

lumira business objects

lumira business objects is a powerful business intelligence tool that enhances data visualization and reporting capabilities for organizations. It enables users to make data-driven decisions with ease and efficiency. This article will delve into the functionalities, benefits, and applications of Lumira within the Business Objects ecosystem, as well as its role in data analytics and visualization. We will explore how Lumira integrates with other tools, its user interface, and best practices for maximizing its potential. Additionally, we will provide insights into the future of Lumira and its relevance in the evolving landscape of business intelligence.

- Introduction to Lumira Business Objects
- Key Features of Lumira
- Benefits of Using Lumira
- Integration with SAP Business Objects
- User Interface and Experience
- Best Practices for Effective Use
- Future Trends in Business Intelligence
- Conclusion
- FAQs about Lumira Business Objects

Introduction to Lumira Business Objects

Lumira Business Objects, developed by SAP, is designed to facilitate data visualization and enhance analytical capabilities within organizations. It allows users to connect to various data sources, transform data into actionable insights, and create interactive visualizations that help stakeholders understand complex information. With its emphasis on self-service analytics, Lumira empowers business users to create reports and dashboards without needing extensive technical knowledge.

The tool is particularly beneficial for organizations that have already invested in the SAP Business Objects suite, as it seamlessly integrates into the existing ecosystem. Lumira provides businesses with the tools they need to harness the power of their data, thereby driving better decision-making and fostering a data-driven culture.

Key Features of Lumira

Lumira Business Objects is equipped with a range of features that set it apart in the business intelligence landscape. These features include data connectivity, visualization options, and collaborative functionalities.

Data Connectivity

Lumira supports a variety of data sources, allowing users to connect to databases, spreadsheets, and cloud applications. This flexibility ensures that users can access relevant data from different platforms, which is crucial for comprehensive analysis.

Visualization Options

The tool offers an extensive library of visualization types, including charts, graphs, and maps. Users can choose from these options to represent their data in the most effective manner, making it easier to convey insights and trends.

Collaboration and Sharing

Lumira facilitates collaboration among team members by allowing users to share dashboards and reports easily. This functionality promotes a culture of shared insights and collective decision-making within organizations.

Benefits of Using Lumira

Integrating Lumira into an organization's analytics strategy can yield numerous benefits that enhance overall business performance.

- **Enhanced Data Visualization:** Lumira's diverse visualization options help users present complex data in an easily digestible format.
- **Self-Service Analytics:** Business users can create their reports without relying on IT, reducing bottlenecks and promoting agility.
- **Improved Decision-Making:** Access to real-time data and insights allows organizations to make informed decisions quickly.
- **Cost-Effective:** By enabling self-service capabilities, organizations can reduce the need for

extensive IT resources dedicated to report creation.

- **Scalability:** Lumira can grow with the organization, accommodating increasing volumes of data and more complex analytical needs.

Integration with SAP Business Objects

One of the standout features of Lumira is its seamless integration with the SAP Business Objects platform. This integration enhances the capabilities of both tools, enabling organizations to maximize their investment in business intelligence.

Compatibility with Existing Infrastructure

Organizations that have already adopted SAP Business Objects will find that Lumira complements their existing analytics infrastructure. Users can leverage data from Business Objects universes and incorporate it into Lumira for advanced visualization and analysis.

Centralized Management and Governance

The integration ensures that data governance and security protocols established in SAP Business Objects are maintained when using Lumira. This centralized management allows for better compliance and control over data access.

User Interface and Experience

Lumira is designed with user experience in mind, offering an intuitive interface that simplifies the data analysis process. The layout is clean and organized, allowing users to navigate easily between different functionalities.

Drag-and-Drop Functionality

The drag-and-drop interface enables users to create visualizations quickly and effortlessly. This feature is particularly beneficial for those who may not have extensive technical skills, as it reduces the learning curve associated with data analytics tools.

Responsive Design

Lumira's responsive design ensures that dashboards and reports can be accessed and viewed on various devices, including tablets and smartphones. This flexibility allows users to engage with data on the go, facilitating timely decision-making.

