And we deserve answers. *Bulletproof: The Truth about the Assassination Attempts on Donald Trump* is the first complete preliminary investigative report on the attempted assassination of President Donald J. Trump that occurred on July 13, 2024, at 6:11 p.m. Eastern Daylight Time in Butler, PA, USA. *Bulletproof* reconstructs a minute-by-minute parallel timeline of each step of that fateful July day for President Trump, law enforcement agencies, and the would-be assassin and digs deeper than the official narrative, asking uncomfortable questions about how this event occurred and going deeper than mainstream media ever will. jd vance business: *Company Men* Sean Delehanty, 2025-10-20 How an esoteric economic theory—and its most devout believers—changed the world forever. In the modern economy, stock price is king. The value of a corporation is measured in how it enriches its shareholders, even when doing so subtracts from long-term growth or social good. Greed, in the last half-century of corporate practice, has become very good. *Company Men* is a sweeping intellectual history of how shareholder value rose from the lesser-known edges of academic theory to the vanguard of corporate practice. Historian Sean Delehanty marshals archival resources to reveal how a group of motivated consultants, activist investors, and academic economists successfully branded shareholder value as the antidote to problems of management and economic stagnation in the 1970s. In their success, they created a class of well-heeled managers who executed shareholder-value theory as an everyday practice—and at the expense of most everything else. Delehanty’s history of the modern American corporation is a sobering account of the business regime that would rule the world and produce no shortage of regrets—even amongst those who championed it. *Company Men* is intellectual history at its most vital, offering a surprising origin story of our economy’s discontents.

jd vance business: The Venture Alchemists Rob Lalka, 2024-05-14 Gold Medalist, 2025 Axiom Business Book Awards, Business Ethics - Future Trends category Shortlist, 2024 Best in Business Book Awards, Society for Advancing Business Editing and Writing We once idolized tech entrepreneurs for creating innovations that seemed like modern miracles. Yet our faith has been shattered. We now blame them for spreading lies, breaking laws, and causing chaos. Yesterday's Silicon Valley darlings have become today's Big Tech villains. Which is it? Are they superheroes or scoundrels? Or is it more complicated, some blend of both? In *The Venture Alchemists*, Rob Lalka demystifies how tech entrepreneurs built empires that made trillions. Meta started as a cruel Halloween prank, Alphabet began as a master's thesis that warned against corporate deception, and Palantir came from a campus controversy over hateful speech. These largely forgotten origin stories show how ordinary fears and youthful ambitions shaped their ventures—making each tech tale relatable, both wonderfully and tragically human. Readers learn about the adversities tech entrepreneurs overcame, the troubling tradeoffs they made, and the tremendous power they now wield. Using leaked documents and previously unpublished archival material, Lalka takes readers inside Big Tech's worst exploitations and abuses, alongside many good intentions and moral compromises. But this story remains unfinished, and *The Venture Alchemists* ultimately offers hope from the people who, decades ago, warned about the risks of the emerging Internet. Their insights illuminate a path toward more responsible innovations, so that technologies aren't dangerous weapons but valuable tools that ensure progress, improve society, and enhance our daily lives.

jd vance business: *Holding It Together* Jessica Calarco, 2024-06-04 Other countries have social safety nets. The U.S. has women. *Holding It Together* chronicles the causes and dire consequences. America runs on women—women who are tasked with holding society together at the seams and fixing it when things fall apart. In this tour de force, acclaimed Sociologist Jessica Calarco lays bare the devastating consequences of our status quo. *Holding It Together* draws on five years of research in which Calarco surveyed over 4000 parents and conducted more than 400 hours of interviews with women who bear the brunt of our broken system. A widowed single mother struggles to patch together meager public benefits while working three jobs; an aunt is pushed into caring for her niece and nephew at age fifteen once their family is shattered by the opioid epidemic; a daughter becomes the backstop caregiver for her mother, her husband, and her child because of the perceived flexibility of her job; a well-to-do couple grapples with the moral dilemma of leaning on overworked, underpaid childcare providers to achieve their egalitarian ideals. Stories of grief and guilt abound. Yet, they are more than individual tragedies. Tracing present-day policies back to their roots, Calarco reveals a systematic agreement to dismantle our country's social safety net and persuade citizens to accept precarity while women bear the brunt. She leads us to see women's labor as the reason we've gone so long without the support systems that our peer nations take for granted, and how women's work maintains the illusion that we don't need a net. Weaving eye-opening original research with revelatory sociological narrative, *Holding It Together* is a bold call to demand the institutional change that each of us deserves, and a warning about the perils of living without it.

