lawyer business law: In-House Lawyers' Ethics Richard Moorhead, Steven Vaughan, Cristina Godinho, 2018-11-29 This book provides an empirically grounded, in-depth investigation of the ethical dimensions to in-house practice and how legal risk is defined and managed by in-house lawyers and others. The growing significance and status of the role of General Counsel has been accompanied by growth in legal risk as a phenomenon of importance. In-house lawyers are regularly exhorted to be more commercial, proactive and strategic, to be business leaders and not (mere) lawyers, but they are increasingly exposed for their roles in organisational scandals. This book poses the question: how far does going beyond being a lawyer conflict with or entail being more ethical? It explores the role of in-housers by calling on three key pieces of empirical research: two tranches of interviews with senior in-house lawyers and senior compliance staff; and an unparalleled large survey of in-house lawyers. On the basis of this evidence, the authors explore how ideas about in-house roles shape professional logics; how far professional notions such as independence play a role in those logics; and the ways in which ethical infrastructure are managed or are absent from in-house practice. It concludes with a discussion of whether and how in-house lawyers and their regulators need to take professionalism and professional ethicality more seriously.

lawyer business law: The Japanese Legal Profession in Transition Masayuki Murayama, 2024-08-31 This book focuses on the stratification of the Japanese legal profession and its impact on legal practice, drawing upon findings from two national surveys, one on Japanese lawyers (2018-19) and the other on Japanese people (2021), as well as qualitative data from interviews. Our research data clearly shows the increase of the lawyer population changed their whole world. Pressure from the lawyer population increase has not only made the stratification more visible but also diversified lawyers' career and their strategies of cultivating their legal service market. Legal practice is moving from professionalism to consumerism. Relying on retrospective data of individual lawyers' careers, this research shows how individual lawyers navigated their work and career and what have been major factors that affected their career paths. The research also shows a huge variety of lawyer's office management policies related with their market strategies. It is the first time that a national survey of lawyers was designed to obtain retrospective data of individual lawyers in Japan. This book gives a latest landscape of the Japanese legal profession in flux and the public view of changing legal practice.