Best Practices for Effective Use

To fully leverage the capabilities of Lumira Business Objects, organizations should consider implementing several best practices.

- **Training and Support:** Providing comprehensive training for users can enhance their proficiency and confidence in using Lumira.
- **Establish Clear Objectives:** Organizations should define clear analytics objectives to guide users in their data exploration and visualization efforts.
- **Promote Collaboration:** Encourage users to share insights and dashboards with colleagues to foster a collaborative analytics culture.
- **Regularly Update Data Sources:** Ensure that the data sources connected to Lumira are up to date to provide accurate and timely insights.
- **Utilize Templates:** Create and share templates for common reports and visualizations to save time and ensure consistency across the organization.

Future Trends in Business Intelligence

The landscape of business intelligence is continuously evolving, and Lumira Business Objects is positioned to adapt to emerging trends. Organizations must stay informed about these trends to maintain a competitive edge.

Increased Focus on AI and Machine Learning

As businesses increasingly rely on artificial intelligence and machine learning, Lumira can integrate these technologies to enhance data analytics capabilities. Predictive analytics will become more prevalent, allowing organizations to forecast trends and make proactive decisions.

Self-Service Analytics Growth

The demand for self-service analytics is expected to rise, with more organizations empowering non-technical users to explore data independently. Lumira's user-friendly interface positions it well to meet this demand.

Conclusion

Lumira Business Objects stands out as a vital tool for organizations looking to enhance their data visualization and analytics capabilities. With its robust features, seamless integration with SAP Business Objects, and user-friendly interface, Lumira empowers business users to make data-driven decisions effectively. As the field of business intelligence continues to evolve, Lumira is poised to adapt and provide valuable insights that drive organizational success.

FAQs about Lumira Business Objects

Q: What is Lumira Business Objects used for?

A: Lumira Business Objects is used for data visualization, reporting, and analytics, enabling users to create interactive dashboards and insights from various data sources.

Q: How does Lumira integrate with SAP Business Objects?

A: Lumira integrates seamlessly with SAP Business Objects, allowing users to leverage existing data sources and maintain governance protocols while enhancing visualization capabilities.

Q: What are the key features of Lumira?

A: Lumira offers features such as data connectivity, a wide range of visualization options, collaborative functionalities, and a user-friendly interface with drag-and-drop capabilities.

Q: Can non-technical users utilize Lumira effectively?

A: Yes, Lumira is designed for self-service analytics, allowing non-technical users to create reports and visualizations without extensive training.

Q: What are the benefits of using Lumira in an organization?

A: Benefits include enhanced data visualization, self-service analytics, improved decision-making, cost-effectiveness, and scalability to meet growing analytical needs.

Q: What trends should organizations be aware of regarding business intelligence?

A: Organizations should focus on increased adoption of AI and machine learning, growth in self-service analytics, and the importance of data governance in their business intelligence strategies.

Q: How can organizations ensure effective use of Lumira?

A: Organizations can ensure effective use by providing training, establishing clear objectives, promoting collaboration, regularly updating data sources, and utilizing templates for consistency.

Q: Is Lumira suitable for real-time data analysis?

A: Yes, Lumira supports real-time data connectivity, allowing users to analyze and visualize data as it changes, which is crucial for timely decision-making.

lumira business objects: Getting Started with SAP Lumira Christian Ah-Soon, Peter Snowdon, 2014-12-30 Take your data viz up a notch with SAP Lumira! In this book, get the whole story on using SAP Lumira to create compelling infographics, storyboards, and more. Learn how to access and query data sources, create new objects, export and publish data, and use the SAP Lumira SDK to enhance and extend data sources and visualizations. With step-by-step instructions, screenshots, and detailed examples, you'll learn how to make each picture or chart worth a thousand words.

