lego movie lord business minifigure: Politics for the Love of Fandom Ashley Hinck, 2019-03-13 Politics for the Love of Fandom examines what Ashley Hinck calls "fan-based

citizenship”: civic action that blends with and arises from participation in fandom and commitment to a fan-object. Examining cases like Harry Potter fans fighting for fair trade, YouTube fans donating money to charity, and football fans volunteering to mentor local youth, Hinck argues that fan-based citizenship has created new civic practices wherein popular culture may play as large a role in generating social action as traditional political institutions such as the Democratic Party or the Catholic Church. In an increasingly digital world, individuals can easily move among many institutions and groups. They can choose from more people and organizations than ever to inspire their civic actions—even the fandom for children's book series Harry Potter can become a foundation for involvement in political life and social activism. Hinck explores this new kind of engagement and its implications for politics and citizenships, through case studies that encompass fandoms for sports, YouTube channels, movies, and even toys. She considers the ways in which fan-based social engagement arises organically, from fan communities seeking to change their world as a group, as well as the methods creators use to leverage their fans to take social action. The modern shift to networked, fluid communities, Hinck argues, opens up opportunities for public participation that occurs outside of political parties, houses of worship, and organizations for social action. Fan-based citizenship performances help us understand the future possibilities of public engagement, as fans and creators alike tie the ethical frameworks of fan-objects to desired social goal, such as volunteering for political candidates, mentoring at-risk youth, and promoting environmentally friendly policy. *Politics for the Love of Fandom* examines the communication at the center of these civic actions, exploring how fans, nonprofits, and media companies manage to connect internet-based fandom with public issues.

lego movie lord business minifigure: We Need to Talk about Family Roberta Garrett, Tracey Jensen, Angie Voela, 2016-08-17 We are the first generation in recent history to not know if our children will have a better life than us. Over the past thirty years, the dream of upward mobility and stable and securely paid employment has dissipated. This collection draws together insights from the disciplines of cultural studies, literary theory, psychoanalysis, psychosocial studies, social policy and sociology, in order to explore the complex and contested status of “the family” under neoliberalism. At one end of the spectrum, the intensification of work and the normalisation of long-hours working culture have undermined the time and energy available for private family life. At the other end, the fantasy of the nuclear family as a potential “haven in a heartless world” is rapidly unravelling, supplanted with a hypercompetitive, neo-traditionalist, mobile, neoliberal family seeking to capitalise on the uneven spread of resources in order to maximise the futures of its own children. As neoliberalism has always been split between socio-economic realities and the expectations of where we “should” be, we are always living with the anxiety of being left behind and the hope that the best is yet to come. The chapters in this collection signal the troubles of the neoliberal family: in particular, the gulf between the practical conditions of family life and the formation of new fantasies. The volume addresses the neoliberal family in a range of contexts: from the domestic, reproductive and bio-political regulation of family life, the representations of the neoliberal family on television and across social media, to the negotiation of family dynamics in maternal memoirs. The work provides a much-needed corrective to the critical emphasis on the macrostructures of the neoliberal world.

lego movie lord business minifigure: *Ordinary* Michael Horton, 2014-10-07 Radical. Crazy. Transformative and restless. Every word we read these days seems to suggest there's a "next-best-thing," if only we would change our comfortable, compromising lives. In fact, the greatest fear most Christians have is boredom—the sense that they are missing out on the radical life Jesus promised. One thing is certain. No one wants to be "ordinary." Yet pastor and author Michael Horton believes that our attempts to measure our spiritual growth by our experiences, constantly seeking after the next big breakthrough, have left many Christians disillusioned and disappointed. There's nothing wrong with an energetic faith; the danger is that we can burn ourselves out on restless anxieties and unrealistic expectations. What's needed is not another program or a fresh approach to spiritual growth; it's a renewed appreciation for the commonplace. Far from a call to low expectations and passivity, Horton invites readers to recover their sense of joy in the ordinary. He provides a guide to a sustainable discipleship that happens over the long haul—not a quick fix that leaves readers empty with unfulfilled promises. Convicting and ultimately empowering, *Ordinary* is not a call to do less; it's an invitation to experience the elusive joy of the ordinary Christian life.