Economic policy set at the whim of one man. Tariffs up one day and down the next. Businesses bewildered, consumers alarmed. As Donald Trump wages his trade war, what will become of a global economy dependent on close trading links? Leading financial journalist Philip Coggan lifts the lid on Trump's economic gamble, why it's a universal threat and how we can make sense of this new 'age of chaos'. This is his clear-sighted and powerful rallying cry in defence of global trade - and why it matters for the world.

jd vance business: *Furious Minds* Laura K. Field, 2025-11-04 The story of the radical conservative intellectual movement shaping Donald Trump's agenda—and how it threatens American freedoms, values, and democracy Donald Trump is not a big thinker, but his 2016 presidential victory presented a grand opportunity for people who are, and it set off a radicalization and reconfiguration of the American conservative intellectual world. In *Furious Minds*, Laura Field, who spent close to a decade in conservative academic circles, chronicles the rise of the New Right—the network of academics, public intellectuals, and influencers who provide ideological fuel to Trumpism. This movement includes figures such as Patrick Deneen, Christopher Rufo, Peter Thiel, and JD Vance. Their agenda is built to last, and it has dire long-term implications for liberal democracy. The New Right has precedents in American history, but it is distinct for its youthfulness, misogyny, and extraordinary successes—most notably the elevation of Vance to the vice presidency. The movement—which draws together associates of the right-wing Claremont Institute, National Conservatives, Postliberals, and the Hard Right—advocates nationalist economics, tight borders, isolationism, and reactionary social values. It helped to strategize January 6th and created Project 2025. But above all, the New Right is engaged in a vast culture war against modern liberal pluralism. It is determined to harness state power and use it in new, illiberal ways, from college campuses to the international scene—all driven by the fantasy of restoring a pure America. Incisive and urgent, *Furious Minds* tells the story of the thinkers of the New Right—and their powerful assault on American freedoms, values, and ideals.

jd vance business: *Political Tribes* Amy Chua, 2018-02-20 The bestselling author of *Battle*

Hymn of the Tiger Mother, Yale Law School Professor Amy Chua offers a bold new prescription for reversing our foreign policy failures and overcoming our destructive political tribalism at home. Humans are tribal. We need to belong to groups. In many parts of the world, the group identities that matter most – the ones that people will kill and die for – are ethnic, religious, sectarian, or clan-based. But because America tends to see the world in terms of nation-states engaged in great ideological battles – Capitalism vs. Communism, Democracy vs. Authoritarianism, the “Free World” vs. the “Axis of Evil” – we are often spectacularly blind to the power of tribal politics. Time and again this blindness has undermined American foreign policy. In the Vietnam War, viewing the conflict through Cold War blinders, we never saw that most of Vietnam’s “capitalists” were members of the hated Chinese minority. Every pro-free-market move we made helped turn the Vietnamese people against us. In Iraq, we were stunningly dismissive of the hatred between that country’s Sunnis and Shias. If we want to get our foreign policy right – so as to not be perpetually caught off guard and fighting unwinnable wars – the United States has to come to grips with political tribalism abroad. Just as Washington’s foreign policy establishment has been blind to the power of tribal politics outside the country, so too have American political elites been oblivious to the group identities that matter most to ordinary Americans – and that are tearing the United States apart. As the stunning rise of Donald Trump laid bare, identity politics have seized both the American left and right in an especially dangerous, racially inflected way. In America today, every group feels threatened: whites and blacks, Latinos and Asians, men and women, liberals and conservatives, and so on. There is a pervasive sense of collective persecution and discrimination. On the left, this has given rise to increasingly radical and exclusionary rhetoric of privilege and cultural appropriation. On the right, it has fueled a disturbing rise in xenophobia and white nationalism. In characteristically persuasive style, Amy Chua argues that America must rediscover a national identity that transcends our political tribes. Enough false slogans of unity, which are just another form of divisiveness. It is time for a more difficult unity that acknowledges the reality of group differences and fights the deep inequities that divide us.