lumira business objects: SAP Lumira Essentials Dmitry Anoshin, 2015-09-03 Discover how to make your business data more interactive and engaging with SAP Lumira About This Book Create a powerful data discovery experience with the advanced capabilities of SAP Lumira Find business insights in your data through data blending, wrangling, transformation, and visualization A fast-paced guide packed with hands-on practical examples, real-world solutions, and best practices to get you started with SAP Lumira Who This Book Is For If you are a SAP user, business analyst, BI developer, or a junior data engineer who wants to use SAP Lumira to build creative visualizations, this book is for you. You should have a reasonable level of knowledge of SAP Business Objects and its components. What You Will Learn Deploy SAP Lumira on your computer and learn more about the SAP Lumira interface Extract data from different sources using SAP Lumira's data connectors Prepare, filter, clean, and format your data Discover visualization techniques and data discovery methods Administrate and customize SAP Lumira to get basic knowledge of its SDK Create various charts to deliver fantastic data visualizations Connect to SAP BusinessObjects BI Platform and SAP HANA to extract, prepare, and visualize data In Detail SAP Lumira allows you to combine data from multiple sources into a single view and create engaging visualizations quickly and easily. It is a reporting platform that helps users access data and independently perform analysis. With the

increasing interest in data discovery, self-service BI, and visualization around the world, tools like SAP Lumira help to eliminate the complexities of analyzing and discovering data. Learn data discovery techniques, build amazing visualizations, create fantastic stories, and share your visualizations through an electronic medium with one of the most powerful tools around—SAP Lumira. You will begin with an overview of the SAP Lumira family of products. You will then go through various data discovery techniques using real-world scenarios of an online e-commerce retailer through detailed recipes on the installation, administration, and customization of SAP Lumira. Next, you will work with data, starting from acquiring data from various data sources, then preparing and visualizing it using the rich functionality of SAP Lumira. Finally, you will present data via a data story or infographic and publish it across your organization or on the World Wide Web. Style and approach This is a step-by-step guide to learning SAP Lumira essentials packed with examples on real-world problems and solutions.

lumira business objects: *SAP Business Analytics* Sudipa DuttaRoy, 2016-11-12 Focus on SAP business analytics business gains, key features, and implementation. The book includes example implementations of SAP business analytics, the challenges faced, and the solutions implemented. SAP Business Analytics explains both the strategy and technical implementation for gathering and analyzing all the information pertaining to an organization. Key features of the book are: A 360-degree view of an organization's data and the methods to gather and analyze that data The strategies that need to be in place to gather relevant data from disparate systems Details about the SAP business analytics suite of products The technical implementations used to gather data from disparate systems such as ERP and CRM Real business cases as examples Analytics is the driving force in today's business, be it healthcare, marketing, telecommunications, or retail and hence the most vital part of any organization's strategy. What You'll Learn Gain an understanding of business analytics in general Absorb the technical details of the SAP business analytics suite of products Discover the challenges faced during an enterprise-level analytics project implementation Learn the key points to be kept in mind during the technical implementation of an SAP business analytics project Who This Book Is For Analytics strategists, BI managers, BI architects, business analysts, and BI developers.

lumira business objects: *SAP Business Intelligence Quick Start Guide* Vinay Singh, 2019-02-27 Designing and deploying solutions using the SAP BusinessObjects Business Intelligence platform 4.2. Key FeaturesGet up and running with the SAP BusinessObjects Business Intelligence platformPerform effective data analysis and visualization for actionable insightsEnhance your BI strategy by creating different types of reports and dashboards using SAP BusinessObjectsBook Description The SAP BusinessObjects Business Intelligence platform is a powerful reporting and analysis tool. This book is the ideal introduction to the SAP BusinessObjects Business Intelligence platform, introducing you to its data visualization, visual analytics, reporting, and dashboarding capabilities. The book starts with an overview of the BI platform and various data sources for reporting. Then, we move on to looking at data visualization, analysis, reporting, and analytics using BusinessObjects Business Intelligence tools. You will learn about the features associated with reporting, scheduling, and distribution and learn how to deploy the platform. Toward the end, you will learn about the strategies and factors that should be considered during deployment. By the end, you will be confident working with the SAP BusinessObjects Business Intelligence platform to deliver better insights for more effective decision making. What you will learnWork with various tools to create interactive data visualization and analysis Query, report, and analyze with SAP Business Objects Web IntelligenceCreate a report in SAP Crystal Reports for EnterpriseVisualize and manipulate data using an SAP Lumira StoryboardDeep dive into the workings of the SAP predictive analytics toolDeploy and configure SAP BO Intelligence platform 4.2Who this book is for This book is for Business Intelligence professionals and existing SAP ecosystem users who want to perform effective Business Intelligence using SAP BusinessObjects.

