Corporate communicative competence involves various aspects, including the foreign language skills of the employees covering the entire range of linguistic skills from oral communication including listening and speaking, giving presentations or participating in negotiations to writing skills ranging from reading and writing of various text types, including media literacy. Apart from the personal linguistic competence of the employees, the corporate linguistic competence of the company also plays a major role for the perception of the company on its international markets. Therefore this study focused on investigating how well SMEs present themselves in their corporate literature and on the internet, which instruments from the wide-ranging selection of marketing tools they apply for communicating [...]
