ngwa business pro: African Cultural Values Raphael Chijoke Njoku, 2013-10-23 Although numerous studies have been made of the Western educated political elite of colonial Nigeria in particular, and of Africa in general, very few have approached the study from a perspective that analyzes the impacts of indigenous institutions on the lives, values, and ideas of these individuals. This book is about the diachronic impact of indigenous and Western agencies in the upbringing, socialization, and careers of the colonial Igbo political elite of southeastern Nigeria. The thesis argues that the new elite manifests the continuity of traditions and culture and therefore their leadership values and the impact they brought on African society cannot be fully understood without looking closely at their lived experiences in those indigenous institutions where African life coheres. The key has been to explore this question at the level of biography, set in the context of a carefully reconstructed social history of the particular local communities surrounding the elite figures. It starts from an understanding of their family and village life, and moves forward striving to balance the familiar account of these individuals in public life, with an account of the ongoing influences from family, kinship, age grades, marriage and gender roles, secret societies, the church, local leaders and others. The result is not only a model of a new approach to African elite history, but also an argument about how to understand these emergent leaders and their peers as individuals who shared with their fellow Africans a dynamic and complex set of values that evolved over the six decades of colonialism.

ngwa business pro: *Groundwater Economics, Two-Volume Set* Charles A. Job, 2022-05-29 Groundwater is a vitally important resource and as its use increases, the available supply is depleted, creating a ripple effect of impacts on both the environment and the economy that need to be disseminated to a larger audience of students and practitioners. This second edition of *Groundwater Economics* accomplishes just that. This two-volume set is a comprehensive work focused on the economic values of groundwater resources and use, and it reinforces the need for a strong economic rationale in decision-making relating to that use. This new edition includes a new chapter on sustainability as well as updating all chapters with a focus on sustainability. It thoroughly explains the economic value of groundwater for sustainable use and needs, with practical examples, and includes thirteen new and updated case studies on the economics of groundwater data for decision-making. It also addresses both local and regional groundwater economic choices through a series of applications at an international level. This set, written by a sustainability professional with decades of experience in managing groundwater use and protection, is written for other professionals as well as students, who need to understand and evaluate water resources and manage their use from a variety of sustainable approaches.

ngwa business pro: *Turkey in Africa* Elem Eyryce Tepeciklioğlu, Ali Onur Tepeciklioğlu, 2021-07-12 This book offers a comprehensive and multi-disciplinary analysis of Turkey-Africa relations. Bringing together renowned authors to discuss various dimensions of Turkey's African engagement while casting a critical analysis on the sustainability of Turkey-Africa relations, this book draws upon the rising power literature to examine how Turkish foreign policy has been conceptualized and situated theoretically. Moving from an examination of the multilateral dimension of Turkey's Africa policy with a focus on soft power instruments of public diplomacy, humanitarian/development assistance, religious activities and airline diplomacy, it then illuminates the economic and military dimensions of Turkey's policy including trade relations, business practices, security cooperation and peacekeeping discourse. Overall, it shows how Turkey's African opening can be integrated into its wider interest in gaining global power status and its desire to

become a strong regional power. This book will be of key interest to scholars and students of Turkish foreign policy/politics, African politics, and more broadly to international relations.

ngwa business pro: *Cost-Benefit Analysis of Groundwater Policy and Projects, with Case Studies* Charles Job, 2021-07-27 The competition for groundwater sources as a water supply reinforces the need for a strong economic rationale in decision-making. Evaluating economic decisions in the context of total water management and life-cycle water use is essential to making critical development and remediation choices. This revised volume provides fundamental economic and policy concepts related to groundwater, discusses important factors in life-cycle cost-benefit evaluation and explains triple-bottom-line analysis for different groundwater projects. It includes new and updated case studies on groundwater issues with solutions for a range of situations based on economic data. FEATURES OF THIS VOLUME Provides an understanding for the fundamental economic approaches to groundwater policy and project evaluation Incorporates life-cycle cost-benefit approaches in a triple-bottom-line framework Includes new case studies on the economics of health protection, managed aquifer recharge, local versus regional supply and strategic life-cycle analysis Addresses local and regional groundwater economic choices through a series of practical applications Explores transboundary, international, climate change and macroeconomic factors influencing groundwater project and program decisions *Cost-Benefit Analysis of Groundwater Policy and Projects, with Case Studies, Second Edition*, the second volume of the two-volume set *Groundwater Economics*, is a must-have for any professional or student who needs to understand and evaluate water resources and manage their use from a variety of sustainable approaches.

ngwa business pro: *Militarism, Imperialism, and Racial Accommodation* Stanford M. Lyman, 1992-01-01 1993 Mid-South Sociological Association Book Award Robert E. Park has long been recognized as one of the most influential thinkers in early American sociology, yet virtually all of his works appearing before 1913 were published in popular magazines and were dismissed as nonsociological muckraking. In *Militarism, Imperialism, and Racial Accommodation: An Analysis and Interpretation of the Early Writings of Robert E. Park*, Stanford M. Lyman examines and reprints many of these little-known works, including Park's essays on German military organization, his exposés of the atrocities committed by Belgium's Leopold II in the Congo State, his studies of the black community in Winston-Salem, North Carolina, and of Booker T. Washington's agricultural education program at Tuskegee, Alabama. Lyman shows clearly that Park's essays, written outside the academy, formulated a far more complex perspective on modern modes of evil than any proposed by his contemporaries, thereby influencing sociological debates for decades to come. By writing his essays on topical subjects and by publishing them for a public audience, Park dramatized his profound belief that the struggle to achieve racial accommodation and to establish a true and lasting democracy is a concern for all.

ngwa business pro: *Aquananotechnology* David E. Reisner, T. Pradeep, 2014-09-24 The world's fresh water supplies are dwindling rapidly—even wastewater is now considered an asset. By 2025, most of the world's population will be facing serious water stresses and shortages.

Aquananotechnology: Global Prospects breaks new ground with its informative and innovative

introduction of the application of nanotechnology to the remediation of contaminated water for drinking and industrial use. It provides a comprehensive overview, from a global perspective, of the latest research and developments in the use of nanotechnology for water purification and desalination methods. The book also covers approaches to remediation such as high surface area nanoscale media for adsorption of toxic species, UV treatment of pathogens, and regeneration of saturated media with applications in municipal water supplies, produced water from fracking, ballast water, and more. It also discusses membranes, desalination, sensing, engineered polymers, magnetic nanomaterials, electrospun nanofibers, photocatalysis, endocrine disruptors, and Al₁₃ clusters. It explores physics-based phenomena such as subcritical water and cavitation-induced sonoluminescence, and fog harvesting. With contributions from experts in developed and developing countries, including those with severe contamination, such as China, India, and Pakistan, the book's content spans a wide range of the subject areas that fall under the aquanotechnology banner, either squarely or tangentially. The book strongly emphasizes sorption media, with broad application to a myriad of contaminants—both geogenic and anthropogenic—keeping in mind that it is not enough for water to be potable, it must also be palatable.