lumira business objects: *Information Technology and Systems* Álvaro Rocha, Carlos Ferrás, Manolo Paredes, 2019-01-28 This book features a selection of articles from The 2019 International

Conference on Information Technology & Systems (ICITS'19), held at the Universidad de Las Fuerzas Armadas, in Quito, Ecuador, on 6th to 8th February 2019. ICIST is a global forum for researchers and practitioners to present and discuss recent findings and innovations, current trends, professional experiences and challenges of modern information technology and systems research, together with their technological development and applications. The main topics covered are: information and knowledge management; organizational models and information systems; software and systems modeling; software systems, architectures, applications and tools; multimedia systems and applications; computer networks, mobility and pervasive systems; intelligent and decision support systems; big data analytics and applications; human-computer interaction; ethics, computers & security; health informatics; information technologies in education; cybersecurity and cyber-defense; electromagnetics, sensors and antennas for security.

lumira business objects: SAP BusinessObjects BI Platform 4.1 2014-02-21 SAP BusinessObjects BI Platform 4.1 is a leading Business Intelligence and reporting tool that provides you with a real-time understanding of your business with agile visualizations. Starting with an introduction to Dashboards and its benefits, the book slowly moves on to explain the dashboard creation process. After this, you will learn how to add charts, single-value components, maps, selectors, and other third-party plugins to the existing dashboards. Furthermore, it shares many best practices and will also help you to connect your dashboard to real data by establishing a data connection to a data source. You can also explore more about mobile BI and learn how to create dashboards for mobile devices. By the end of the book, you will be able to prepare, plan, and design interactive dashboards based on your business requirements using this cutting-edge BI tool.

lumira business objects: Learning SAP BusinessObjects Dashboards Taha M. Mahmoud, 2015-06-29 SAP BusinessObjects Dashboards is a leading Business Intelligence and reporting tool that provides you with a real-time understanding of your business with agile visualizations. Starting with an introduction to Dashboards and its benefits, the book slowly moves on to explain the dashboard creation process. After this, you will learn how to add charts, single-value components, maps, selectors, and other third-party plugins to the existing dashboards. Furthermore, it shares many best practices and will also help you to connect your dashboard to real data by establishing a data connection to a data source. You can also explore more about mobile BI and learn how to create dashboards for mobile devices. By the end of the book, you will be able to prepare, plan, and design interactive dashboards based on your business requirements using this cutting-edge BI tool.

lumira business objects: The A.I. Marketer Andrew W. Pearson, 2019-04-15 We seem to be living in the age of A.I. Everywhere you look, companies are touting their most recent A.I., machine learning, and deep learning breakthroughs, even when they are far short of anything that could be touted as a “breakthrough.” “A.I.” has eclipsed “Blockchain” and “Crypto” as the buzzword of today. Indeed, one of the best ways to raise VC funding is to stick ‘AI’ or ‘ML’ at the front of your prospectus and “.ai” at the end of your website. Separating fact from fiction is more important than it has ever been. The A.I. Marketer breaks down A.I., machine learning, and deep learning into five unique use cases—sound, time series, text, image, and video—and also reveals how marketing executives can utilize this powerful technology to help them more finely tune their marketing campaigns, better segment their customers, increase lead generation, and foster strong customer loyalty. Today, “Personalization”—the process of utilizing mobile, social, geo-location data, web morphing, context and even affective computing to tailor messages and experiences to an individual interacting with them—is becoming the optimum word in a radically new customer intelligence environment. The A.I. Marketer explains this complex technology in simple to understand terms and then shows how marketers can utilize the psychology of personalization with A.I. to both create more effective marketing campaigns as well as increase customer loyalty. Pearson shows companies how to avoid Adobe’s warning of not using industrial-age technology in the digital era. Pearson also reveals how to create a platform of technology that seamlessly integrates EDW and real-time streaming data with social media content. Analytical models and neural nets can then be built on both commercial and open source technology to better understand the customer, thereby strengthening the brand and, just as importantly, increasing ROI.

