harding business office: Policing America's Empire Alfred W. McCoy, 2009-10-15 At the dawn of the twentieth century, the U.S. Army swiftly occupied Manila and then plunged into a decade-long pacification campaign with striking parallels to today's war in Iraq. Armed with cutting-edge technology from America's first information revolution, the U.S. colonial regime created the most modern police and intelligence units anywhere under the American flag. In *Policing America's Empire* Alfred W. McCoy shows how this imperial panopticon slowly crushed the Filipino revolutionary movement with a lethal mix of firepower, surveillance, and incriminating information. Even after Washington freed its colony and won global power in 1945, it would intervene in the Philippines periodically for the next half-century—using the country as a laboratory for counterinsurgency and rearming local security forces for repression. In trying to create a democracy in the Philippines, the United States unleashed profoundly undemocratic forces that persist to the present day. But security techniques bred in the tropical hothouse of colonial rule were not contained, McCoy shows, at this remote periphery of American power. Migrating homeward through both personnel and policies, these innovations helped shape a new federal security apparatus during World War I. Once established under the pressures of wartime mobilization, this distinctively American system of public-private surveillance persisted in various forms for the next fifty years, as an omnipresent, sub rosa matrix that honeycombed U.S. society with active informers, secretive civilian organizations, and government counterintelligence agencies. In each succeeding global crisis, this covert nexus expanded its domestic operations, producing new contraventions of civil liberties—from the harassment of labor activists and ethnic communities during World War I, to the mass incarceration of Japanese Americans during World War II, all the way to the secret blacklisting of suspected communists during the Cold War.

harding business office: Who Speaks for the President? W. Dale Nelson, 2000-05-01 When President Warren G. Harding fell ill in 1923, Steve Early, a reporter for the Associated Press, became skeptical of the innocuous bulletins being issued by the White House. He remained at the hotel where the president was staying, and when Florence Harding called out for a doctor, Early scrambled down a fire escape to file the story. His Associated Press report was six minutes ahead of others with the news of Harding's death. A decade later, when Franklin D. Roosevelt entered the White House, Steve Early became the first person to hold the title of presidential press secretary. Mike McCurry, Jody Powell, and Marlin Fitzwater have all become familiar names. But how has the role of the White House press secretary changed over the years? We see these spokespeople at White House briefings, hear them quoted by reporters-but what do they really do? Whom do they really serve: the president, or the press? In his latest book, former Associated Press journalist and White House reporter W. Dale Nelson provides an insightful look at what has gone on behind the scenes of the White House press podium from the 1890s to the Clinton administration. Nelson draws on interviews with former press secretaries, press office records, and his own experience as a White House reporter to trace the history of the position, from its early, informal days to its present, seminal role in the Clinton administration.