lego movie lord business minifigure: *The Crafty Animator* Caroline Ruddell, Paul Ward, 2019-04-03 This collection is a study of the value of craft as it can be understood within the study and practice of animation. The book reconsiders the position of craft, which is often understood as inferior to 'art', with a particular focus on questions of labour in animation production and gendered practices. The notion of craft has been widely investigated in a number of areas including art, design and textiles, but despite the fact that a wide range of animators use craft-based techniques, the value of craft has not been interrogated in this context until now. Seeking to address such a gap in

the literature, this collection considers the concept of craft through a range of varying case studies. Chapters include studies on experimental animation, computer animation, trauma and memory, children's animation and silhouette animation among others. The Crafty Animator also goes some way to exploring the relationship craft has with the digital in the context of animation production. Through these varied discussions, this book problematizes simplistic notions about the value of certain methods and techniques, working to create a dialogue between craft and animation.

lego movie lord business minifigure: *Deconstructing LEGO* Jonathan Rey Lee, 2020-09-08 This book investigates a paradox of creative yet scripted play—how LEGO invites players to build 'freely' with and within its highly structured, ideologically-laden toy system. First, this book considers theories and methods for deconstructing LEGO as a medium of bricolage, the creative reassembly of already-significant elements. Then, it pieces together readings of numerous LEGO sets, advertisements, videogames, films, and other media that show how LEGO constructs five ideologies of play: construction play, dramatic play, digital play, transmedia play, and attachment play. From suburban traffic patterns to architectural croissants, from feminized mini-doll bodies to toys-to-life stories, from virtual construction to playful fan creations, this book explores how the LEGO medium conveys ideological messages—not by transmitting clear statements but by providing implicit instructions for how to reassemble meanings it had all along.

lego movie lord business minifigure: Transgenerational Media Industries Derek Johnson, 2019-11-12 Within corporate media industries, adults produce children's entertainment. Yet children, presumed to exist outside the professional adult world, make their own contributions to it—creating and posting unboxing videos, for example, that provide content for toy marketers. Many adults, meanwhile, avidly consume entertainment products nominally meant for children. Media industries reincorporate this market-disrupting participation into their strategies, even turning to adult consumers to pass fandom to the next generation. Derek Johnson presents an innovative perspective that looks beyond the simple category of "kids' media" to consider how entertainment industry strategies invite producers and consumers alike to cross boundaries between adulthood and childhood, professional and amateur, new media and old. Revealing the social norms, reproductive ideals, and labor hierarchies on which such transformations depend, he identifies the lines of

authority and power around which legacy media institutions like television, comics, and toys imagine their futures in a digital age. Johnson proposes that it is not strategies of media production, but of media reproduction, that are most essential in this context. To understand these critical intersections, he investigates transgenerational industry practice in television co-viewing, recruitment of adult comic readers as youth outreach ambassadors, media professionals' identification with childhood, the branded management of adult fans of LEGO, and the labor of child YouTube video creators. These dynamic relationships may appear to disrupt generational and industry boundaries alike. However, by considering who media industries empower when generating the future in these reproductive terms and who they leave out, Johnson ultimately demonstrates how their strategies reinforce existing power structures. This book makes vital contributions to media studies in its fresh approach to the intersections of adulthood and childhood, its attention to the relationship between legacy and digital media industries, and its advancement of dialogue between media production and consumption researchers. It will interest scholars in media industry studies and across media studies more broadly, with particular appeal to those concerned about the current and future reach of media industries into our lives.

lego movie lord business minifigure: LEGO Studies Mark Wolf, 2014-11-13 Since the Automatic Binding Bricks that LEGO produced in 1949, and the LEGO System of Play that began with the release of Town Plan No. 1 (1955), LEGO bricks have gone on to become a global phenomenon, and the favorite building toy of children, as well as many an AFOL (Adult Fan of LEGO). LEGO has also become a medium into which a wide number of media franchises, including Star Wars, Harry Potter, Pirates of the Caribbean, Batman, Superman, Lord of the Rings, and others, have adapted their characters, vehicles, props, and settings. The LEGO Group itself has become a multimedia empire, including LEGO books, movies, television shows, video games, board games, comic books, theme parks, magazines, and even MMORPGs. LEGO Studies: Examining the Building Blocks of a Transmedial Phenomenon is the first collection to examine LEGO as both a medium into which other franchises can be adapted and a transmedial franchise of its own. Although each essay looks at a particular aspect of the LEGO phenomenon, topics such as adaptation, representation, paratexts, franchises, and interactivity intersect throughout these essays, proposing that the study of LEGO as a medium and a media empire is a rich vein barely touched upon in Media Studies.