lumira business objects: SAP HANA Cookbook Chandrasekhar Mankala, Ganesh Mahadevan V., 2013-12-24 An easy-to-understand guide, covering topics using practical scenarios and live

examples, and answering all possible questions. If you are a solution architect, developer, modeler, sales leader, business transformation managers, directors, COO, or CIO; this book is perfect for you. If you are interested in other technologies and want to jump-start into SAP, this book gives you the chance to learn SAP HANA. Basic knowledge of RDBMS concepts enough is to get you started.

lumira business objects: The Cloud-Based Demand-Driven Supply Chain Vinit Sharma, 2018-11-08 It's time to get your head in the cloud! In today's business environment, more and more people are requesting cloud-based solutions to help solve their business challenges. So how can you not only anticipate your clients' needs but also keep ahead of the curve to ensure their goals stay on track? With the help of this accessible book, you'll get a clear sense of cloud computing and understand how to communicate the benefits, drawbacks, and options to your clients so they can make the best choices for their unique needs. Plus, case studies give you the opportunity to relate real-life examples of how the latest technologies are giving organizations worldwide the opportunity to thrive as supply chain solutions in the cloud. Demonstrates how improvements in forecasting, collaboration, and inventory optimization can lead to cost savings Explores why cloud computing is becoming increasingly important Takes a close look at the types of cloud computing Makes sense of demand-driven forecasting using Amazon's cloud Whether you work in management, business, or IT, this is the dog-eared reference you'll want to keep close by as you continue making sense of the cloud.

lumira business objects: Planning and Reporting in BI-supported Controlling Dietmar Schön, 2023-07-24 Planning and reporting solutions in many companies still suffer from poor data quality, are insufficiently integrated and are often time and cost intensive. This practice-oriented book shows step by step how things can be done differently. It systematically shows how modern planning and reporting systems in BI-supported controlling can be set up with the use of data warehouse and big data technology and usefully supplemented with AI-supported features. For the 4th edition, the book has been comprehensively updated. The extensive controlling cockpit example has been expanded. It now contains suggestions for the areas of corporate management (operational and strategic controlling), sales, production, purchasing and project management. In addition, the latest developments in BI-supported controlling with the support of traditional and explorative BI are highlighted, including data mining, predictive analytics, artificial intelligence, RPA, chatbots, data discovery, data visualization, app technology, self-service BI and cloud computing. Further innovations concern the topics of data quality and data modeling. The final chapter is Mobile BI, which deals with the expansion of powerful mobile analysis and planning solutions with the help of tablets, mobile phones and other mobile devices.

lumira business objects: Practical Guide to SAP HANA and Big Data Analytics Dominique Alfermann, Stefan Hartmann, 2018-12-20 In this book written for SAP BI, big data, and IT architects, the authors expertly provide clear recommendations for building modern analytics architectures running on SAP HANA technologies. Explore integration with big data frameworks and predictive analytics components. Obtain the tools you need to assess possible architecture scenarios and get guidelines for choosing the best option for your organization. Know your options for on-premise, in the cloud, and hybrid solutions. Readers will be guided through SAP BW/4HANA and SAP HANA native data warehouse scenarios, as well as field-tested integration options with big data platforms. Explore migration options and architecture best practices. Consider organizational and procedural changes resulting from the move to a new, up-to-date analytics architecture that supports your data-driven or data-informed organization. By using practical examples, tips, and screenshots, this book explores: - SAP HANA and SAP BW/4HANA architecture concepts - Predictive Analytics and Big Data component integration - Recommendations for a sustainable, future-proof analytics solutions - Organizational impact and change management

lumira business objects: Data Analytics: Principles, Tools, and Practices Gaurav Aroraa, Chitra Lele, Dr. Munish Jindal, 2022-01-24 A Complete Data Analytics Guide for Learners and Professionals. KEY FEATURES ● Learn Big Data, Hadoop Architecture, HBase, Hive and NoSQL Database. ● Dive into Machine Learning, its tools, and applications. ● Coverage of applications of