jd vance business: RIP GOP Stanley B. Greenberg, 2019-09-10 A leading pollster and adviser to America’s most important political figures explains why the Republicans will crash in 2020. For decades the GOP has seen itself in an uncompromising struggle against a New America that is increasingly secular, racially diverse, and fueled by immigration. It has fought non-traditional family structures, ripped huge holes in the social safety net, tried to stop women from being independent, and pitted aging rural Evangelicals against the younger, more dynamic cities. Since the 2010 election put the Tea Party in control of the GOP, the party has condemned America to years of fury, polarization and broken government. The election of Donald Trump enabled the Republicans to make things even worse. All seemed lost. But the Republicans have set themselves up for a shattering defeat. In *RIP GOP*, Stanley Greenberg argues that the 2016 election hurried the party’s imminent demise. Using amazing insights from his focus groups with real people and surprising revelations from his own polls, Greenberg shows why the GOP is losing its defining battle. He explores why the 2018 election, when the New America fought back, was no fluke. And he predicts that in 2020 the party of Lincoln will be left to the survivors, opening America up to a new era of renewal and progress.

jd vance business: Go Back to where You Came from Sasha Polakow-Suransky, 2017 What if the new far right poses a graver threat to liberal democracy than jihadists or mass migration? From Europe to the United States and beyond, opportunistic politicians have exploited economic crisis, terrorist attacks and an influx of refugees to bring hateful and reactionary views from the margins of political discourse into the corridors of power. This climate has already helped propel Donald Trump to the White House, pushed Britain out of the European Union, and put Marine Le Pen within striking distance of the French presidency. Sasha Polakow-Suransky's on-the-ground reportage and interviews with the rising stars of the new right tell the story of how we got here, tracing the global rise of anti-immigration politics and the ruthlessly effective rebranding of Europe's new far right as defenders of Western liberal values. *Go Back to Where You Came From* is an indispensable account

of why xenophobia went mainstream in countries known historically as defenders of human rights and models of tolerance.

jd vance business: Harris Versus Trump: America's Existential Futures Steven Rosefielde, Daniel Quinn Mills, 2024-10-16 American presidential election campaigns are supposed to inform the public about present dangers and opportunities, enabling voters to choose the candidate most likely to defend the quality of national existence. The Democratic and Republican parties instead prioritize mobilizing electoral support with appeals to identity, ideology, idealism and fear. Instead of providing voters with an appreciation of how their partisan programs are likely to affect them, both parties demonize each other and barrage the public with deceptive idealist appeals. Clearly, controlling the narrative is more important to the candidates than candidly addressing present dangers and opportunities. This results in narratives that are full of sound and fury, yet signify little. Avoiding the media melodrama and adopting a non-partisan position, Harris versus Trump: America's Existential Futures identifies the power-seeking goals of the Democratic and Republican parties, and their path-dependent systemic consequences. The flagbearers of the two parties, Kamala Harris and Donald Trump, offer voters two distinct 'existential' futures that only come into focus with detailed examinations of the real present dangers and opportunities. Hence, this book surveys key domestic and foreign challenges confronting the United States, obscured by campaign rhetoric, and discusses the candidates' implicit and explicit attitudes toward them. Harris versus Trump considers America's prospects under Harris and Trump regimes, revealing that the outcome of the November 2024 election is likely to matter more fundamentally than most observers appreciate.

jd vance business: Leadership in War and Peace Joan Johnson-Freese, 2025-03-31 This book offers a gendered perspective on leadership in war and peace, considering leadership in its complexity and presenting a practical examination of both leadership successes and failures. The work challenges readers to think through and discuss specific aspects of leadership, including how and why leadership diversity matters and the ethical challenges presented by the revolving door of the military-industrial complex. Further, leaders responsible for decisions involving war and peace must be able to understand, appreciate, and communicate effectively with everyone they work with and have a repertoire of leadership styles to use depending on context. The book represents an excellent tool for developing such skills, as it uniquely considers leadership through both male and female lenses, along with the experiences and perspectives of multiple military, government, and industry leaders interviewed by the author, making it both relatable and informative. This book will be of much interest to students of gender studies, leadership studies, defense studies, and military studies in general, as well as military and security practitioners.
