hh business: Hal Hartley Mark L. Berrettini, 2011-01-05 Since the late 1980s, Hal Hartley has challenged standards of realist narrative cinema with daring narrative constructions, character development, and the creation of an unconventional visual world. In this pioneering critical overview of his work and its cultural-historical context, Mark L. Berrettini discusses seven of Hartley's feature films, including *The Unbelievable Truth*, *Trust*, *Simple Men*, *Amateur*, *Henry Fool*, *Fay Grim*, and *The Book of Life*. Drawing on journalism, theories of representation, narrative and genre, and cinema history, Berrettini discusses the absurdist-comedic representation of serious themes in Hartley's films: impossible love, coincidence and human relations, extreme isolation, and the restrictions posed by gender norms. He looks at the films' consistently absurd tone and notes how these themes reappear within framing narratives that shift from the seemingly mundane in Hartley's earliest works to the vibrantly creative and fantastic in his later films. Employing close analysis and theories related to cinematic narrative and to realism, the book's critical appraisal of Hartley's films considers aspects of American independent cinema and postwar European cinema, antirealism, and minimalism. The volume concludes with a pair of in-depth interviews with the director from two distinct points in his career.

hh business: Socio-Tech Innovation Latha Poonamallee, Joanne Scillitoe, Simy Joy, 2020-04-25 This book defines socio-technological innovation and lays out different aspects of

technology innovation and adoption literature as applied to socio-tech innovation and entrepreneurship. Socio-tech innovation refers to novel solutions that involve development or adoption of technological innovations to address social and/or environmental problems with a view towards creating benefit for the larger whole rather than just for the owners or investors. Unlike conventional technological innovation, socio-tech innovation either develops a product specifically for underserved markets and adopts a model in which the market is not an afterthought but the *raison d'être*. Social ventures have not been as successful in scaling up, though technology innovation-led ventures have; therefore, meaningful actionable insights that can help social ventures scale up successfully can be gleaned by this process. This book offers researchers in innovation and entrepreneurship programs a unique and interdisciplinary approach to studying social innovation that is grounded in technology innovation. This book features a series of socio-tech venture cases that illustrate these dynamics and can be used in undergraduate and graduate courses.