Big Data, Data Analysis, and Business Intelligence. **DESCRIPTION** These days critical problem solving related to data and data sciences is in demand. Professionals who can solve real data science problems using data science tools are in demand. The book "Data Analytics: Principles, Tools, and Practices" can be considered a handbook or a guide for professionals who want to start their journey in the field of data science. The journey starts with the introduction of DBMS, RDBMS, NoSQL, and DocumentDB. The book introduces the essentials of data science and the modern ecosystem, including the important steps such as data ingestion, data munging, and visualization. The book covers the different types of analysis, different Hadoop ecosystem tools like Apache Spark, Apache Hive, R, MapReduce, and NoSQL Database. It also includes the different machine learning techniques that are useful for data analytics and how to visualize data with different graphs and charts. The book discusses useful tools and approaches for data analytics, supported by concrete code examples. After reading this book, you will be motivated to explore real data analytics and make use of the acquired knowledge on databases, BI/DW, data visualization, Big Data tools, and statistical science. **WHAT YOU WILL LEARN** ● Familiarize yourself with Apache Spark, Apache Hive, R, MapReduce, and NoSQL Database. ● Learn to manage data warehousing with real time transaction processing. ● Explore various machine learning techniques that apply to data analytics. ● Learn how to visualize data using a variety of graphs and charts using real-world examples from the industry. ● Acquaint yourself with Big Data tools and statistical techniques for machine learning. **WHO THIS BOOK IS FOR** IT graduates, data engineers and entry-level professionals who have a basic understanding of the tools and techniques but want to learn more about how they fit into a broader context are encouraged to read this book. **TABLE OF CONTENTS** 1. Database Management System 2. Online Transaction Processing and Data Warehouse 3. Business Intelligence and its deeper dynamics 4. Introduction to Data Visualization 5. Advanced Data Visualization 6. Introduction to Big Data and Hadoop 7. Application of Big Data Real Use Cases 8. Application of Big Data 9. Introduction to Machine Learning 10. Advanced Concepts to Machine Learning 11. Application of Machine Learning

lumira business objects: *Qlik Sense for Business Intelligence* Satyam Garg, 2024-09-12 **DESCRIPTION** Qlik Sense is a powerful business intelligence tool that helps organizations make data-driven decisions. It is widely used by businesses of all sizes to visualize and analyze data to gain insights into their operations. This book is a detailed guide to Qlik Sense, a top business intelligence tool. It covers BI basics, data modeling, visualization, and advanced analysis techniques. Learn to create dashboards, explore data associations, and share insights through stories and annotations. The book also offers guidance on managing and securing your Qlik Sense environment, with tips on troubleshooting and backups, ensuring effective use for data-driven decisions. By the end of the book, readers will have a deep understanding of Qlik Sense and the ability to use it to solve complex business problems. Readers will learn how to use data visualization and analytics to make informed business decisions, as well as how to build effective data models and create data stories that communicate insights effectively. **KEY FEATURES** ● Learn to use Qlik Sense for business intelligence and data visualization. ● Understand the importance of data-driven decision-making in today's competitive business landscape. ● Follow a hands-on, practical approach with step-by-step instructions and real-world examples. **WHAT YOU WILL LEARN** ● Master Qlik Sense architecture, environment setup, and application creation. ● Create advanced data visualizations with interactive charts and dashboards. ● Implement efficient data modeling, optimization, and performance tuning. ● Build NPrinting reports and mashups for enhanced data reporting. ● Manage user access, security, and governance for Qlik Sense environments. **WHO THIS BOOK IS FOR** This book is designed for business professionals, data analysts, IT professionals, and students who want to learn how to use Qlik Sense for data analysis and visualization. The book is suitable for readers with any level of experience using Qlik Sense, from beginners to advanced users. **TABLE OF CONTENTS** 1. Understanding Business Intelligence 2. Introduction to Qlik Sense 3. Creating Data Visualizations 4. Data Modeling and Integration 5. Advanced Data Modeling Techniques 6. Advanced Visualization Techniques 7. Creating Interactive Dashboards 8. Building NPrinting Reports and Mashups with Qlik

