* provides detailed analysis of the identities, worldviews, and motivations of this group and ultimately reveals that rather than obliterating national identities, global capitalism relies on them.
