Hungry and tired one night, Mike wanted a pizza, but getting a pizza delivered was a pain in the neck. He didn't want to call a million restaurants to see what was open. So, as an avid coder, he created GrubHub in his spare bedroom to figure out who delivered to his apartment. Then, armed with a \$140 check from his first customer and ignoring his crushing college debt, he quit his job. With a razor-sharp wit, Mike reveals hard-won truths about how startups succeed—and even harder-won truths about how startups fail. Shocking everyone, at the pinnacle of startup success, Mike leaves it all behind, quitting the company he started to bike across the United States in search of balance. This book sounds an alarm: we can no longer afford to be lulled into complacency by narratives of techno-utopianism, or even techno-neutrality. We should not be reassured by such soothing generalities as human error, virtual reality, or the cloud. We need to realize that nothing is virtual: everything that happens online, virtually, or autonomously happens offline first, and often involves human beings whose labor is deliberately kept invisible. Everything is IRL. In *Your Computer Is on Fire*, technology scholars train a spotlight on the inequality, marginalization, and biases woven into our technological systems.

how to put your business on grubhub: *Break 'Em Up* Zephyr Teachout, 2020-07-28 A passionate attack on the monopolies that are throttling American democracy. “[We need] a grassroots, bottom-up movement that understands the challenge in front of us, and then organizes against monopoly power in communities across this country. This book is a blueprint for that organizing. In these pages, you will learn how monopolies and oligopolies have taken over almost every aspect of American life, and you will also learn about what can be done to stop that trend before it is too late.”—from the foreword by Bernie Sanders Every facet of American life is being overtaken by big platform monopolists like Facebook, Google, and Bayer (which has merged with the former agricultural giant Monsanto), resulting in a greater concentration of wealth and power than we've seen since the Gilded Age. They are evolving into political entities that often have more influence than the actual government, bending state and federal legislatures to their will and even creating arbitration courts that circumvent the US justice system. How can we recover our freedom from these giants? Anti-corruption scholar and activist Zephyr Teachout has the answer: *Break 'Em*

Up. This book is a clarion call for liberals and leftists looking to find a common cause. Teachout makes a compelling case that monopolies are the root cause of many of the issues that today's progressives care about; they drive economic inequality, harm the planet, limit the political power of average citizens, and historically-disenfranchised groups bear the brunt of their shameful and irresponsible business practices. In order to build a better future, we must eradicate monopolies from the private sector and create new safeguards that prevent new ones from seizing power. Through her expert analysis of monopolies in several sectors and their impact on courts, journalism, inequality, and politics, Teachout offers a concrete path toward thwarting these enemies of working Americans and reclaiming our democracy before it's too late. "A shocking guide book to these corporate Dark Ages, these frightening times when private power seems to grow ever more centralized and the ordinary world we live in feels like it is dissolving. Thankfully, it is also a road map to the exit. Read it and let's get ourselves out of this awful place."—Thomas Frank, author of *Listen, Liberal* "A passionate and persuasive case for a revitalized antitrust movement to strengthen democracy and improve the lives of middle- and working-class Americans.... Teachout delivers a forceful, clearly articulated vision of "moral markets" built on freedom, choice, and human dignity. Progressives will heed this clarion call for reform."—Publishers Weekly (starred review)

how to put your business on grubhub: The Next Supper Corey Mintz, 2021-11-16 A searing expose of the restaurant industry, and a path to a better, safer, happier meal. In the years before the pandemic, the restaurant business was booming. Americans spent more than half of their annual food budgets dining out. In a generation, chefs had gone from behind-the-scenes laborers to TV stars. The arrival of Uber Eats, DoorDash, and other meal delivery apps was overtaking home cooking. Beneath all that growth lurked serious problems. Many of the best restaurants in the world employed unpaid cooks. Meal delivery apps were putting restaurants out of business. And all that dining out meant dramatically less healthy diets. The industry may have been booming, but it also desperately needed to change. Then, along came COVID-19. From the farm to the street-side patio, from the sweaty kitchen to the swarm of delivery vehicles buzzing about our cities, everything about the restaurant business is changing, for better or worse. *The Next Supper* tells this story and offers clear and essential advice for what and how to eat to ensure the well-being of cooks and waitstaff, not to mention our bodies and the environment. *The Next Supper* reminds us that breaking bread is an essential human activity and charts a path to preserving the joy of eating out in a turbulent era.