Sense 9. Data Analysis with Qlik Sense 10. Implementing Collaboration and Sharing in Qlik Sense 11. Administering Qlik Sense Environment 12. Managing Qlik Sense User Access, Security, and Governance 13. Monitoring and Troubleshooting a Qlik Sense Environment 14. Backup and Recovery of a Qlik Sense Environment 15. Common Interview Questions and Answers

lumira business objects: Multidimensional Views on Enterprise Information Systems

Felix Piazzolo, Michael Felderer, 2016-01-23 This volume presents the revised and peer reviewed contributions of the 'EPR Future 2014' conference held in Dornbirn/Austria on November 17-18th, 2014. The book assembles latest research and recent practice on enterprise information systems in general and specifically on core topics like business process management (BPM), business intelligence (BI) and enterprise resource planning (ERP) systems. To master the challenges of enterprise information systems comprehensively, this book contains chapters with a business as well as an IT focus to consider enterprise information systems from various viewpoints.

lumira business objects: Building Capacity in Institutional Research and Decision

Support in Higher Education Karen L. Webber, 2018-01-31 This book examines the relevant roles, skills and knowledge needed to build the institutional research capacity across the higher education sector globally. The information contained herein will inform IR practitioners, senior level institution officials, and higher education scholars. With a focus on building the capacity of the IR profession, this book's primary audiences include senior leaders who wish to introduce or strengthen their understanding for effective decision support and staff members who are currently in decision support units and those who wish to serve in this capacity. However, this book also offers detail on the decision support function to higher education scholars who seek to better address how data can inform policy and planning in higher education. Through a broad discussion about the roles and skills of the practitioners, this book will also enumerate the ways in which decision support practitioners can be valued contributors in shaping the future decisions and direction of specific institutions and higher education broadly.

lumira business objects: Implementing SAP S/4HANA Sanket Kulkarni, 2019-09-13

Gain a better understanding of implementing SAP S/4HANA-based digital transformations. This book helps you understand the various components involved in the planning and execution of successful SAP S/4HANA projects. Learn how to ensure success by building a solid business case for SAP S/4HANA up front and track business value generated throughout the implementation. Implementing SAP S/4HANA provides a framework for planning and executing SAP S/4HANA projects by articulating the implementation approach used by different components in SAP S/4HANA implementations. Whether you are mid-way through the SAP S/4HANA program or about to embark on it, this book will help you throughout the journey. If you are looking for answers on why SAP S/4HANA requires special considerations as compared to a traditional SAP implementation, this book is for you. What You Will Learn Understand various components of your SAP S/4HANA project Forecast and track your success throughout the SAP S/4HANA implementation Build a solid business case for your SAP S/4HANA program Discover how the implementation approach varies across these components Who This Book Is For SAP S/4HANA clients (line managers and consultants).

lumira business objects: Leveraging SAP GRC in the Fight Against Corruption and Fraud

Maxim Chuprunov, 2018-01-23

lumira business objects: Integrating SAP BusinessObjects BI with SAP NetWeaver Ingo

