korea air business class: The Korean American Dream Kyeyoung Park, 2018-09-05 Korean immigrants to the United States establish their own small businesses at a rate exceeding that of immigrants from any other nation, with more than one third of all Korean immigrant adults involved in small businesses. Kyeyoung Park examines this phenomenon in Queens, New York, tracing its historical bases and exploring the transformation of Korean cultural identity prompted by participation in an enterprise. Park documents the ways in which Korean immigrants use entrepreneurship to improve the quality of their lives, focusing on their concerns and anxieties, as well as their joys. The concept of anjong is crucial to the lives of first-generation Korean Americans in Queens, Park explains. The word may be translated as establishment, stability, or security, and it identifies a particular concept of success through which Koreans make sense of the American ideology of opportunity. What they seek is not great wealth or social position but rather the creation of their own small businesses as a way of realizing the American dream. The pursuit of anjong is important enough to justify changes in gender and kinship relations, resulting in the rise of a Korean American women-centered and sister-initiated kinship structure. Commitment to the concept has also inspired a different understanding of class, ethnicity, and race, and stimulated new religious ideas and practices.

korea air business class: *Korea's Quest for Economic Democratization* Youngmi Kim, 2017-09-06 This book studies the sources of inequality in contemporary South Korea and the social and political contention this engenders. Korean society is becoming more polarized. Demands for 'economic democratization' and a fairer redistribution of wealth occupy centre-stage of political campaigns, debates and discourse. The contributions offer perspectives on this wide-ranging socio-political change by examining the transformation of organized labour, civil society, the emergence of new cleavages in society, and the growing ethnic diversity of Korea's population. Bringing together a team of scholars on Korea's transition and democratization, the story the books tells is one of a society acutely divided by the neo-liberal policies that accompanied and followed the Asian financial crisis. Taken together, the contributions argue that tackling inequalities are challenges that Korean policy-makers can no longer postpone. The solution, however, cannot be imposed, once again, from the top down, but needs to arise from a broader conversation including all segments of Korean society. The book is intended for a readership interested in South Korean politics specifically, and global experiences in transition more generally.

korea air business class: Chasing Tales Ken Hopley, 2022-10-06 Chasing Tales is the first-hand account of a working man's travels round some of the world's hottest spots - literally and metaphorically. Written by Liverpool-born engineer, Ken Hopley, it spans his first sea-trip to Mexico

in 1967 as a young Merchant Navy officer to being bombed in the Iran-Iraq War, from being awake during an appendicitis operation in a Syria hospital to an enforced retirement after suffering two strokes aged 65, giving a funny and uncompromising view of a changed man and a changing world. This book contains his experience of 50 years working all over the world as an engineer, from major oil and gas companies (including the shady ones) to oil rigs, FPSO's refineries, gas plants and universities in some extremely interesting places, with highly interesting people. And yes, by interesting, he almost always means odd. And sometimes just downright dangerous.

korea air business class: Start Jon Acuff, 2013-04-22 Wall Street Journal best-selling author Jon Acuff reveals the steps to getting unstuck and back onto the path of being awesome. Over the last 100 years, the road to success for most everyone has been divided into five stages that mirror the decades of working life: Your 20s are a period of Learning. This is the decade of trying a thousand things, exploring a multitude of interests, and discovering what really motivates you. Your 30s are a period of Editing. This is the decade of sorting out interests, where you discover what you really care about and who you really are. Your 40s are a period of Mastering. This is the decade of narrowing focus, honing skill sets, and becoming an expert in your field. Your 50s are a period of Harvesting. This is the decade of reaping the benefits of good decisions and enjoying the highest income-earning period in a career. Your 60s are a period of Guiding. This is the decade of mentoring, training, and encouraging others on their own road to success. Every successful person has followed these steps regardless of their occupation. But three things have changed the path to success and erased the decades associated with them: Finish lines are dead - Boomers are realizing that a lot of the things they were promised aren't going to materialize, and they have started second and third careers. Anyone can play - Technology has given access to an unprecedented number of people who are building online empires and changing their lives in ways that would have been impossible years ago. Hope is boss - The days of "success first, significance later," have ended. A new generation doesn't want to change the world eventually; they want to change it now through the wells they kickstart in Africa and the TOMS they wear on their feet. The value system has been flipped upside down. The result is that you've got an entire generation pushing down to start over, another generation pushing up to start for the first time, and in the middle of this collision, the tools to actually change the world. Experience years now trump chronological age. And while none of the five stages can be skipped, they can be shortened and accelerated. There are only two paths in life: average and awesome. The average path is easy because all you have to do is nothing. The awesome path is more challenging, because things like fear only bother you when you do work that matters. The good news is Start gives readers practical, honest, actionable insights to be more awesome, more often. It's time to punch fear in the face, escape average, and do work that matters. It's time to Start.
