miami dade county local business tax: Miami Jan Nijman, 2011-11-29 As a subtropical city and the southernmost metropolitan area in the United States, Miami has always lured both visitors and migrants from throughout the Americas. During its first half-century they came primarily from the American North, then from the Latin South, and eventually from across the hemisphere and beyond. But if Miami's seductive appeal is one half of the story, the other half is that few people have ever ended up staying there. Today, by many measures, Miami is one of the most transient of all major metropolitan areas in America. *Miami: Mistress of the Americas* tells the story of an urban transformation, perfectly timed to coincide with the surging forces of globalization. Author Jan Nijman connects different historical episodes and geographical regions to illustrate how transience has shaped the city to the present day, from the migrant labor camps in south Miami-Dade to the affluent gated communities along Biscayne Bay. Transience offers opportunities, connecting business flows and creating an ethnically hybrid workforce, and also poses challenges: high mobility and population turnover impede identification of Miami as home. According to Nijman, Miami is mistress of the Americas because of its cultural influence and economic dominance at the nexus of north and south. Nijman likens the city itself to a hotel; people check in, go about their business or pleasure, then check out. Locals, born and raised in the area, make up only one-fifth of the population. Exiles, those who have come to Miami as a temporary haven due to political or economic

necessity, are typically yearning to return to their homeland. Mobiles, the affluent and well educated, who reside in Miami's most prized neighborhoods, are constantly on the move. As a social laboratory in urban change and human relationships in a high-speed, high-mobility era, Miami raises important questions about identity, citizenship, place-attachment, transnationalism, and cosmopolitanism. As such, it offers an intriguing window onto our global urban future.

miami dade county local business tax: Jacksonville James B. Crooks, 2019-07-09 In the 1950s and '60s Jacksonville faced daunting problems. Critics described city government as boss-ridden, expensive, and corrupt. African Americans challenged racial segregation, and public high schools were discredited. The St. Johns River and its tributaries were heavily polluted. Downtown development had succumbed to suburban sprawl. Consolidation, endorsed by an almost two-to-one majority in 1967, became the catalyst for change. The city's decision to consolidate with surrounding Duval County began the transformation of this conservative, Deep South, backwater city into a prosperous, mainstream metropolis. James B. Crooks introduces readers to preconsolidation Jacksonville and then focuses on three major issues that confronted the expanded city: racial relations, environmental pollution, and the revitalization of downtown. He shows the successes and setbacks of four mayors—Hans G. Tanzler, Jake Godbold, Tommy Hazouri, and Ed Austin—in responding to these issues. He also compares Jacksonville's experience with that of another Florida metropolis, Tampa, which in 1967 decided against consolidation with surrounding Hillsborough County. Consolidation has not been a panacea for all the city's ills, Crooks concludes. Yet the city emerges in the 21st century with increased support for art and education, new economic initiatives, substantial achievements in downtown renewal, and laudable efforts to improve race relations and address environmental problems. Readers familiar with Jacksonville over the last 40 years will recognize events like the St. Johns River cleanup, the building of the Jacksonville Landing, the ending of odor pollution, and the arrival of the Jaguars NFL franchise. During the administration of Mayor Hazouri from 1987 to 1991, Crooks was Jacksonville historian-in-residence at City Hall. Combining observations from this period with extensive interviews and documents (including a cache of files from the mezzanine of the old City Hall parking garage that contained 44 cabinets of letters, memos, and reports), he has written an urban history that will fascinate scholars of politics and governmental reform as well as residents of the First Coast city. miami dade county local business tax: **Human Security, Changing States and Global Responses** Sangmin Bae, Makoto Maruyama, 2014-12-05 This book critically assesses the human security challenges faced by states, focusing on how and to what extent the state is influenced by global structures and operations. Having grown rapidly since the 1990s, the field of human security has spawned a wide variety of academic research. This research has helped to reconceptualize the

notion of security, both broadening and deepening it, and it has created a space where unconventional and multidimensional forms of security inform international policy practices. However, while various issues and cases of human security have received growing academic attention and policy interest, many of the existing books on human security focus primarily on non-state actors. This leaves a key question unanswered: why do sovereign states take on leadership roles in promoting human security? To answer the question of why and how national governments influence international human security policy, this volume examines the domestic political factors and structures that mediate the range of policy choices. Important domestic variables include the 'cultural match' (e.g., 'Does the country often favor multilateralism and promote a rule-bound international society?'), the nature of the political interests and realities that are present (e.g., 'Does the country see the promotion of human security as a strategic choice?'), and the occurrence of important historical events such as wars, revolutions, or natural disasters (e.g., 'Does the country, during the crisis, help to foster a new way of managing enduring security threats?'). Using this line of analysis, the book illuminates the role of the state in handling critical human security issues and its rationale for doing so. This book will be of much interest to students of human security, peace studies, global governance, development studies and IR in general.

miami dade county local business tax: *Collaboration* John M. Kamensky, Thomas J. Burlin, 2004-03-19 As government faces more complex problems, and citizens expect more, the way government delivers services and results is changing rapidly. The traditional model of government agencies administering hundreds of programs by themselves is giving way to one-stop services and cross-agency results. This translation implies collaboration-within agencies; among agencies; among levels of governments; and among the public, private, and nonprofit sectors. The first part of this book describes what networks and partnerships are. The second part presents case examples of how collaborative approaches have actually worked in the public sector, when they should be used, and what it takes to manage and coordinate them.

miami dade county local business tax: Poor and Homeless in the Sunshine State James Wright, 2017-07-05 A place like Orlando, Florida is not transformed from swampland to sprawling metropolis through Peter Pan-like flights of fancy, but through theme park expansions requiring developmental schemes that are tough minded and often worsen relationships between the wealthy and the poor. The homeless arrive with their own hopes and illusions, which are soon shattered. The rest of the local population makes its peace with the system. Meanwhile the homeless are reduced to advocacy models that neither middle- nor working-class folks much worry about. They are modern members of Ellison's invisible men but they comprise a racial and social mixture unlike any other in the American landscape. This book is primarily about the dark side of this portrait the poor, near-poor, homeless, and dispossessed who live in the midst of this verdant landscape. The phrase down and out, has been used to describe people who are destitute or penniless since the late nineteenth century. Here the term is used in a more expansive sense, as synonymous with anyone who lives near, at, or over the edge of financial catastrophe.
