nightly business report 2002: Bull! Greg Eckler, Laura MacDonald, 2013-07-16 Through the 1990s, stocks went up for so long that millions started to believe the pundits who predicted they would climb forever. The market was heralded as a magic get-rich-quick scheme - and its stars were the breathless financial reporters, analysts, politicians, and CEOs who urged Americans to buy, buy, buy and hold, hold, hold. But trees don't grow to the sky and as the market plummets by frequent and lasting double-digit drops, these stars no longer seem as bright. In retrospect, some seem downright stupid. Authors Greg Eckler and L. M. Mac Donald use their wry perspective to profile them all, reminding us that there was a whole team of experts encouraging us to rip up our savings while the rich got super rich. With quotes from Alan Greenspan, Al Gore, Bernie Ebbers, Larry King, and more, Bull! provides a humorously outrageous look at the bubble that many swore could never burst.

nightly business report 2002: *The Crisis of School Violence* Marianna King, 2020-12-01 The Crisis of School Violence is the only interdisciplinary book about school violence. It presents a broad and in-depth approach to the key questions about why bullying continues at an unprecedentedly high rate and why rampage school shootings continue to shock the nation. Based on extensive research, The Crisis of School Violence investigates human nature and its relation to aggressive behavior, with a special focus on the culture of violence that predicates school violence (including rampage shootings) and perpetuates industries that profit from violence. Marianna King presents the considerable psychological and neuroscientific research that investigates the effects of violent entertainment media on the brain and, subsequently, on behavior, which clearly reveals a causal connection between exposure to violent electronic entertainment media—especially violent video games—and increased aggressive and violent behavior. The book also reveals a more specific connection between exposure to violent video games and rampage school shootings. Ultimately this volume is a call to action that includes recommendations for parents, teachers, decision makers, and citizens alike.

nightly business report 2002: Financial Market Bubbles and Crashes Harold L. Vogel, 2021-12-17 Economists broadly define financial asset price bubbles as episodes in which prices rise with notable rapidity and depart from historically established asset valuation multiples and relationships. Financial economists have for decades attempted to study and interpret bubbles through the prisms of rational expectations, efficient markets, equilibrium, arbitrage, and capital asset pricing models, but they have not made much if any progress toward a consistent and reliable theory that explains how and why bubbles (and crashes) evolve and are defined, measured, and compared. This book develops a new and different approach that is based on the central notion that bubbles and crashes reflect urgent short-side rationing, which means that, as such extreme conditions unfold, considerations of quantities owned or not owned begin to displace considerations of price.
