jewish business networking: Family Betrayal David Burke, 2021-05-25 In 1933, the celebrated German economist Robert Kuczynski and his wife Berta arrived in Britain as refugees from Nazism, followed shortly afterwards by their six children. Jürgen, known to be a leading Communist, was an object of considerable concern to MI5, while Ursula, codenamed Sonya, was a colonel in Russia's Red Army who had spied on the Japanese in Manchuria. MI5 also kept extensive files on their four sisters, Brigitte, Barbara, Sabine and Renate. During the crucial early stages of the Cold War, members of the Kuczynski family proved to be prime Soviet assets as enablers and agents of influence. In Britain, Ursula controlled the spies Klaus Fuchs and Melita Norwood, without whom the Soviet atomic bomb would have been delayed for at least five years. Drawing on newly released files, Agent Sonya, MI5 and the Kuczynski Network reveals the operations of a network at the heart of Soviet intelligence in Britain. Over seventy years of espionage activity the Kuczynskis and their associates gained access to high-ranking officials in the government, civil service and justice system. For the first time, acclaimed historian David Burke tells the whole story of one of the most accomplished spy rings in history.

What did the Jewish and Muslim Enlightenment movements have in common? In which respects were the experiences of Jews and Muslims fundamentally different? jewish business networking: Insecure Prosperity Ewa Morawska, 2021-04-13 This captivating story of the Jewish community in Johnstown, Pennsylvania reveals a pattern of adaptation to American life surprisingly different from that followed by Jewish immigrants to metropolitan areas. Although four-fifths of Jewish immigrants did settle in major cities, another fifth created small-town communities like the one described here by Ewa Morawska. Rather than climbing up the mainstream education and occupational success ladder, the Jewish Johnstownians created in the local economy a tightly knit ethnic entrepreneurial niche and pursued within it their main life goals: achieving a satisfactory standard of living against the recurrent slumps in local mills and coal mines and enjoying the company of their fellow congregants. Rather than secularizing and diversifying their communal life, as did Jewish immigrants to larger cities, they devoted their energies to creating and maintaining an inclusive, multipurpose religious congregation. Morawska begins with an extensive examination of Jewish life in the Eastern European regions from which most of Johnstown's immigrants came, tracing features of culture and social relations that they brought with

them to America. After detailing the process by which migration from Eastern Europe occurred, Morawska takes up the social organization of Johnstown, the place of Jews in that social order, the transformation of Jewish social life in the city, and relations between Jews and non-Jews. The resulting work will appeal simultaneously to students of American history, of American social life, of immigration, and of Jewish experience, as well as to the general reader interested in any of these topics.

jewish business networking: The Decisive Network Nadya Bair, 2020-07-07 Since its founding in 1947, the legendary Magnum Photos agency has been telling its own story about photographers who were witnesses to history and artists on the hunt for decisive moments. Based on unprecedented archival research, *The Decisive Network* unravels Magnum's mythologies to offer a new history of what it meant to shoot, edit, and sell news images after World War II. Nadya Bair shows that between the 1940s and 1960s, Magnum expanded the human-interest story to global dimensions while bringing the aesthetic of news pictures into new markets. Working with a vast range of editorial and corporate clients, Magnum made photojournalism integral to postwar visual culture. But its photographers could not have done this alone. By unpacking the collaborative nature of photojournalism, this book shows how picture editors, sales agents, spouses, and publishers helped Magnum photographers succeed in their assignments and achieve fame. Bair concludes in the late 1960s and early 1970s, when changing market conditions led Magnum to consolidate its brand. In that moment, Magnum's photojournalists became artists and their assignments oeuvres. Bridging art history, media studies, cultural history, and the history of communication, *The Decisive Network* transforms our understanding of the photographic profession and the global circulation of images in the predigital world.

jewish business networking: Modern Spain and the Sephardim Maite Ojeda-Mata, 2017-12-20 *Modern Spain and the Sephardim: Legitimizing Identities* addresses the legal, political, symbolic, and conceptual consequences of the development of a new framework of relations between the Spanish state and the descendants of the Jews expelled from the Iberian kingdoms in 1492 from its beginnings in the nineteenth century to its unexpected consequences during World War II. This book aims to understand and explain the unchallenged idea of the Sephardim as a mix of Spaniard and Jew that emerged in Spain in the second half of the nineteenth century. Maite Ojeda-Mata examines the processes that led to this ambivalent conceptualization of Sephardic identity, as both Spanish and Jewish, and its consequences for the Sephardic Jews.

jewish business networking: International Entrepreneurship Susan Freeman, Ying Zhu, Malcolm Warner, 2020-05-21 This book explores the importance of entrepreneurs in driving economic growth as the world economy grows and becomes more integrated and more challenging. It examines the situation in both advanced and developing countries and shows how the entrepreneurial orientation of the founders of small and medium sized enterprises has resulted in phenomenal growth, often fuelled by innovation and new technologies. It contrasts the experiences of Chinese family business in China and among the overseas Chinese with the experiences of family businesses in the United States and Europe. One important conclusion is that there has been a noticeable fall in entrepreneurial proclivity in the advanced economies, in contrast to the position in emerging economies.

jewish business networking: Social Networking in South-Eastern Europe Maria Baramova, Grigor Boykov, Ivan Parvev, 2021 "Social Networking" in South-Eastern Europe in the 15th-19th centuries exhibits specific characteristics: the Ottomans and the Habsburgs, for example, each have their pattern of building and using social networks, with the "Third South-Eastern Europe", i.e., the vassal principalities in the Balkans and the re-created national states, staying closer in the Ottoman pattern. It seems that the Muslim-Oriental social traditions established in the Balkans during Ottoman rule had a clear impact on the building of networks and the exercising of social influence. The specific regional practices, once established, were very hard to overcome or to

replace by other patterns of social networking. These practices, however, could easily interact in border areas with one other, giving the inhabitants on both sides of the frontier the possibility of living a socially amphibious life, at least in terms of Social Networking.