Hilgefort, 2013-11-01 Learn how to run SAP BusinessObjects BI tools on top of SAP data Understand your data connectivity options for integration Get up to speed on SAP BusinessObjects Design Studio and SAP Lumira 3rd edition updated and expanded You know what SAP BusinessObjects BI can do for a business now make it happen. With this detailed, click-by-click guide, learn how to connect SAP to the SAP BusinessObjects BI 4.1 platform. From data connectivity to server-side and client-side configuration to creating reports, you ll find the information you need to get your systems talking. Installation and Configuration Begin at the beginning get SAP BusinessObjects BI set up quickly and in the right way. With detailed instructions and screenshots, you ll get started on the right foot. Data Connectivity Universes, BI Consumer Services, and more: Find out what you need to know about

data connectivity for SAP BusinessObjects BI and SAP NetWeaver. Report Building Consider this your crash course in report development. From SAP Crystal Reports to SAP Lumira, get hands-on experience with every tool. Troubleshooting and Tips Learn from an expert who knows all the tricks of the trade. Find what you need to know to get everything working together. Updated and Expanded 3rd Edition Discover new features of SAP BusinessObjects BI 4.1, as well as new SAP business intelligence solutions like SAP BusinessObjects Design Studio and SAP Lumira.

lumira business objects: Learn HANA in 24 Hours Alex Nordeen, 2020-04-02 SAP Hana is popular due to its large main memories and massive parallel job processing capabilities. It makes SAP Hana real fast. The motive of this book is to develop a good understanding of how SAP Hana is used. The book doesn't need any experience with SAP HANA or software development. It's a self-learning guide that even beginners can use. Everything about SAP HANA is explained like architecture, modeling, reporting, SQL script, and so on. This book is full of information, hands-on and real life project experience learning. In this edition, you will identify various components of SAP HANA and its working process. Though the book size is small, it tried to justify almost all important topics of SAP HANA with examples and images. These includes SLT, the connection between SAP system and HANA, Data services, etc. You will also learn how to use SQL script in HANA. By the end of this book, you will be able to integrate SAP HANA pretty much with any platform. Over a time you can use this edition as a handbook and harness your SAP Hana skills. So all and above this edition will save a lot of your expenses spend behind other courses and learning resources.

Table Content

Chapter 1: Introduction 1. Introduction SAP HANA 2. Why to choose SAP HANA? 3. SAP HANA In-Memory Strategy 4. SAP HANA Advantages 5. SAP HANA Compare to BWA (Business Warehouse Accelerator) Chapter 2: Hana Architecture 1. SAP HANA Architecture 2. SAP HANA Landscape 3. SAP HANA Sizing Chapter 3: SAP HANA Studio 1. Pre-Requisite for SAP HANA Studio 2. Supported Platform 3. Download & Install SAP HANA Studio 4. Add System in SAP HANA Studio 5. Work With SAP HANA Studio Chapter 4: SQL Script, Data Type, Trigger, Sequence, Operator, Function, Expression, Identifiers 1. What is SAP HANA SQL 2. SAP HANA Identifiers 3. SAP HANA Data Type 4. SAP HANA Operator 5. SAP HANA SQL FUNCTIONS 6. SAP HANA SQL EXPRESSIONS 7. SAP HANA SQL Stored Procedure 8. SAP HANA Create Sequence 9. SAP HANA Create Trigger Chapter 5: Data Provisioning 1. Overview of Replication Technology 2. SLT (SAP Landscape Transformation Replication Server) 3. SAP DS (SAP DATA Services) 4. SAP HANA Direct Extractor Connection (DXC) 5. Flat file Upload to SAP HANA Chapter 6: Modeling 1. SAP HANA Modelling Overview 2. Join Method in SAP HANA 3. SAP HANA Best Practices for Creating Information Models 4. SAP HANA Attribute View 5. SAP HANA Analytic View 6. SAP HANA Calculation View 7. SAP HANA Analytic Privileges 8. SAP HANA Information Composer 9. SAP HANA Import and Export 10. SAP HANA Performance Optimization Technique Chapter 7: Security 1. SAP HANA Security Overview 2. SAP HANA Authentication 3. SAP HANA Authorization 4. SAP HANA User and Role Administration 5. SAP HANA License Management 6. SAP HANA Auditing Chapter 8: Reporting 1. Reporting In SAP BI (Business Intelligence) Overview 2. Reporting In Webi of SAP Business Objects (BO) on HANA 3. Reporting In Crystal Report 4. Reporting In SAP Lumira 5. Reporting In Microsoft Excel
